(999)

## Hydraulic spindle

**Design:** Space-saving model with integrated, automatic reset mechanism.

**Application:** Suitable for heaviest stripping work with large pullers. To be used for removing very tight-sitting gears, sprockets, ball bearings, belt machines etc.

| Order No. | Model | 6920 | Stroke mm | Pressure | Suitable for puller model |
|---|---|---|---|---|---|
| 0015 | 8-1-B | 372.50 | 10 | 15 t/150 KN | 20-4; 20-40 |
| 0021 | 8-2-K | 451.00 (W562) | 10 | 20 t/200 KN | 11-1; 11-20 |

## Hydraulic auxiliary press

**Design:** Space-saving model Steel body with hydraulic mechanism with integrated, automatic reset mechanism.

**Application:** To protect against overload, the additional presses should only be used with extractors from size 3. This increases the pressure, allowing also tight parts to be pulled off with ease.

| Order No. | Model | 6921 | Stroke mm | Pressure |
|---|---|---|---|---|
| 0011 | 9-1 | 114.00 | 10 | 10 t/100 KN |
| 0015 | 9-2 | 141.00 (W562) | 15 | 15 t/150 KN |

## Bearing building tool set

**Design:** Light design from impact-resistant poly-acetate with unique locking mechanism. Supplied in L-Boxx.

**Application:** For the installation of ball bearings. The plastic attachment is minimally smaller than the ball bearings, thus allowing easy insertion. Ideal for use on construction sites and in outdoor assembly.

| Order No. | Design | 6339 | Model | Set contents |
|---|---|---|---|---|
| 0010 | 17-part | 389.50 (W562) | 71-L | 1 recoilless hammer<br>13 Impact rings for bearings with drill hole Ø 10–50 mm<br>3 Impact sleeves for inner Ø 18; 32; 52 mm |

## Separating fork

**Design:** Massive, fork-shaped wedge-head made of special steel with strong holding rod and knurled handle.

**Application:** For universal separation and disassembly works. Easily deployable also in most narrow gaps due to wedge-shape. The parts to be separated, e.g. pitman arm, tie rod heads, shock absorbers and wedged ball bolt joints in conic seat etc. are driven apart by hitting the handle with a hammer.

| Order No. | Model | 6931 | Fork opening mm |
|---|---|---|---|
| 0018 | 135-1 | 30.50 | 18 |
| 0023 | 135-2 | 30.50 (W562) | 23 |

## Ball joint puller

**Design:** Sturdy body made of special steel with pressure clamp and strong spindle.

**Application:** Simple and quick pressing out of ball studs when de-installing ball joints, particularly for all MV manufacturers such as Audi, BMW, Fiat, Ford, Mercedes, Nissan-Datsun, Opel, Toyota, VW, Volvo.

| Order No. | Model | 6932 | Fork opening mm |
|---|---|---|---|
| 0020 | 129-0 | 74.80 | 20 |
| 0022 | 129-1 | 58.10 (W562) | 18–22 |

6932 0020

6932 0022

## Stay bolts remover

**Design:** Made of tempered special steel, with large clamping range.

**Application:** To twist out studs. The stud is reliably pressed securely against the inner serration due to the groove in the knurled wheel. Due to the low placement of the knurled wheel, very short stud ends can be detected.

| Order No. | Model | 6933 | Chucking capacity mm |
|---|---|---|---|
| 0019 | 52 | 79.50 (W562) | 5–19 |

## Stud bolt insertion and removal driver

**Design:** Made of chromium-vanadium steel, chrome-plated. Activation can occur by way of 21 mm ring wrench or 1/2" socket wrench

| Order No. | Model | 6939 | For bolt Ø mm |
|---|---|---|---|
| 0006 | 53-6 | 31.70 | 6 |

| 0400 | 4-part | 129.00 (W562) | 53 | 6; 8; 10; 12 |

## Nut splitters, mechanical

**Design:** Made of tempered special steel, with hexagonal nut for tightening the hardened chisel cutter.

**Application:** For splitting inextricably fixed or overly tightened nuts to grade 6, without damaging the thread.

**Note:** Dull, jagged or broken chisel must be replaced immediately.

| Order No. | Model | 6934 | For nut size |
|---|---|---|---|
| 0010 | 55-0 | 40.60 | SW 4–10 (M2 –M6) |
| 0018 | 55-1 | 49.20 | SW 10–18 (M6 –M12) |
| 0027 | 55-2 | 52.90 (W562) | SW 19–27 (M12–M18) |

## Nut splitters, hydraulic

**Design:** Made of tempered special steel, with hexagonal nut to tighten the hardened chisel cutter as well as anvil with spanner surface and pressure spindle.

**Application:** For splitting inextricably fixed or overly tightened nuts of grades 5; 6; 8 and 10 without damaging the thread. Can also be used in confined areas due to the double cranking action. The hydraulic system minimizes effort.

**Note:** Dull, jagged or broken chisel must be replaced immediately.

| Order No. | Model | 6935 | For stainless steel | For nut size |
|---|---|---|---|---|
| 0022 | 56-1 | 129.00 | – | SW 7–22 (M4–M14) |

6935 0022

6935 0036

6935 0046

## Screw extractor

**Design:** Made of chrome-vanadium steel, annealed, with rolled thread and fine left twist. The shank is sharpened, with square for actuation with a tap wrench or tool holder.

**Application:** For removing broken screws with a right thread. Drill a central hole in the piece to be removed using the recommended size of spiral drill, insert the screw extractor and turn evenly (not with a jerk) to the left to loosen the residual piece.

| Order No. | Size | 1855 | For screws | Spiral drill ∅ mm | d1–d2 mm | Square mm | Total length mm |

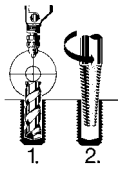
| | | (W177) |



## Screw extractor Hi-Trac TP

**Design:** High-quality screw extractor HiTrac with special coating TP, heat-treated, 54-56 HRC, with rolled thread and fine left twist. Sharpened shank, with square for actuation with a tap wrench or tool holder.
The properties have been considerably improved and the application facilitated by the new geometry. Lower loosening torque due to new cross-section geometry. Less drilling depth due to optimised thread length. Improved safety for users and component as well as a larger range of applications, time savings.

**Application:** Same as type 1855.

| Order No. | For screws | 1859 schröder | Size | Spiral drill Ø mm | d1–d2 mm | Square mm | Total length mm |

## Screw extractor

**Design:** Made of chromium-vanadium steel, hardened, surface burnished, cutting surface polished.
With grains function, hexagon head and double cutting for right- and left-hand thread.

**Application:** For removing screw by pre-drilling with appropriate drill bit.
Shove extractor into hole and loosen screw.
Life varies depending on the hardness of the counter material - intended for single use from a certain hardness of the reverse rotation.
Suitable for left or right thread.

| Order No. | Size | 1864 RENNSTEIG WERKZEUGE | For screws | A/F mm | Drill Ø mm |

## Screw extractor set

**Design:** Extractor made of chrome-vanadium-molybdenum steel, spiral drill made of HSS, bronzed.
Supplied with the corresponding spiral drill.

**Application:** For removing damaged or broken screws and especially worn inner hexagon screws. Worn hexagon socket screws (1a) are directly removed with the right screwdriver without having to drill (1b/2c). If the screw heads (2a) have broken off, a spiral drill is initially used to pre-drill (2b) and then the screw is removed with the right screw extractor (1b). For this purpose, a ring wrench is placed down onto the screw extractor and the screw can be removed without jamming (1c/2d).

## Roller board

**Design:** Solid, one-piece construction made of high-strength plastic. Ergonomically shaped, arm areas cut for optimum freedom of movement. High lying comfort, padded, soft headrest. For comfortable working under a vehicle With practical tool trays and small parts surfaces right and left. Six large smooth-running castors and rubber treads, oil resistant and quiet, with convenient carrying handle in the foot area, easy to clean.

HAZET

## Spark plug brush

**Design:** Body made of beech wood, bristles made of corrugated brass wire, **wire thickness 0.2 mm.**

**Application:** In the automobile industry for cleaning spark plugs as well as for general universal application in other areas.

| Order No. | Number of rows | 7000 format | Working length mm | Total length mm |
|---|---|---|---|---|
| 0001 | 3 | 1.24 (W566) | 45 | 200 |

## File brush

**Design:** Body made of beech wood, bristles made of high-quality, glued file brush strip (scraping belt).

**Application:** To clean clogged files.

| Order No. | Fill material surface mm | 7002 format | Total length mm |
|---|---|---|---|
| 0001 | 115 x 40 | 1.95 (W566) | 235 |

## Hand wire brush

**Design:** Made of high-quality beechwood with rounded edges and pin hole.

**Application:** For all minor rust removal and cleaning work as well as paint stripping.

**7004** **Steel wire, smooth, oil-hardened, wire thickness 0.35 mm.**

**7006** **Stainless steel wire, smooth, antimagnetic, wire thickness 0.30 mm.**

**7008** **Brass wire, crimped, wire thickness 0.30 mm.**

## Honing brush

**Design:** Robust, self-centring honing tool with silicon carbide fill for a gentle grinding process. The abrasive spheres adapt to the surface with the flexible brush construction. Overall length 200 mm.

**Application:** For final finishing of surfaces an bores. Also for edge breaking and processing non-round drill holes. For the generation of fine-ground surfaces with a high contact ratio for any potential oil-film adhesion. Simple handling on handheld drills, honing machines and automatic machines.

## Brushes for battery-powered devices

Battery-powered devices have experienced constant improvements regarding running times and power over the past years. Devices that do not need a power socket are now indispensable; especially when working in different places, such as in the building trade or for use by fire brigades.

**Why do I need a special tool?**
People out on the road need a tool that covers lots of applications and, of course, the heavier the tool, the quicker the battery runs out. In order to optimise mobile use, alongside a high-performance device you need a tool with a low weight and the best possible flexibility in application.

**Benefits:**
- Flexible use
- Low vibration and quiet
- Low weight
- Longer battery life (up to 30 % and more is possible)
- This means fewer charging cycles

## Cup brushes for battery-powered devices

NEW

**Design:** Suitable for all standard battery-powered one-hand angle grinders. Thread M14 x 2.0.

**Note:** Observe safety recommendations.

**8805** **Brass wire, crimped.** Suitable for surface processing NF metals and soft wood.

**8806** With **nylon filaments impregnated with silicon carbide** with hard and pointed tips and very flexible working surface. No risk of breakage despite high elasticity and flexibility. This prevents clogging the trim with grinding residue to ensure constant high quality grinding. Plus the abrasive filaments are resistant against weak acids and lyes. For descaling, deburring and removal of rust and adhesive residues, as well as for preparing and cleaning weld seams. Suitable for all metals, hard and soft wood and ceramics.

| Order No. | Brush Ø mm | 8805 osborn | 8806 osborn | Effective working width mm | Max. speed RPM $min^{-1}$ |
|---|---|---|---|---|---|
| 0060 | 60 | 12.20 (W702) | 12.85 (W702) | 21 | 12500 |

|---|---|---|---|---|
| 0100 | 100 | 16.65 (W702) | 20 | 12500 |

## Grinding and polishing tools for battery-powered devices

You will find more tools for mobile use in chapter 8:

Cutting disc 8/13
Diamond cutting disc 8/17
Rough grinding wheel 8/7
Abrasive mop discs 8/45
Polishing ring, Finishing ring 8/89

## Wheel brush, crimped

**Design:** Several rows, aggressive design with crimped wire. Supplied incl. the following reduction pieces:
Brushes Ø 75–125 mm contain reduction pieces 1/2" and 5/8",
Brushes-Ø 150–200 mm contain reduction pieces 13, 15, 16, 19, 20 mm as well as 7/8" and 1".

**Application:** For use in stationary machines, for roughening, deburring, stripping, descaling, matting and cleaning. Optimal for processing pieces with a large surface area.

**Note:** Observe safety recommendations.

**7016** **Hardened steel wire.**

**7053** **Brass wire.**

**7018** **Stainless steel wire (1.4310).**

## Wheel brush, silicon carbide

**Design:** Very robust, nylon filaments impregnated with silicon carbide with hard and pointed tips and very flexible working surface. No risk of breakage due to high elasticity and flexibility. This prevents clogging the trim with grinding residue to ensure constant high quality grinding. Plus the abrasive filaments are resistant against weak acids and lyes.
Supplied incl. 7-piece adapter set for various drill holes.

**Application:** For deburring precision parts with consistent grinding effect. With the new silicon carbide abrasive filaments, non-ferrous metals as well as stainless steel can be processed. Suitable for wet and dry processing. **Can be used individually or in rows on shafts.**

**Note:** Observe safety recommendations.

| Order No. | Brush Ø mm | 7055 osborn | Grain | Effective working width mm | Hole mm | Max. speed RPM min$^{-1}$ |

## Radial bristle brush

**Scotch-Brite™ Bristle brush type A**
**Design:** With straight segments, yellow, made of individual plastic segments with integrated ceramic Cubitron. The segments are connected with a flange (25.4 mm inner diameter). The unique construction of Bristle products prevents brushes from clogging and ensures long service life and unvarying performance. Due to the flexibility of the individual filaments, a constant finish is achieved, even on profiled surfaces.

**Application:** To clean heavily clogged filaments and for deburring and preparing surfaces. Ideal for use on the bench grinder, straight grinder or bendable shafts. Supplied incl. adapters for reducing the inner diameter.

**Note:** Observe safety recommendations.

| Order No. | Ø x thickness mm | 7009 3M | Grit | Number of segments | Max. speed RPM min$^{-1}$ |
|---|---|---|---|---|---|
| 0150 | 150 x 12 | 81.50 | 80 | 8 | 6000 |
| | | (W812) | | | |

## Bevel brush

**Design:** Aggressive design. Suitable for all standard one-hand angle grinders.
Thread M14 x 2.0.

**Application:** For descaling, deburring and removal of rust and adhesive residues, as well as for preparing and cleaning weld seams.

**Note:** Observe safety recommendations.

## Tool wheel brush

**Design:** With 6 mm mounting shaft.

**Application:** For use in drills and high-speed electrical and compressed air tools. The small diameter enables use in hard-to-reach spaces, inner spaces and grooves. Ideal for the removal of burrs, scale, rust, cinder, paint, etc.

**Note:** Observe safety recommendations.

## Cup brush, knotted

**Design:** Aggressive design with knotted wire. Mounting shaft Ø 6 mm.

**Application:** For aggressive use in flat surface processing. For roughing and for the removal of paint, burrs, cinder, rust, scale, etc.

**Note:** Observe safety recommendations.

| Order No. | Brush Ø mm | 7033 | Wire thickness mm | Max. speed RPM min$^{-1}$ |
|---|---|---|---|---|
| 0065 | 65 | 9.15 (W566) | 0.5 | 6000 |

## End brush, crimped

**Design:** With crimped steel wire. For use on fast-running hand tools. Mounting shaft ∅ 6 mm.

**Application:** For the removal of rust, burr, cinder, scale, paint, excess rubber and other contaminants to hard to access areas and inner areas.

**Note:** Observe safety recommendations.

**7044** **Hardened steel wire.**

**7046** **Stainless steel wire (1.4310).**

| Order No. | Brush ∅ mm | 7044 format | 7046 format | Wire thickness mm | Working length mm | Max. speed RPM $min^{-1}$ |
|---|---|---|---|---|---|---|
| 0010 | 10 | 2.17 | 3.04 | 0.30 | 20 | 20000 |
| 0017 | 17 | 2.24 | 3.59 | 0.30 | 25 | 18000 |

| 0030 | 30 | 3.77 (W566) | 5.60 (W566) | 0.30 | 25 | 15000 |

## De-carb brush, knotted

**Design:** With knotted wire. High cleaning efficiency and particular flexibility; the centrifugal force during operation opens and closes the brush. For use on fast-running hand tools. Mounting shaft ∅ 6 mm.

**Application:** For the removal of rust, burr, cinder, scale, paint, excess rubber and other contaminants to hard to access areas and inner areas. Particularly suitable for inside cleaning of cylindrical drill holes and pipes.

**Note:** Observe safety recommendations.

**7045** **Hardened steel wire.**

**7047** **Stainless steel wire (1.4310).**

| Order No. | Brush ∅ mm | 7045 format | 7047 format | Wire thickness mm | Working length mm | Max. speed RPM $min^{-1}$ |
|---|---|---|---|---|---|---|

## Ideal tin snips, with double lever transmission

NEW

**Design:** Especially robust and compact. Cutter head made of special stainless steel, drop-forged, cutting edges additionally induction hardened (min. 61 HRC), **25 % reduced effort** through optimised leverage and cutting edge shape. The more compact head allows **improved manoeuvrability** and the centrally attached locking bar allows left and right-handed users to operate it easily without changing position. **Better handling** with reduced handle opening angle with almost the same cutting edge length. Furthermore, the studs and the sintered steel insert provide a **robust and smooth joint.** Handles with ergonomic plastic coating, soft cushion insert and slip guard.

**Application:** For straight and continuous cuts as well as figure cuts, in metal sheets up to 1.2 mm and stainless steel sheets up to 1.0 mm. Ideal for use in heating and climate technology and in dry construction.

| Order No. | Length mm | 7061 Erdi Right-hand cutting | 7061 Erdi Left-hand cutting | Cutting edge length mm |

## Universal traverse snips Multisnip Master

**Design:** Cutting edges and all metal parts made of stainless steel. With side offset adjustable blades, joint, safety catch, inner, integrated steel spring for automatic blade opening. The fibre-glass reinforced plastic handles are ergonomically shaped, with gentle soft cushion insert, slip guard and suspension eye.

**Application:** For long and straight continuous cuts and in large radii. Cuts various kinds of materials, such as aluminium sheet up to 0.75 mm, copper sheet up to 0.6 mm, steel sheet up to 0.6 mm as well as stainless steel sheet up to 0.4 mm. Also cuts plastics, leather and cardboard effortlessly.

## Pipe cleaning spiral for ROLLER Mini-Ortem/Mini-Ortem A

**Design:** Highly flexible and specially hardened for easy propulsion, also for tight elbow pipes, with bulb auger.

**Application:** Ideal for sink drains and tight pipe elbows. Spiral also fits through strainers in sinks.

| Order No. | Design | 7192 ROLLER | Cable ∅ mm | Spiral length m |
|---|---|---|---|---|
| 0060 | Without core (for Mini-Ortem) | 42.80 | 8 | 7.5 |
| 0065 | With core (for Mini-Ortem A) | 61.00 (W620) | 8 | 7.5 |

## Pipe cleaning machine ROLLER Ortem 22

**Design:** Compact, triued-and-tested, universal pipe cleaning machine, for pipe ∅ 20–150 mm. Continuous, undivided drive spindle and clamping jaws outside the casing, fully sealing the motor space off to protect against water and dirt. Highly flexible, specially hardened pipe cleaning spiral for light propulsion, also for hard-to-reach places. Pipe cleaning spiral drive ∅ 16 and 22 mm made directly without any change of jaw. Variable spiral lengths through quick-coupling partial spirals, no unnecessary turning of long pipe cleaning spirals. Manual feed for sensitive work. Stable, centered pressing lever for central power transmission and high stability. Pressing lever also acts as handle. Guide hose prevents excess spiral rotation and pollution of the environment. Right/left-hand rotation.

**Supplied:** Drive machine, guide hose.
**Order No. 7192 0010** also with 5 sub-spirals ∅ 16 mm x 2.3 m and ∅ 22 mm x 4.5 m in the spiral basket, straight auger ∅ 16 and 22 mm, toothed blade auger 16/25 mm, funnel auger 22 mm, retrieval auger 22 mm, serrated cross-blade borer 22/35 mm, 1 pair of guide gloves, spiral separating rods 16/5 and 22/32 mm plus steel sheet box for every tool set.

## Pipe cleaning spirals for ROLLER Ortem 22

**Design:** Highly flexible and specially hardened for easy propulsion, also for tight elbow pipes, can be coupled.

| Order No. | Cable ∅ mm | 7192 ROLLER | Spiral length m |
|---|---|---|---|
| 0110 | 16 | 47.50 | 2.3 |
| 0115 | 22 | 75.40 (W620) | 4.5 |

## Tools for pipe cleaning machine ROLLER Ortem 22

**7192 0120 + 0125** For boring through major blockages as well as for removing samples to determine the cause of the blockage.

**7192 0130 + 0135** For minor congestions such as by paper and textile, ideal for tight curves.

**7192 0140 + 0145** To retrieve spirals left in the tube, e.g. when pipe cleaning spirals break in the tube.

**7192 0150 + 0155** For minor blockages such as from paper and textile, ideal for large pipe diameters.

**7192 0160–0230** Used to bore out greasy or heavily silted pipes.

**7192 0170–0225** Ideal for incrustation and obstructions of all kinds, e.g. limescale deposits.

**7192 0185** For severe grease accumulation and minor to severe silting.

**7192 0190 + 0195** For final cleaning, to remove accumulation of sludge and incrustation. Particularly suitable for sensitive pipes, such as plastic pipes.

## Tube and pipe shears

NEW

**Design:** Blade with pointed cutting edge for low-effort penetration into the material. With opening spring and one-hand locking lever.

**Application:** For precise, single-handed cutting of tubes, including with textile reinforcement e.g. aramid fibres

**7138 0022** Die-cast magnesium body, blade PTFE coated.

**7138 0028** Die-cast magnesium body, blade PTFE coated. The joint is made of a steel mounted axle with needle bearing. Handles with impact-absorbing soft inserts. Also cuts soft plastic pipes e.g. PEX, PE, PB, etc. as well as thin-walled plastic armoured pipes.

**722A 0185** Body made of glass fibre reinforced plastic, blade made of special tool steel, oil-hardened.
Also cuts soft plastic pipes e.g. PEX, PE, PB, etc. as well as thin-walled plastic armoured pipes.

## Plastic pipe shears ROCUT® TC

ROTHENBERGER

**Design:** Stainless steel blade with V-cut with broad pipe contact surface for precision pin-point cutting. With the ideally serrated cutting curve, even larger wall thicknesses can be cut with minimum effort. The opening handle enables controlled opening of the blade at the push of a button. Handle with rubberised grip provides a secure hold when cutting.

**Application: For the precise one-handed cut,** for non-fatiguing separating and cutting of PE-, PE-X-, PP-, VPE-, PB- and PVDF pipes. **Item 7212 0160 specially suited for PVC pipes.**

(W592)

## Plastic pipe shears ROCUT®

ROTHENBERGER

**Design:** Stainless steel blade with V-cut with broad pipe contact surface for precision pin-point cutting. With the ideally serrated cutting curve, even larger wall thicknesses can be cut with minimum effort.

**Application: For the precise one-handed cut,** for non-fatiguing separating and cutting of PE-, PP-, VPE-, PB- and PVDF pipes. Particularly suitable in preparation for socket welding.

| Order No. | For pipe ∅ | 7212 ROTHENBERGER |

| 0210 | Stainless steel spare blade 0–2.1/2" (0–63 mm) | 65.95 |

(W592)

## Plastic pipe cutting and chamfering tool

**Design:** Robust body made of metal, with the continuously adjustable pipe clamping pressure, plastic jaws can be used on various pipe diameters. Clamping jaws with compensating springs ensure centric clamping of pipes. Carbide metal blades with optimum cutting edge geometry for precise cutting and long service life.

**Application:** For right-angled and flat cutting and chamfering (15°) of plastic pipes made of ABS, PB, PE, PE-HD, PE-X, PVC and PVDF.

**Supplied:** Quick clamping unit ∅ 110 mm, 2 clamping inserts 50; 75 mm, cutting and chamfering device and case.

| Order No. | Design | 7225 ROLLER |
|---|---|---|
| 0010 | Cutting and chamfering tool, for pipe ∅ 40–110 mm | 279.00 |
| 0020 | Carbide cutting and chamfering tool for pipe wall thicknesses up to 11.0 mm | 30.20 |
| 0030 | Carbide cutting and chamfering tool for pipe wall thicknesses up to 15.5 mm | 126.50 |

(W001)

## Inner and outer deburrer

**Design:** Robust, impact-resistant plastic casing, with specially sharpened and hardened blades for vibration-free cutting.

**Application:** For quick deburring of copper, brass, aluminium and plastic pipes.

## Pipe widening pliers

**Design:** Torsion-resistant pliers, with force transfer and hexagonal enlargement punch for even, concentric widening. Enlargement head with long, stable segments for pipe fittings in line with ARCR and application for calibrating of pipe ends.

**Application:** For the even, concentric enlargement of soft metal pipes with wall thicknesses of up to 1 mm.

## Pressing tongs/clamping ring

**Note:** Driven by all ROLLER radial presses (with the exception of ROLLER Multi-Press Mini ACC) and with suitable drives of other makes.

**7176** **Pressing tongs model M**
For Geberit Mapress carbon steel, stainless steel, copper (stainless steel and copper in gas installation 15–35 mm).

**7164** **Clamping ring model M**
For Geberit Mapress carbon steel, stainless steel, copper, stainless steel and copper in gas installation. Adapter tongs Z2 are necessary for driving (Order No. 7168 0003).

**7170** **Pressing ring model M, offset 45°,** for working in difficult to reach places
For Geberit Mapress carbon steel, stainless steel, copper, stainless steel and copper in gas installation. Adapter tongs Z1 are necessary for driving (Order No. 7168 0001).

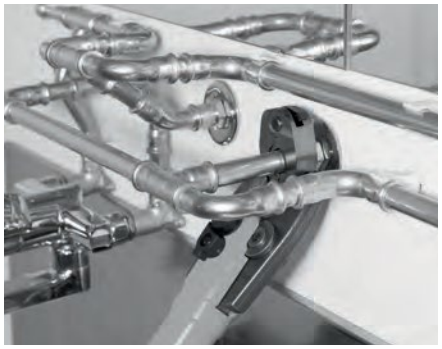
**7177** **Pressing tongs model V**
For System Viega (Prestabo, Profipress, Profipress G, Profipress THERM, Sanpress, Sanpress INOX, Sanpress INOX G).

**7172** **Pressing ring model V, offset 45°,** for working in difficult to reach places
For System Viega (Prestabo, Profipress, Profipress G, Profipress THERM, Sanpress, Sanpress INOX, Sanpress INOX G). Adapter tongs Z1 are necessary for driving (Order No. 7168 0001).

**7178** **Pressing tongs model UP** (U Ø 40-50 mm)
For System Uponor MLC, MLC-D, MLC-G.

**7179** **Pressing tongs model G**
For Geberit Mepla.

**7180** **Pressing tongs model VP**
For System Viega (Sanfix Fosta, Sanfix P, Sanfix Plus, Viegatherm P).



**Pressing, 45° offset (7170 + 7172) for hard-to-reach places.**

## Tube benders

**Design:** Lightweight construction with one fixed and one moving bending arm. Bending radius display with degree scale of 0–180° in steps of 30° and clamping device to hold the pipe better. Moveable bending arm with plastic handle.

**Application:** For dimensionally accurate two-handed bending up to 180° of soft copper, aluminium, soft steel and brass pipe. Also suitable for bending very short pipes.

ROTHENBERGER

| Order No. | Nominal dimension mm | 7228 ROTHENBERGER | Radius r mm | Length mm |
|---|---|---|---|---|
| 0095 | 12 | 96.45 | 36 | 390 |
| 0100 | 15 | 115.95 (W592) | 54 | 450 |

## Tube benders

**Design:** Compact, torsion-resistant construction. Bending radius display with scale division 45°; 90°; 135° and 180° in 15° increments, 3 pipe sizes with tight radii can be bent with one device.

**Application:** Refrigeration and air-conditioning technology, oil supply, automotive, hydraulics and compressed air technology, for precise two-handed bending of soft steel, brass and copper pipes up to 180°.

ROTHENBERGER

| Order No. | For pipe Ø mm | 7228 ROTHENBERGER |
|---|---|---|
| 0110 | 6; 8; 10 | 66.95 (W592) |

## Single-hand pipe bender, with ratchet feed

**Design:** With mechanical ratchet feed and ergonomic handle. Bending segments can be easily changed with the bayonet lock.

**Application:** For accurate one-handed bending of soft copper and aluminium pipes, soft, coated copper pipe as well as soft precision steel up to 90°. For the production of U-bends, counter-bends, swan-neck bends and connecting bends at all levels.

**Supplied:** Plastic case, basic device, backing plate, backing segment and 4 bending segments.

ROTHENBERGER

| Order No. | For pipe Ø mm | 7224 ROTHENBERGER |
|---|---|---|
| 0111 | 6; 8; 10; 12 | 259.95 (W591) |

## Hand pipe bender

**Design:** Made of hardened steel. Stable design and pressure, high-sliding bending elements and sliding pieces made of high-strength, fibre-reinforced polyamide.

**Application:** For cold bending by hand or stationary in parallel vice up to 180° of e.g.:

| | |
|---|---|
| Hard, semi-hard, soft copper pipes (also thin-walled) | Ø 10–22 mm |
| Soft, coated copper pipes (also thin-walled) | Ø 10–18 mm |
| Stainless steel pipes of the press-fitting systems | Ø 12–18 mm |
| C-steel pipes of Pressfitting systems (also coated up to Ø 18 mm) | Ø 12–22 mm |
| Soft precision pipes | Ø 10–20 mm |
| Electrical installation pipes DIN EN 50086 | Ø 16–20 mm |
| Multilayer composite pipes | Ø 14–32 mm |

**Supplied:** Bending drive, locking pins, bending segments with sliding block, bending spray and steel case.

ROLLER WERKZEUGE UND MASCHINEN

| Order No. | For pipe Ø mm | 7249 ROLLER |
|---|---|---|
| 0010 | 12; 15; 18; 22 | 496.00 (W621) |

## Pipe bender, electric

**Design:** Tried-and-tested, high-torque universal motor with 30 % power increase using automatic carbon brush adjustment. Maintenance-free, robust transmission. Rotational speed continuously adjustable, no setting work.

**Application:** For bending up to 180° of e. g.:

| | |
|---|---|
| Hard, semi-hard, soft copper pipes (also thin-walled) | Ø 10–35 mm |
| Soft, coated copper pipes (also thin-walled) | Ø 10–18 mm |
| Stainless steel pipes of the press-fitting systems | Ø 12–28 mm |
| Carbon steel pipes of the Pressfitting systems (also uncoated) | Ø 12–28 mm |
| Soft precision pipes | Ø 10–28 mm |
| Steel pipes DIN 2440 | Ø 1/4–3/4" |
| Electrical installation pipes DIN EN 50086 | Ø 16–32 mm |
| Multilayer composite pipes | Ø 14–40 mm |

**Supplied:** Electric pipe bender, locking pins, bending segments, sliding pieces and sheet steel case.

| Order No. | For pipe Ø mm | 7249 ROLLER | Rated power W | Voltage V | Machine weight kg |
|---|---|---|---|---|---|
| 0005 | 15; 18; 22; 28 | on request ◊ (999) | 1000 | 230 | 8.0 |

## Bending segment with sliding block

**Design:** Made of high-strength, glass-fibre-reinforced polyamide, great gliding quality and resistant to compression, with angle scale. Suitable for electric pipe benders (Order No. 7249 0005) and pipe bending pliers (Order No. 7249 0010).

| Order No. | For pipe Ø mm | 7249 ROLLER |
|---|---|---|
| 1005 | 10 | 183.90 |
| 1010 | 12 | 118.00 |
| 1015 | 15 | 132.50 |
| 1020 | 18 | 132.50 |
| 1025 | 22 | 163.50 (W623) |

## Single-hand pipe bender, with quick feed

**Design:** Robust beinding device **with mechanical feed,** making single-handed use possible. Stable design and pressure, high-sliding bending elements and sliding pieces made of high-strength, fibre-reinforced polyamide.

**Application:** For single-handed bending up to 180° of e. g.:

| | |
|---|---|
| Soft copper pipes (also thin-walled) | Ø 10–22 mm |
| Soft, coated copper pipes (also thin-walled) | Ø 10–18 mm |
| Coated carbon steel pipes of the press-fitting systems | Ø 12–18 mm |
| Soft precision pipes | Ø 10–18 mm |
| Multilayer composite pipes | Ø 14–32 mm |

**Supplied:** Bender drive, bending segments 1 cross bar with sliding piece and sheet steel case.

| Order No. | For pipe Ø mm | 7249 ROLLER |
|---|---|---|
| 0015 | 12; 15; 18; 22 | 212.00 (W001) |

## Eccentric angular bender

**Design:** With 2 bending tools, one sharp-edged with a 4 mm radius and one with radii of 15 and 25 mm. The angle and length stops can be continuously adjusted. With bending lever extension for **mounting on a workbench.**

**Application:** For bending flat, rectangular, round and angled material made of steel, copper and aluminium up to 90°.

| **Max. bending rate:** | **Cold mm** | **Warm mm** |
|---|---|---|
| Flat steel EN 10058 (DIN 1017) | 100 x 10 | 100 x 20 |
| | 80 x 12 | 80 x 25 |
| | 50 x 15 | – |

## Thread cutter, electric

**Design:** Robust, maintenance-free gearbox, designed especially for ideal power transmission with clockwise/anti-clockwise rotation, thermal overload protection and safety tip switch. Self-reinforcing clamping effect via slanted tensioning spindles. Stable counter-holder to support the torque in both directions of rotation. Easy and quick change of cutter heads. Unique locking of die head in the ratchet level ensure secure grip when cutting. Delivery includes Central die heads and case.

## Testing pump, manual

**Design:** With low-wearing, torsion-resistant piston made of brass. Dual-valve system with stainless steel balls. Ergonomic operating lever, locked to be used as a handle.

**Application:** For precise and quick pressure and leakage testing of pipeline systems in sanitary, heating and sprinkler installations, for compressed air, steam and cooling systems, oil installations in boiler and pressurised vessel construction.

**7134 0005** Container made of corrosion-resistant sheet steel, powder-coated.

**7134 0015** Container made of stainless steel.

## Testing pump, electric

**Design:** Self-priming electric testing pump with high-performance piston pump with low-wearing pressure piston made of stainless steel for high capacity and long service life. Intake hose with filter to suction from containers or to connect a tube valve. Muted, glycerine-filled pressure gauge and high-pressure hose with fabric insert to reduce measurement errors.

**Application:** Pressure and leakage testing (in accordance with DIN 1988) with water, water solutions and emulsions. For liquids with a pH value 7–12, temperature –30 °C to 60 °C and viscosity ≤ 1.5 mPa. For the simple and quick testing of pipe systems, also suitable for large systems.

| Order No. | Control and pressure range | 7134 ROLLER | Suction volume l/min | Connection inch | Performance kW |

| 0105 | 6 MPa/60 bar/870 psi | on request ◊ (999) |

## Leak detector for gas and water lines ROTEST H® GW 150/4

**Design:** The measurement equipment is permanently mounted in sturdy steel sheet boxes. Self-testing pressure pump, with check valve and pressure gauge (Ø 60 mm), 0–4 bar, detailed scaling, accuracy 0.1 bar increments.

**Application:**
For leakage testing of gas lines and devices with operating pressures of up to 150 mbar.
Tightness test for drinking water house installations in line with DIN 1988 (TRWI) of 3 bar/150 bar.
Load test in line with DVGW-TRGI 96 7.1.2 with test pressure of 1.0 bar.
Tightness test for water column in line with DVGW-TRI 96 7.1.3 with test pressure of 150 mbar.
Setting of atmopsheric burners and forced-air burner from 0–30 mbar.
Liquid gas test (lower pressure) with test pressure of 40–60 mbar in acc. with TRF 96 9.4.
Liquid gas test for propane/butane with test pressure of 150 mbar in acc. with TRF 96 9.4.

**Supplied:** 4-bar pressure pump, pressure container, rubber blow, test hose, 4 connector tubes, 5 gas test plugs size 0–2 conical and 1–2 cylindrical as well as a supply end cap.

| Order No. | 7273 ROTHENBERGER |

| 0006 | 569.95 (W591) |

## Coil and test pressure unit with compressor

**Design:** Oil-free reciprocating piston compressor with crankshaft drive, condensing motor and personal protection switch. Control unit with 3" LCD display, 128 x 64 pixel resolution, over 10 programmes in 26 languages. Maximum operating pressure 0.8 MPa/8 bar/116 psi, suction power 230 Nl/min, motor power 1.5 kW.

**Application:** For seal testing with compressed air up to 0.4 MPa/4 bar/58 psi and with water up to 1.8 MPa/18 bar/261 psi as well as for rinsing pipes with air/water mixture up to Ø 2" and with water up to 4" . Rinsing/pressure testing in line with EN 806-4 and ZVSHK codes of practice T82-2011/T84-2004. Also for cleaning, disinfecting and preserving pipe systems.

**Supplied:** Flushing compressor, 2 suction/pressure hoses 1" x 1.5 m, 1 compressed air hose 8 mm x 1.5 m. **Order No. 7135 0010** also with hydro-pneumatic water pump and 1 high-pressure hose 1/2" x 1.5 m.

## Filling and rinsing unit

**Design:** Stable, removable 30 l plastic container with large opening, screw top, shut-off valve and return connection with immersion pipe. A high-temperature resistant hose connects the container and the pump. The suction line contains a fine filter with a large inspection window. This makes air and any soiling visible in the circuit, such as chipping, soldering or welding residue. Powerful, quiet capacitor motor with thermal motor protection.

**Application:** Quick and easy filling, flushing and ventilating of closed systems.
**Ideal for solar systems.**

**7132 0060** With self-priming centrifugal pump, suitable for heat transfer fluid, anti-freeze, water, aqueous solutions. Suction and pressure hoses 1/2", 3 m long, two-sided connections 3/4", temperature-resistant up to 60 °C.

**7132 0080** With dry self-priming impeller pump with special NBR impellers, suitable for heat transfer fluid, anti-freeze, water, aqueous solutions, mineral and vegetable oils, emulsions and cleaning agent. Suction and pressure hoses 1/2", 3 m long, two-sided connections 3/4", high temperature resistant up to 100 °C.

## Precision mitre saw

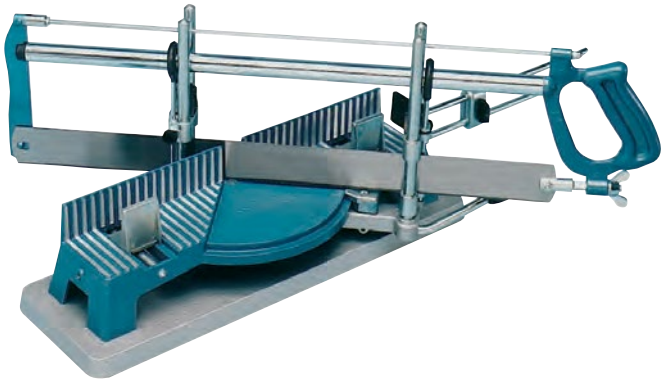
**Design:** Base plate made of die-cast aluminium with roughened surface, non-slip rubber feet and 2 material clamps as well as 4 guide rods for precise and solid guidance of the saw frame. With end stop for both side for serial cuts, cutting depth adjustment as well as automatic locking function at 90°, 45°, 36°, 30°, and 22.5°. Angle infinitely adjustable left and right. The hacksaw can be easily hung on the guide rods with the double sheet spring. Plus the tensioning screw and tensioning wire give the saw frame double tension. With strong, closed bow handle. Supplied with universal saw blade with hardened teeth for wood, light metal and plastic.



| Order No. | Type | 7264 KÜPPER | Cutting width 45°/90° mm | Cutting height mm | Table length mm | Blade size mm | Weight kg |
|---|---|---|---|---|---|---|---|
| 0010 | P III | 115.50 (W555) | 100/160 | 120 | 400 | 550 x 40 | 7.5 |

## Mitre saw blade

**Design:** Made of alloyed tool steel, with inductively hardened teeth. Suitable for precision mitre saw P III.

| Order No. | Design | 7264 | Dimensions mm | Teeth/inch |
|---|---|---|---|---|
| 0020 | For wood, set serration | 11.00 | 550 x 45 | 1.8 |

## Chalk line

**Design:** Durable **aluminium casing** with robust, very hardwearing nylon/polyester cord with large hook, **transmission ratio 6:1.** The chalk line marker has a chalk crusher that crushes up the chalk before entry and therefore prevents failure due to the coil tilting. The transmission, which can be released, prevents the metal crank handle from turning as well when pulling the cord out. Refill cap for quick and easy refilling, it also serves as a secure lock.

| Order No. | Length m | 7327 IRWIN |
|---|---|---|
| 0100 | 30 | 17.40 (W252) |

IRWIN TOOLS

## Chalk line

**Design:** Durable **plastic casing** with robust, very hardwearing nylon/polyester cord with large hook, **transmission ratio 3.5:1.** The chalk line marker has a chalk crusher that crushes up the chalk before entry and therefore prevents failure due to the coil tilting. The transmission, which can be released, prevents the metal crank handle from turning as well when pulling the cord out. Refill cap for quick and easy refilling, it also serves as a secure lock.

## Roller case CLASSIC

**Design:** Made of robust, temperature-resistant, scratch-proof and unbreakable X-ABS plastic, black with durable tool boards made of **Con-Pearl**® for scratch-resistance, dimensional stability and resistance against moisture, grease and chemicals as well as stable powder-coated 4-fold telescopic extension and extra-wide, rubberised wheels. Very sturdy due to wide wheelbase. With galvanised and locked metal hinges, case can bear a load of up to 40 kg, all-round double frame made of aluminium. Lockable with 2 barrel locks. **Airline-ready model.** Supplied without content.

PARAT

**7392 0005**

**Equipped with:**
25 push-in compartments on the 2-sided tool board
1 keep-safe compartment, 400 mm, on the 2-sided tool board
10 push-in compartments on the 1-sided tool board
15 push-in compartments on the cover plate
1 keep-safe compartment, 400 mm, on the cover plate
1 bottom tray with cover plate, height 88 mm, variable subdivision
1 document compartment in lid

**7392 0010**

**Equipped with:**
31 push-in compartments on the 2-sided tool board
12 push-in compartments on the 2-sided tool board
19 push-in compartments on the cover plate
1 keep-safe compartment, 530 mm, on the cover plate
1 sub-dividable compartment, 560 x 90 (67) x 223 mm, in the bottom tray
1 fixed compartment, 540 x 57 x 140 mm, in the bottom tray
2 holding loops for spirit level
1 document compartment in lid

**7392 0015**

**Features:**
1 CP-7 tool holder, Ø 11 mm, on the 1-sided tool board
2 holding loops for tools on the 1-sided tool board
2 CP-7 tool holders, Ø 15 mm, on the 2-sided tool board
2 holding loops for tools on the 2-sided tool board
2 CP-7 tool holders, Ø 26 mm, on the cover plate
1 sub-dividable compartment, 540 x 88 (63) x 223 mm, in the bottom tray
1 fixed compartment, 540 x 63 x 137 mm, in the bottom tray
2 holding loops for spirit levels on the cover
1 document compartment in lid

## Roller case Pivot

NEW

**Design:** Made of impact-resistant HDPE plastic, black, with durable, removable tool boards as well as a stable handle, retractable telescopic handle and large, rotating smooth-running transport rollers. Bottom tray height 151 mm. Case can carry up to 25 kg. Very stable, stackable, and with protective rubber feet. Lockable with two TSA snap locks. **Airline-ready model.** Delivery without content.

**Equipped with:**
8 push-in compartments on the 1-sided tool board
1 large pocket with flap on the 1-sided tool board
8 push-in compartments on the cover plate
1 bottom tray with cover plate
2 small parts boxes
1 stretch net to fix tools
1 keep-safe compartment for documents in the lid

| Order No. | Inside dimensions mm | 7382 GT | Volume approx. l | Weight g |
|---|---|---|---|---|
| 0010 | 417 x 274 x 323 | 395.00 (W606) | 37 | 7300 |

## Tool trolley Atomik Wheels

NEW

**Design:** Made of impact-resistant polypropylene plastic, black, with durable, removable tool boards as well as a stable handle, retractable ergonomic telescopic handle and smooth-running transport rollers. Bottom tray height 160 mm, variable subdivision. Case can carry up to 25 kg, double frame made of aluminium. Very stable and with protective, integrated rubber feet. Lockable with two barrel locks. **Airline-ready model.** Delivery without content.

**Equipped with:**
24 push-in compartments on the 2-sided tool board
12 rubber straps on the 2-sided tool board
1 large pocket with flap on the 2-sided tool board
6 push-in compartments on the cover plate
9 rubber straps on the cover plate
1 bottom tray with cover plate
1 keep-safe compartment for documents in the lid

| Order No. | Inside dimensions mm | 7382 GT | Volume approx. l | Weight g |

| 0020 | 465 x 255 x 352 | 199.00 (W606) | 42 | 5500 |

## Roller case Rock Turtle

NEW

**Design:** Made of impact-resistant HDPE plastic, black, with durable, removable tool boards as well as a stable handle, retractable telescopic handle and large smooth-running transport rollers. Bottom tray height 210 mm. Case can carry up to 30 kg, double frame made of aluminium. Very stable, stackable, and with protective rubber feet. Lockable with two TSA snap locks. **Airline-ready model.** Delivery without content.

**Equipped with:**
24 push-in compartments on the 2-sided tool board
1 large pocket with flap on the 2-sided tool board
6 push-in compartments on the cover plate
1 bottom tray with cover plate
1 keep-safe compartment for documents in the lid

| Order No. | Inside dimensions mm | 7382 GT | Volume approx. l | Weight g |
|---|---|---|---|---|
| 0030 | 470 x 320 x 390 | 389.00 (W606) | 59 | 9000 |

## Drawer roller case ALL.IN.ONE

NEW

**Design:** Made of impact-resistant and weather-resistant polypropylene, black, with sturdy handles, retractable ergonomic telescopic handle and large, smooth-running self-lubricating transport rollers. The drawers can be fully removed, but are also protected against unintentionally falling out. Very stable, stackable, and with protective feet. Can be locked with 4 snap closures, one central lock and padlock (not included in the delivery).
**Airline-ready model.** Delivery without content.

**Equipped with:**
1 removable strap
1 drawer, 30 mm high, with pre-cut 2-coloured foam
1 drawer, 60 mm high, with 23 individually removable small parts compartments
1 drawer, 60 mm high, with pre-cut 2-coloured foam
1 drawer, 95 mm high, with 5 small part boxes: 2 x with 6 compartments, 2 x with 13 compartments, 1 x with 10 compartments

| Order No. | External dimensions mm | 7382 GT | Volume approx. l | Weight g |
|---|---|---|---|---|
| 0040 | 581 x 455 x 381 | 395.00 (W606) | 100 | 14000 |

Figure with optional accessories.

## Protective tool case Waterproof, watertight

NEW

IP 67

**Design:** Made of durable polypropylene, black, shatterproof and impact resistant, sand and dust-tight as well as waterproof to 10 m and temperature resistant from -33 °C to 90 °C. Closes air-tight, with pressure balancing valve. With durable tool boards as well as a stable rubberised handle. Bottom tray height 143 mm. Case can carry up to 25 kg. Extremely stable and robust. Lockable with two barrel locks. **Airline-ready model.** Delivery without content.

**Equipped with:**
11 push-in compartments on the tool board
1 large pocket with flap on the tool board
13 push-in compartments on the cover plate
12 rubber straps on the cover plate
1 bottom tray with cover plate
1 keep-safe compartment for documents in the lid

| Order No. | External dimensions mm | 7405 GT | Volume approx. l | Weight g |
|---|---|---|---|---|
| 0100 | 445 x 190 x 345 | 222.00 (W606) | 29 | 6500 |

## Protective tool roller case Waterproof, watertight

NEW

IP 67

**Design:** Made of durable polypropylene, black, shatterproof and impact resistant, sand and dust-tight as well as waterproof to 10 m and temperature resistant from -33 °C to 90 °C. Closes air-tight, with pressure balancing valve. With durable tool boards as well as a stable rubberised handle, retractable telescopic handle and smooth-running transport rollers. Bottom tray height 167 mm. Case can carry up to 25 kg. Extremely stable and robust. Lockable with two barrel locks. **Airline-ready model.** Delivery without content.

**Equipped with:**
7 push-in compartments on the tool board
7 push-in compartments on the cover plate
1 bottom tray with cover plate
1 keep-safe compartment for documents in the lid

| Order No. | External dimensions mm | 7405 GT | Volume approx. l | Weight g |

## Cup wheel

**Application:** For sharpening engravers on a grinding machine with edge hardening on the periphery. An edge-hardener is fitted to the working part, whereby a very good edge is required for the grinding wheel so the part being machined is guided steadily over the edges of the grinding wheels. On the edge to be protected, a thin resin layer similar to the binding of the synthetic resin-bonded wheels can be applied.

**8015** **High-grade aluminium oxide,** with recess 80 x 40 mm.

**8021** **Silicon-Carbide, green,** with recess 80 x 40 mm.

Articles marked ◊ are not held in stock, procurement is effected at short notice.

## Grinding wheel dressing stone for diamond and CBN wheels

**Design:** Rectangular.

**Application:** For sharpening diamond and CBN grinding wheels. By resetting the bond the grinding wheels are sleek again.

**8505** Grit 120. **8508** Grit 240.

| Order No. | Dimensions mm | 8505 | 8508 |
|---|---|---|---|
| 0100 | 24 x 13 x 100 | 1.66 | 1.66 |
| 0200 | 50 x 25 x 200 | 11.15 (W861) | 11.15 (W861) |

## Diamond dressing tool

**Design:** Plastic sleeve filled entirely with silicon-carbide.

**Application:** For detailed honing, sharpening and defining grinding wheels.

| Order No. | Length x Ø mm | 8502 |
|---|---|---|
| 0005 | 400 x 25 | 13.65 (W861) |

## Tetrabor® grinding wheel dressing tool

**Design:** Tetrabor® honer made from pure, sintered boron carbide. Only the extreme hardness (approx. 35,000 N/mm²) and resistance of boron carbide gives an efficient edge to grinding wheels. The grain does not slip on bonding, rather cuts it smoothly. For grinding wheel honers up to 300 mm Ø.

**Note:** Only use the edge to hone, not the flat surface.

| Order No. | Design | 8504 | Dimensions mm |
|---|---|---|---|
| 0005 | Honing tool | 50.40 | 75 x 12 x 6 |
| 0010 | Handle without honing tool | 34.40 (W861) | 230 |

## Grinding wheel dressing tool

**Application:** For honing clogged grinding wheels. The sharp hand-held roller and hardened steel axle brushes the grain of the material on the wheel just enough to give a perfect turn and optimum traction to the surface.

**8493** Sharpener incl. roller **8496** Replacement roller

| Order No. | Roll width x roll Ø mm | 8493 | 8496 | Holding fixture mm |

## Diamond single point dressing tool

**Design:** Shaft mounted single- or one-stone abrasive diamond block, solid-shaped crystal with few occlusions or irregular cracking, no crevices.

**Application:** For profiling e.g. abrasives for all ceramic-bonded grinding wheels. The abrasive is always clamped so that the angle to the middle of the grinding wheel is between 5° and 15°. Dressing work with diamonds is better wet and with plenty of ventilation as they are sensitive to shock and temperature. As the diamond becomes progressively blunt it should be twisted 90°.

**Note:** The choice of the right diamond size depends on the ∅ of the grinding wheel, e.g. the wheel width. Worn diamond abrasives should be regularly replaced.

**From 1.5 carats with remote head**

| Order No. | Diamond size/ carat weight | 8512 format | Design | For grinding wheel ∅ to mm |

* Other sizes available upon request.

## Diamond multi-point dressing tool

**Design:** 5 diamonds, in a special sintered binding, so that they can be used right to the end without changing.

**Application:** The diamond multi-point dressing tool is a practical dressing tool for coarse grinding with wheels of all diameters up to 100 grit.

**Note:** To prolong the life of this sharpener, continuous cooling should be used during the dressing process.

**8515** MK0. Total length 40 mm.

**8518** MK1. Total length 57 mm.

**8521** Shaft cyl. ∅ 8 x 80 mm.

* Other sizes and shapes available upon request.

## Diamond multi-point dressing tool

**Design:** Single-sintered, high-concentrate (2.5 carat) diamond grain. Diamond cylinder set in the shaft (so no loss of diamonds), universal type.

**Application:** Because of the multiple working points on an efficient diamond tool sharpener, it is only for straight grinding wheel surfaces (flat and peripheral edge). These abrasives have no gradient, so the whole of the diamond grit is employed. This type is not resettable, it is durable and can be used until worn. Not suitable for detail work. For use with disc wheel 36-120.

**Note:** Adequate cooling before and during the dressing process maximises its life span.

**8524** MK0. Total length 40 mm.

**8527** MK1. Total length 57 mm.

**8530** Shaft cyl. ∅ 10 x 80 mm.

## Important note for working with stainless steel:

For **working with stainless steel** generally only **iron and sulphur-free tools are recommended.** A tool should never be used for stainless steel after processing ordinary steel. Residue from ordinary steel can be left on the tool. These residues destroy any stainless steel alloy and lead to the formation of rust on the machined stainless steel. Even sparks from machining ordinary steel can damage stainless steel alloys.

## Rough grinding wheel for battery-powered devices

NEW

**A 546 AC ACCU**
**Design:** Aluminium oxide (A40R), hard, with fibre-reinforced resin bond for long life and grinding performance. Standard bore 22.23 mm.

## Grinding wheel CC-GRIND®-SOLID

**Design:** Resin-bonded aluminium oxide grain (A) on tear-proof, thick, vulcanised fibre backing material uniform and light, open. The innovative high-strength layer structure of the fibre supporting plate ensures rugged and safe use as with a rough grinding wheel. Noise and vibration are reduced by 50%, dust by 80%.

**Application:** For surface grinding, welding seams, chamfering, deburring, edge grinding and combustion flash processing. **Especially for tough and coarse grinding.**

**Note:** Not suitable for peripheral grinding. **Only for use with spanner flange set (Order Nos. 8024 1000 and 1005).**

**8022** **SG-ELASTIC CC-GRIND®-SOLID STEEL**
For steel processing.

**8024** **Grinding wheel SG-ELASTIC CC-GRIND® SOLID INOX**

Articles marked ◊ are not held in stock, procurement is effected at short notice.

## Cutting discs product line

**FORMAT**
High quality product with very good durability and cutting performance, optimised for a given application in industry and crafts.

**PFERD universal line PS-FORTE**
For universal work in industry and hand tooling.
**PFERD performance line SG-ELASTIC**
For professional use in industry and hand tooling.
**PFERD special high performance line SG-PLUS**
For use in special jobs in industry.

## Small detachable disc for steel and stainless steel working

**SG-ELASTIC**
**Design:** Aluminium oxide (A46, A60), semi-hard, with fibre-reinforced resin bond for long life and grinding performance. **Not made with iron, sulphur and chlorine fillers.**

**Application:** For cool work with steel, INOX, high-temperature-resistant steel, cast iron, non-ferrous metals and nickel-based alloys with electric and pneumatic straight grinders. Ideal for use in confined spaces.

**Note:** Please order detachable disc holder separately.

| 0610 | 10 | 8.00 (W868) | 6 | 0–4 |

## Cutting disc for steel

**Design:** Aluminium oxide (A60 1.0 mm thick), tough, aluminium oxide (A46 from 1.6–1.9 mm thick), tough and aluminium oxide (A24 from 2.5–3.0 mm thick), tough, with fibre-reinforced resin bond for long life and grinding performance. Standard bore 22.23 mm.

**Application:** For universal use in all areas of metal work. The thin detachable discs (1.0 mm thick) are ideal for fast, convenient cutting and edging, 1.6 and 1.9 mm thickness for universal cutting tasks and 2.5 to 3.0 mm for maximum tool life with high lateral stability.

**Note:** For more safety and higher lateral stability when working with cutting discs from 178 mm Ø, we recommend using a spanner flange, see (Order No. 8110 0010 📖 8/17).

## Important note for working with stainless steel:

For **working with stainless steel** generally only **iron and sulphur-free tools are recommended.** A tool should never be used for stainless steel after processing ordinary steel. Residue from ordinary steel can be left on the tool. These residues destroy any stainless steel alloy and lead to the formation of rust on the machined stainless steel. Even sparks from machining ordinary steel can damage stainless steel alloys.

## Cutting disc for steel

PFERD

**Design:** Aluminium oxide (A24, A30, A46, A60), with fibre-reinforced resin bond for long life and grinding performance. Standard bore 22.23 mm.

**Application:** Ideal for steel, cutting, profiling of sheet and solid metal. Thin cutting discs (1.0-1.9 mm thick) are ideal for fast and convenient de-burring, 2.4 mm for universal cutting jobs and 3.0 to 3.2 mm for maximum tool life with high lateral stability.

**Note:** For more safety and higher lateral stability when working with cutting discs from 178 mm Ø, we recommend using a spanner flange, see (Order No. 8110 0010 📖 8/17).

**8065** **PS-FORTE**

## Cutting disc for stainless steel

**Cubitron™ II**
**Design:** Heavy-duty precision grain Cubitron™ II (grit size 60+). Cool cut for high quality and fast sanding results. Longer service life compared to conventional cutting discs. Reduces expenditure of energy up to 70% with the same removal as other premium products. 1.0 variant with inside label for added side roughness. Standard bore 22.23 mm.

**Application:** Ideal for use on stainless steel, construction steel and non-ferrous metals. For cutting profiles, rods and sheet metals.

## Diamond cutting disc

**Design:** Steel blades made of quality steel, segmented.

**8115** **EC-18**
**With sintered segments.**
For cutting concrete and concrete roof tiles.
Suitable for use with washed concrete, brick, natural and artificial stone.
**Segment height 10 mm.**

**8113** **EC-21.2**
**With laser-welded segments.**
For cutting concrete, washed and reinforced concrete, concrete roof tiles, brick, natural and artificial stone, basalt and slate. Also suitable for granite and fire-resistant material.
**Segment height 12 mm.**

**8124** NEW **EC-31**
**With laser welded segments.**
For cutting asphalt, sand-lime brick and other abrasive materials.
**Segment height 10 mm.**

## Abrasive fabric band, zirconia alumina

**ZK713X**
**Design:** Full resin bonded zirconia alumina grain (ZA) on robust and flexible fabric, evenly and slightly loose. Excellent grit friction, long life, minimal pressure and good flexibility. **Oil, grease, wax, water and emulsion-resistant.**

**Application:** Special product for working on alloyed and non-alloyed steel as well as non-ferrous metals and stainless steel with on belt sanders. Ideal for working with containers, cast and forged parts, piping, metal ware etc.

## Abrasive fabric band, ceramic grain

**XK870F**
**Design:** Full resin-bonded, self-sharpening ceramic grit (CER) **on robust and very flexible fabric, scattered evenly and slightly loose.** With cooling properties due to grinding-activated additive coating, evenly scattered and slightly loose. With excellent grit friction, **extra-long life,** low to medium pressure and very good flexibility. **Oil, grease, wax, water and emulsion-resistant.**

**Application: For tough and cooled grinding** of high-alloy steel, titanium and nickel-based alloys. Thanks to its extreme hardness it is best suited for working with very hard surfaces. **Grinding-activated additives make cool sanding possible, thereby significantly increasing performance. This also ensures extended service life and reduces discolouration of surfaces.** Suitable for both dry working and working with cooling agents.

## Applications of grit types

Among the main requirements of an abrasive grit are ultra-hardness, ultra-durability, heat resistance and thermal conductivity Applications differ according to the characteristics of individual properties. These can be influenced by the type of bond, the abrasive backing and additives. Different types of grit can be for general use, however, the following options hold true:

**Aluminium oxide:** Suitable for roughing, cutting, freehand grinding, belt grinding, cleaning and deburring of unalloyed and low-alloy steel, cast iron and non-ferrous metal.

**Zirconia alumina:** Suitable for roughing, cutting, freehand grinding, high-performance belt grinding, cleaning and deburring of steel and cast iron.

**Silicon carbide, black:** Suitable for roughing, cutting, freehand grinding and belt grinding grey iron, aluminium, wood and paint.

**Silicon carbide, green:** Suitable for all grinding on grey cast iron, hard metal, stone, titanium alloys, synthetics and ceramics.

## Fleece abrasive band

**KV707X**
**Design:** Resin-bonded fleece with aluminium oxide grain (A), on flexible fabric. Excellent grit friction, long life, minimal pressure and good flexibility. **Water and emulsion-resistant.**

**Application:** For work with alloyed and non-alloyed steel and non-ferrous metals on belt sanders. Ideal for removing rust and old paint as well as for finishing surfaces.

## Fibre grinding wheel, aluminium oxide

**KF787**
**Design:** Resin-bonded aluminium oxide grain (A) on tear-proof, thick, vulcanised fibre backing material uniform and light, open. Excellent grit friction, long life, minimal pressure and good flexibility. With centre hole (standard bore 22.23 mm) and cross slots.

**Application:** Universal product for work with non-alloyed steel and non-ferrous metals on angle and disc grinders and abrasive heads on flexible shafts. For all angle grinders with backing pads of max. 80 m/s peripheral speed. Ideal for working with containers, cast parts, body parts etc.

**Note:** For rubber backing discs see 📖 8/30.

## Fibre grinding wheel, aluminium oxide, for stainless steel and aluminium work

**KF808**

**Design:** Resin-bonded aluminium oxide grain (A) on tear-proof, thick, vulcanised fibre backing material uniform and slightly loose. Excellent grit friction, long life, minimal pressure and good flexibility. **An active additive in the coating slows disc-clogging during use on soft metals (aluminium, stainless steel, etc.). In addition, the coating acts as a coolant during grinding.** With centre hole (standard bore 22.23 mm) and cross slots.

**Application:** Special product for hard machining, steel alloys and non-ferrous metals with angle and disc grinders as well as abrasive heads on flexible shafts. For all angle grinders with backing pads of max. 80 m/s peripheral speed. Ideal for working with containers, cast parts, body parts etc.

**Note:** For rubber backing discs see 📖 8/30.

## Fibre grinding wheel, aluminium oxide

**ZF714**

**Design:** Resin-bonded zirconia alumina grain (ZA) on tear-proof, thick, vulcanised fibre backing material, evenly and slightly loose. Excellent grit friction, long life, minimal pressure and good flexibility. **Self-sharpening and cooled grinding, thus optimum machining performance.** With centre hole (standard bore 22.23 mm) and cross slots.

**Application:** Special product for working with steel alloys and non-ferrous metals with angle and disc grinders as well as abrasive heads on flexible shafts. For all angle grinders with backing pads of max. 80 m/s peripheral speed. Ideal for working with containers, cast parts, body parts etc.

## Fibre grinding wheel, ceramic grit with zirconia alumina admixture

**XF850**

**Design:** Full resin-bonded, **self-sharpening ceramic grit (CER) with zirconia alumina (ZA) admixture, with cooling properties due to grinding-activated additive coating,** on robust and very flexible fabric, scattered evenly and slightly loose. With excellent grit friction, **extra-long life,** low to medium pressure and very good flexibility. **Oil, grease, wax, water and emulsion-resistant.** With centre hole (standard bore 22.23 mm) and cross slots.

**Application: For tough and cooled grinding** of high-alloy steel, titanium and nickel-based alloys. Thanks to its extreme hardness it is best suited for working with very hard surfaces. **Grinding-activated additives make cool sanding possible, thereby significantly increasing performance. This also ensures extended service life and reduces discolouration of surfaces.** Suitable for both dry working and working with cooling agents.

**Note:** For rubber backing discs see 📖 8/30.

## Fibre grinding wheel, ceramic grain Plus

NEW

**XF885**

**Design:** Full resin-bonded, **improved self-sharpening ceramic grit (CER Plus) with cooling properties thanks to its grinding-activated additive coating,** on robust and very flexible fabric, scattered evenly and slightly loose. With excellent grit friction, **extra-long life,** low to medium pressure and very good flexibility. **Oil, grease, wax, water and emulsion-resistant.** With centre hole (standard bore 22.23 mm) and cross slots.

**Application: For tough and cooled grinding** of high-alloy steel, titanium and nickel-based alloys. Thanks to its extreme hardness it is best suited for working with very hard surfaces. **Grinding-activated additives make cool sanding possible, thereby significantly increasing performance. This also ensures extended service life and reduces discolouration of surfaces.** Suitable for both dry working and working with cooling agents.

**Note:** For rubber backing discs see 📖 8/30.

| Order No. | Aluminium | Steel | Carbide | INOX | Cast | Plastic FRP wood | Stone | Paint |

## Rubber backing pad

**Design:** Made of flexible rubber, complete with M14-thread.

**Application:** For all fibre grinding discs with standard bore 22.23 mm for angle grinders with max. 80 m/s peripheral speed.

| Order No. | Ø mm | 8250 format |
|---|---|---|
| 0115 | 115 | 4.28 |
| 0125 | 125 | 5.50 |
| 0180 | 180 | 9.25 |
| | | (W842) |

## Backing pad

**Design:** Completely made of rubber, with cooling ribs.

**Application:** For use on medium to high speed angle grinders for high operational stress. Fan-shaped ribs stiffen the backing pad and supply air circulation together with additional holes, which reduces the amount of heat during the grinding process. Due to cooler grinding, longer service life of fibre discs is achieved.

| Order No. | Ø mm | 8653 VSM |
|---|---|---|
| 0115 | 115 | 6.30 |
| 0125 | 125 | 7.35 |
| 0180 | 180 | 12.55 |
| | | (W836) |

## Holder for fibre grinding wheels

**Design:** Made of impact resistant plastic with quick-adjusting mechanism and fixing holes at the bottom. For safe and snug-fit storage of fibre discs up to Ø 230 mm. The holder can be placed horizontally as well as screwed on walls by means of holes located on the bottom.

| Order No. | Ø x height mm | 8251 |
|---|---|---|
| 0010 | 180 x 300 | 21.70 |
| | | (W836) |

## Work protection

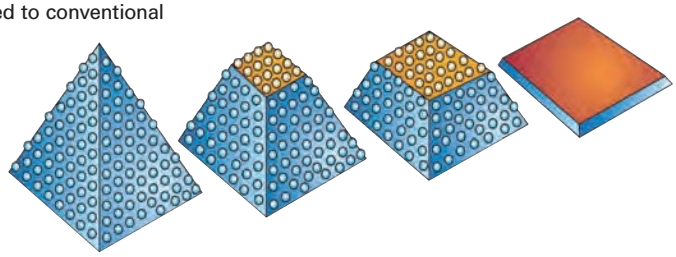
Work protection products can be found from 9/127.

## Trizact™

The abrasive grain consists of a precisely arranged, three-dimensional structure of tiny mineral particles. New abrasive particle layers are exposed continuously. Once the tape is half used, about 85% of the abrasive particles are still available.

This produces a smooth, reproducible surface.
Trizact™ abrasives are therefore perfectly suited to finishing and, compared to conventional abrasives, have a much longer life and are more economical.

**Products with Trizact™ abrasive grain**:
Abrasive sleeves for burnishing machines 📖 8/65

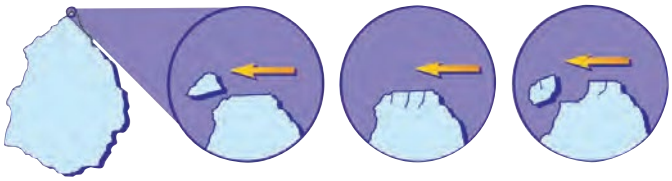


## Cubitron™

During the grinding process, small corners of the ceramic sintered grain break off. The resulting micro-breaks in the grain produce sharp edges. This process repeats itself during the entire grinding process.

This self-sharpening effect increases its life span considerably. Even with high temperatures and strain generated during the grinding process, the Cubitron™ microstructure retains its hardness and cutting action. It is therefore ideal for grinding stainless steel, titanium and heat-sensitive nickel alloys.

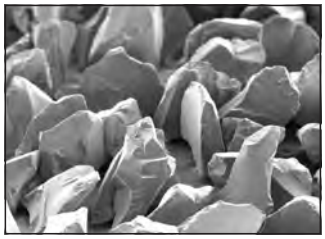
**Products with Cubitron™-abrasive grain:**
Hookit™ Velcro-grinding disks 📖 8/36
ROLOC™ grinding disks from 📖 8/41
Bristle discs page 📖 8/43 and 📖 8/54
Abrasive sleeves for burnishing machines 📖 8/65



## Cubitron™ II

The individual grains of ceramic Cubitron ™ II abrasives are precisely shaped, uniform in size and arranged at right angles in the form of small triangles. Naturally Cubitron™ II has the self-sharpening effect of Cubitron™.

**Conventional ceramic grain**



Different in size and shape as well as unevenly distributed. The result is the abrasive's shorter life span as well as stress fractures and discolouration of the material:

**Cubitron™ II-abrasive grain**

Precisely shaped, uniform grinding grains, evenly distributed and symmetrically aligned. The result is maximum removal rate, a perfect surface finish, a quicker, cooler grind as well as less material distortion:

The higher deburring of Cubitron™ II-abrasives benefit all metal-working operations such as steel construction, container construction, welding companies, foundries and forges using angle grinders and belt sanders for more removal.

**Typical applications are:**
- Weld preparation/deburring, cast machining
  Quicker deburring and a finish, which often needs no further machining and shortens processing time.
- Chamfering before welding
  Quicker grinding processes compared to conventional grinding products and a longer life span.
- General removal work
  Universal on steel, tool steel and non-ferrous metals:
  All removal work is faster, easier and provides a smoother finish.

**Your advantages:**
- Greater, smoother removal
- Up to 40% time saving potential
- 2 to 7 times longer life (depending on the application process)
- Shorter tooling time due to savings on disk changes
- Less pressure means greater comfort for the user
- Less dust and heat development

**Products with Cubitron™-abrasive grain:**
Fibre grinding disks for steel and stainless steel 📖 8/32
ROLOC™ grinding disks 📖 8/42
Abrasive flap wheels 📖 8/51
Abrasive sleeves for machine burnishing machines 📖 8/65

## Fibre grinding wheel for steel working, Cubitron™ II

**982C**

**Design:** Fully resin-bonded precision grit (Cubitron™ II) on vulcanised fibre backing material, scattered evenly and semi-loose. The individual grains of the ceramic Cubitron™ II abrasives are small, precisely-shaped triangles, perpendicular in arrangement, and uniform in size. They are uniformly distributed but randomly spread, so that each triangle grain can form two chips. Tough, cool grinding with high removal rate, **lasts up to 3 times longer** and over **30% faster removal.**

**Application:** In all metal-working industries, where high removal rates combined with very good surface finishes need to be achieved. Ideal for surface grinding, cast iron work, flame-torch work on engineering steel and non-ferrous metals.

**Note:** For backing discs with grain sizes 36+ and 60+ see (Order No. 8239), for grain size 80+ see (Order No. 8240). Detailed information about Cubitron™ II is found on 8/31.

(W812)

## Fibre grinding grinding wheel for stainless steel work, Cubitron™ II

**987C**

**Design:** Fully resin-bonded precision grit (Cubitron™ II) on vulcanised fibre backing material, scattered evenly and semi-loose. The individual grains of the ceramic Cubitron™ II abrasives are small, precisely-shaped triangles, perpendicular in arrangement, and uniform in size. They are uniformly distributed but randomly spread, so that each triangle grain can form two chips. Tough grinding with highest removal rate, **lasts up to 3 times longer** and **40% faster removal.** Grinding-activated coating prevents clogging and makes for cooler grinding.

**Application:** In all metal-processing industries, where high removal rates combined with very good surface finishes need to be achieved. For use with backing bad on all angle grinders. Ideal for surface grinding, pre- and post-welding work on stainless steel, aluminium, titanium and nickel alloys.

**Note:** For backing discs with grain sizes 36+ see (Order No. 8239), for grain size 60+ and 80+ see (Order No. 8240). Detailed information about Cubitron™ II is found on 8/31.

## COMBICLICK® fibre grinding wheel, ceramic grain

**CC-FS**
**Design:** Abrasive ceramic grain (CO-COOL). High-powered grinding with highest removal performance. Grinding-activated additives in the surface give a clear, visible improvement in removal, prevents clogging and makes for cooler grinding.

**Application:** Suitable for grinding alloyed and non-alloyed steel, cast iron and hard metal laminates.

## Deburring disc, perforated

format professional quality

**Design:** Resin-bonded aluminium oxide grain (A) on paper, smooth and semi-open grained. Excellent grit friction, long life, minimal pressure and good flexibility. With perforations for suction of grinding dust, backed with durable Velcro.

**Application:** Universal product, suitable for **wood, stainless steel, metal and filler working** on angle grinders with backing pads to max. 40 m/s peripheral speed. Ideal for working on wooden parts and car body parts.

**8260** **With 8 extraction holes Ø 10 mm,** hole circle Ø 65 mm. For electric tools made by AEG, Atlas Copco, Black & Decker, Bosch, DeWalt, ELU, Festool, Hitachi, Kress, Makita, Metabo and Skil.

**8263** **With 6 extraction holes Ø 10 mm,** hole circle Ø 80 mm. For electric tools made by Bosch, DeWalt, ELU, Hitachi, and Metabo.

**8237** **With 8 suction perforations, diameter 10 mm and centre hole diameter 17 mm,** hole-diameter 120 mm. For electric tools made by Festool, Holz Her, Mafell and Makita.

## Velcro grinding wheel, aluminium oxide

**KP508K**
**Design:** Resin-bonded aluminium oxide grain (A) on heavy-duty paper, scattered evenly and slightly loose. Excellent grit friction, long life, minimal pressure and good flexibility. Backed with durable Velcro

**Application:** Universal product, suitable for working with wood, also for metal and filler work with angle grinders with backing pads to max. 40 m/s peripheral speed. Ideal for working on wooden parts and car body parts.

**Note:** Velcro backing discs see (Order No. 8259).

## Velcro grinding wheel, zirconia alumina

**ZK713K**
**Design:** Resin-bonded zirconia alumina grain (ZA) on fabric, electrostatically closed. Excellent grit friction, long life, minimal pressure and good flexibility. **Thanks to the active substance in the surface-binding it causes hardly any discolouration and gives optimum cutting performance.** Backed with durable Velcro

**Application:** Special product for treating tough machinable and alloyed steel, non-ferrous metals and titanium, for all angle grinders with backing pads and max. 40 m/s peripheral speed. Ideal for working with containers, cast parts, body parts etc.

**Note:** Velcro backing discs see (Order No. 8259).

## Hookit™-Velcro grinding wheel, perforated

**Design:** Resin-bonded abrasive grain (A) on paper, smooth and open grained. Dust-repellant Fre-Cut™ coating and the hole structure in conjunction with Hookit™-adhesive backing pads prevents premature clogging and clearly increases life span and removal performance.

**Application:** Universal abrasive suitable for any coarse, medium and fine grinding on all hard and soft wood, synthetic and metal surfaces as well as for paint and filler sanding.

**Note:** Adhesive backing discs see (Order No. 8212).
Detailed information about Cubitron™ is found on 8/31.

**8657** **236U**
Mit **21 suction holes** and **aluminium oxide** -abrasive grain.

**8658** **734U/334U**
With **multi-perforation** and **Direct Flow™ extraction system.** Up to 180 grain with **Cubitron™** abrasive grain and coarse perforations, from 220 grain with **aluminium oxide** abrasive grain and fine perforations.

| 0010 | 10 | 13.65 | 150 |

(W812)

## Hookit™ Hand sanding discs

**Application:** For mounting Velcro-fleece discs (Order Nos. 8657 and 8658). Specially for working with profiled surfaces, hand rails for example. The semi-circular form is suitable for working on edges and hard-to-reach surfaces.

| Order No. | Design | 8215 3M |
|---|---|---|
| 0005 | Round | 14.40 |
| 0010 | Half-round | 12.60 |

(W812)

**Design:** Holders and tools with heavy-duty metal screws, which guarantee a quick tool change even with rough use and strong heat development.

**Benefits:** Easy to use, fast tool change, no sticking, no slippage, vibration-free rotation.

**Application area:** Work tools and mould construction, model building, machine construction, car construction, ventilation and design technology, engines and repairs, containers and plant construction.

**Note:** Further COMBIDISC® design features upon request.

## COMBIDISC® holder

**Application:** For mounting COMBIDISC® sanding sheets, COMBIDISC® fleece discs and POLICLEAN® discs. Shaft Ø 6 mm.

## COMBIDISC® sanding sheet, aluminium oxide A

**CD**
**Design:** Resin-bonded aluminium oxide grain (A) on tear-resistant, thick, fabric backing, evenly and slightly loose. With very good grit friction and long life.

**Application:** Suitable for universal sanding work on metals and other materials.

PFERD

## COMBIDISC® sanding sheet, aluminium oxide A-FLEX

**CD**
**Design:** Resin-bonded aluminium oxide grain (A-FLEX) on tear-resistant, flexible fabric backing, evenly and slightly loose. Excellent grit friction, long life, and very good flexibility.

**Application:** Especially for sanding work with seamless transitions on contours and concave and convex metal surfaces. Ideal for construction and moulding.

**Note:** We recommend a soft sheet holder, so as not to damage the flexibility of the sanding sheets.

## COMBIDISC® sanding sheet, aluminium oxide A-FORTE

**CD**
**Design:** Resin-bonded aluminium oxide grain (A-FORTE) on tear-resistant, thick, fabric backing, evenly and slightly loose. Excellent grit friction, long life, and good flexibility.

**Application:** For universal sanding work on all metals. Aluminium oxide A-Forte guarantees long life and cooler cutting.

## COMBIDISC® sanding sheets, aluminium oxide A-COOL

**CD**
**Design:** Resin-bonded aluminium oxide grain (A-COOL) on tear-resistant, thick, fabric backing, evenly and slightly loose. With excellent grit friction, long life, and good flexibility. Grinding-activated additives in the surface give a clear, visible improvement in deburring, prevents clogging and make for cooler grinding.

**Application:** For sanding hard-to-machine materials like stainless steel, Hastelloy, Inconel etc.

| Order No. | Aluminium | Steel | Carbide | INOX | Cast | Plastic FRP wood | Stone | Paint |
|---|---|---|---|---|---|---|---|---|
| 8258/8255 | | ● | | ● | ○ | | | |

## COMBIDISC® sanding sheet, zirconia alumina Z

**CD**
**Design:** Resin-bonded zirconia alumina grain (Z) on tear-resistant, thick, fabric backing, evenly and slightly loose. Excellent grit friction, long life, and good flexibility.

**Application:** For sanding high-temperature materials like nickel and cobalt alloys as well as stainless steel.

**Note:** Here we recommend the use of hard or medium-hard sheet holders for optimum application.

## COMBIDISC® sanding sheet, ceramic grain CO-COOL

**CD**
**Design:** Abrasive ceramic grain (CO-COOL). High-powered grinding with highest removal performance. Grinding-activated additives in the surface give a clear, visible improvement in removal, prevents clogging and makes for cooler grinding.

**Application:** Suitable for grinding alloyed and non-alloyed steel, cast iron and hard metal laminates.

## COMBIDISC® fleece disc, hard design

NEW

**CD**
**Design:** Resin-bonded hard fleece with aluminium oxide grain (A). With excellent grit friction, very open structure, long life, and very good flexibility.

**Application:** For surface treatment of metals. Elimination of pre-grinding marks, removal of oxidation and light deburring work. The addition of oil or water when grinding gives even finer surfaces, cooler grinding and longer life. The disc's flexibility for surface grinding is determined by the holder's degree of hardness.

PFERD

## COMBIDISC® fleece disc, soft design

**CD**
**Design:** Resin-bonded soft fleece with aluminium oxide grain (A). With excellent grit friction, very open structure, long life, and very good flexibility.

**Application:** For sanding finishes on flat surfaces, contours and for cleaning work on metal and paint. On grinding the addition of oil or water gives even finer surfaces, cooler grinding and longer life. The discs' flexibilty for surface grinding will be determined by the holder's degree of hardness.

## COMBIDISC®-POLICLEAN® disc

**CD**
**Design:** POLICLEAN® discs are coarse-structured cleaning fleeces, made from a special combination of synthetic fibre and abrasive grain.

**Application:** For coarse cleaning work, for removal of paint, scale, discolouration, rust and glue residue in surface grinding.

**Note:** We recommend hard or medium-hard sanding sheet holders for optimum application.

## ROLOC™-quick release system

Ideal for frequently changing tasks.
ROLOC™ is a fast repair system for smaller or small-area repairs.

The necessary abrasive can be easily changed by simply rotating. The wide range of abrasives covers almost every application from deburring to grinding to finishing. For quick and safe selection of the right grain all ROLOC™ grinding wheels are colour-coded.

## ROLOC™ backing pad

**Design:** Fits ROLOC™-grinding wheels.

**Note:** Backing pad ∅ 25.4 mm and 38.1 mm only for compact discs (Order Nos. 8242 8005–8010 and 8243 8005–8025), for edging and profiling.

## ROLOC™ grinding wheel Cubitron™

**777F**
**Design:** Resin-bonded Cubitron™/aluminium oxide grain mix on hard Y-polyester fabric, half-closed scattering, waterproof. With cooling grinding aid for outstanding life and to avoid heat discolouration on the work surface.

**Application:** Best suited for working on stainless steel with medium pressure, as well as high-alloy steel with low thermal conductivity, aluminium and titanium.

**Note:** ROLOC™ backing pad see (Order No. 8245)
Detailed information about Cubitron™ is found on 📖 8/31.

## ROLOC™ cleaning disc

**Scotch-Brite™ BF-DR**
**Design:** Nylon fibre fleece with resin-bonded silicon carbide. The durable fleece ensures longer life and edge stability and minimises damage to the underside loops. The coarse fleece fibre construction ensures longer life even with coarse-grinding uses.

**Application:** Ideal for deburring corrosion, old coatings, sealant residue, tarnish and colours on sheet metal as well as cleaning metal surfaces and weld seams. Cleaning and deburring with a perfect finish in one operation.

**Note:** ROLOC™ backing pad see (Order No. 8245)

## ROLOC™ high-performance cleaning abrasive bristle disc

**Scotch-Brite™ RD-ZB**
**Design:** Plastic brush with interspersed Cubitron™ abrasive grain. Mould-cast for long life and consistent material removal. No clogging, minimal contact pressure.

**Application:** Especially suited for easy and simple removal of paints, residues, glue, discolouration, rust, thick oxide film and other surface sediment.

**Note:** The ROLOC™ backing pad with M14 thread makes use on all standard hand-held angle grinders possible, see (Order No. 8245). Detailed information about Cubitron™ is found on 8/31.

## Abrasive mop discs for battery-powered devices

NEW

**SMT 524 AC ACCU**
**Design:** Zirconia alumina layers (ZA). Aggressive design, resin-bonded, high strength with a **12° curved** fibre glass disc attached. **Not made with iron, sulphur and chlorine additives.** Standard bore 22.23 mm.

**Application:** Universal product for steel and stainless steel work. Ideal for edges and weld seams thanks to the curvature.

**Note:** Detailed information about battery-powered tools is found on page 8/67.

## POLIFAN® flap grinding wheels, aluminium oxide COOL

**SG A-COOL**
**Design:** With aluminium oxide layers (A) and coolant. Tough design, resin-bonded, high strength with fibreglass discs attached. **Not made with iron, sulphur and chlorine fillers.** Standard bore 22.23 mm.

**Application:** Special product for steel, stainless steel, aluminium and non-ferrous metal work. **With specially cool cut due to the cooling coating.** A cooler cut is achieved even with minimal pressure on adjustable angle grinders. So particularly suited for work on sheet metal and thin-walled sections.

**8294** **Ø 115 mm, straight**

## POLIFAN® flap grinding wheels, zirconia alumina STRONG

**SGP ZIRKON STRONG**
**Design:** With zirconia alumina layers (Z), consistent tough design, resin-bonded, high strength with fibreglass discs attached. This gives maximum residue removal rate and extremely long life. **Not made with iron, sulphur and chlorine fillers.** Standard bore 22.23 mm.

**Application:** Special product for steel work.
**Grain size 36** is optimum for coarse steel work, for example weld seam processing. **Grain size 50** is optimum for edging work, for example chamfering, deburring. The high performance zirconia alumina cutting surface has the best impact on high-powered angle grinders.

## POLIFAN® flap grinding wheels, ceramic grain STRONG

**SGP STRONG FREEZE**
**Design:** With ceramic grain layers (CO) and coolant. Consistent tough design, resin-bonded, high strength with fibreglass discs attached. The highly effective fillers form a shiny film on the cooling layers, thus enabling **up to 30% cooler grinding,** maximum residue removal rate and extremely long life. **Not made with iron, sulphur and chlorine additives. Low vibration, noise and dust.**
Standard bore 22.23 mm.

**Application:** Special product for processing poor heat conducting materials, such as stainless steel. Specially suited to edges and weld seam working.

## Flap grinding wheel Cubitron™ II

**967A**
**Design:** Precision formed ceramic grain (Cubitron™ II), in high-strength synthetic resin bonding connected to the curved fibreglass disc. The individual grains of the ceramic Cubitron™ II abrasives are small, precisely-shaped triangles, perpendicular in arrangement, and uniform in size. Tough grinding with highest removal rate, with up to **30% faster removal.** Grinding-activated additives prevent clogging and make for cooler grinding. Standard bore 22.23 mm.

**Application:** In all metal-working industries, where high removal rates combined with very good surface finishes need to be achieved.

3M CUBITRON II

## Angle grinder mop

**WSM 617**
**Design:** With aluminium oxide layers (A) in resin bond. With M14 connection thread. The fan-shaped radial layout is outstanding and particularly adapted to the contours of the workpiece.

**Application:** For working with steel, stainless steel, colours, synthetics and wood **with angle grinders.** Especially for deburring, whereby edges can be rounded. No secondary burr is formed. Also outstanding for deburring surface laminates. As a rule, second sanding is omitted prior to re-coating.

## Fleece flap wheels

**Scotch-Brite™ SC-FD**
**Design:** With aluminium oxide fleece segments (A). Because the layers have been directly applied to a fibreglass underlay they can be used on angle grinders without additional backing pads.

**Application:** The discs deliver the best results on steel, stainless steel, aluminium and non-ferrous metals. For de-rusting and cleaning on flat metal parts, surface preparation for laminates and paints as well as for creating a decorative finish.

## Coarse cleaning discs with fibreglass underlay

**Scotch-Brite™ XT-RD**
**Design:** Resin-bonded Nylon-fibre fleece with silicon carbide grain on reinforced fibreglass underlay. The powerful XT Clean & Strip design enables highest service life for all applications Standard bore 22.23 mm.

**Application:** For use on angle grinders without backing pads. For cleaning weld seams and all stubborn stains, free from corrosive metals, replaces wire brushes and other cleaning tools. Removes light scale, paint, varnish and rust.

## POLINOX® compact grinding wheel

**CC-PNER**
**Design:** Multi-layer pressed fleece in special grain-resin bond on a fibreglass pad. High residue removal and good service life with good surface quality. Standard bore 22.23 mm.

**Application:** For use in surface grinding with variable speed angle grinders. Especially suited for working on large, stainless steel surfaces. Optimum cutting speed 35 m/s.

## Coarse cleaning discs

**Design:** Resin-bonded nylon fibre fleece with silicon-carbide grain, extra coarse. Open, flexible weave prevents the coarse-cleaning disc clogging. Bore 13 mm.

**Application:** For use on straight grinders and flexible axles. For efficient removal of rust, corrosion, old laminates and discolouration, cleaning of metal surfaces and weld seams. For use with mandrel (Order No. 8336).

**8333** **Scotch-Brite™ XT-RD**
Reinforced fibre fleece for longest life, purple.

**8335** **CG-DC**
Adapted to especially flexible workpieces, with long life span, blue.

## High-performance Cleaning Abrasive Bristle disc

**Scotch-Brite™ BD-ZB**
**Design:** Plastic brush with interspersed Cubitron™ abrasive grain. Mould-cast for long life and consistent material removal. No clogging, minimal contact pressure. With M14 connection thread and reinforced back for use on angle grinders without extra backing pads.

**Application:** Universal disc for quick and easy deburring of colour, glue, residue, rust and other surface cleaning. The disc needs only minimal pressure and ensures an efficient result without damaging the surface.

**Note**: Detailed information about Cubitron™ is found on page 8/31.

**Ø 115 mm**

(W849)

## Application tip for abrasive caps

- When removing and refitting the abrasive cap a slight right turn should be made.
- Changing is easier when the abrasive cap is clamped in the drive machine.
- Abrasive caps perform best at cutting speeds of 10–20 m/s.
- **The maximum peripheral speed is 25 m/s.**
- **The specified maximum speed should not be exceeded for safety reasons.**

## POLIROLL® grinding roll

NEW

PFERD

**Design:** Resin-bonded aluminium oxide grain (A) on a spiral-shaped wound fabric carrier. Fresh grain is used in successive layers as the outer coated abrasive wears off. With very good machining performance. Always grind with the tip and not the surface, otherwise the bond can become damaged by the heat.

**Application:** For steel and casting. For processing drill holes, fillet weld seams and deburring work on cast parts.

| Order No. | Ø x height mm | 8410 PFERD K 80 | 8411 PFERD K 150 | PU |
|---|---|---|---|---|
| 0635 | 6 x 35 | 0.81 | 0.81 | 50 |

## Flap wheels, ceramic

NEW

PFERD

**Design:** Resin-bonded ceramic sprinkling (CO-COOL). Extremely powerful cutting ability is effective at high pressure and provides excellent material removal. **Cooler cutting, non-clogging of tools** Highest residue removal with longer life span. With 6-mm claw shaft.

**Application:** For aluminium, steel and INOX. For tough grinding with maximum removal on hard, tough and poor heat conducting materials.

**8374** Recommended rpm 7000 min$^{-1}$, maximum rpm 15200 min$^{-1}$.

**8375** Recommended rpm 6300 min$^{-1}$, maximum rpm 12700 min$^{-1}$.

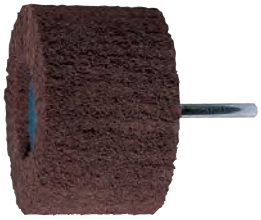
With POLINOX® fine honing tools almost all materials can be machined. The tools are mainly used to achieve special surface effects and for cleaning.

**Application:** For matt- and satin-finishing of metal, for cleaning oxidised non-ferrous metals, for seamless blending of rust-free steels, for roughening synthetics in preparation for glue as well as surface adjustment of welded joints.

## POLINOX® Non-woven flap brush

**PNL**
**Design:** Fleece with aluminium oxide grain (A). The abrasive fleece is arranged in radial layers The layers are very densely packed, for the longest possible life. With 6-mm claw shaft.

**Application:** For ordinary steel, stainless steel, aluminium and synthetics work. Ideal for work on flat surfaces.



**8440** Recommended rpm 7500 min$^{-1}$, maximum rpm 15000 min$^{-1}$.

## Non-woven polishing mop wheels

**NCW 600**

**100 x 100 mm**
**Design:** Abrasive fabric of aluminium oxide (A) grain-fleece combination. **Hole ∅ 19 mm.**

**Application:** For a very fine ground finish in metal and stainless steel work. Also suitable for synthetics. For use with all popular burnishing machines.

| Order No. | Aluminium | Steel | Carbide | INOX | Cast | Plastic FRP wood | Stone | Paint |

## Non-woven wheel

**NFW 600**

**100 x 100 mm**
**Design:** Fleece with aluminium oxide grain (A). **Hole ∅ 19 mm.**

**Application:** Especially suited to matt and satin finishing and for end-cutting metal. For use with all popular burnishing machines.

| Order No. | Aluminium | Steel | Carbide | INOX | Cast | Plastic FRP wood | Stone | Paint |

## Cordless is best

Last year, battery running times and the performance of devices made huge progress. This makes them increasingly interesting to users. Devices without electrical connection have since become indispensable, especially in the building trade and for sanitary and heating installation and for use by janitors, fire brigades, emergency services and other mobile helpers. In order to work flexibly and cordlessly, the right tool is required alongside a high-performance device. Tools for conventional, power-operated devices are only suitable to some extent for cutting, roughing, grinding, brushing, cleaning, polishing or satin-finish.

They are too heavy and often not suitable for several applications in one work step. Users won't get far without a specially developed tool in mobile application, where speed and precision are crucial. The performance of the batteries is impaired due to conventional tools, the battery power is quickly depleted and has to be charged repeatedly. In addition, the tool change between different application consumes valuable time.

In order to prevent this, we have added a range of respective tools to our range, which ensure flexibility in application, low weight, easy handling and maximum precision to allow you to get the most from your battery powered device.

**Your advantages at a glance:**
- Low weight
- Precise working
- Flexible application
- Easy handling
- Low in vibration and smooth running
- Increase in battery power (more than 30 %)
- Less charging cycles

**8800** 8/13

**8801** 8/7

**8802** 8/45

The optimal coordination of the bond to the used grain type ensures higher abrasive action, thus allowing faster separation and removal of material. In turn, shorter processing times allow longer work with one battery charge.

With only 2 mm, the grinding disk has an extremely low design, which saves additional weight.

**8804** 8/17

Due to the turbo edge, the diamond cutting disk has a particularly aggressive cut and was optimised in weight. It is suitable for universal use.

**8805** 7/4

**8806** 7/4

**8807** 7/4

Brushes with silicon-carbide threads are universally applicable, lighter than steel wire brushes (up to 60% weight reduction), exhibit less risk of breaking and flexibly adapt to the surface. In addition, the brushes, polishing and satin-finishing disks for battery-operated devices are characterised by a lighter casing construction. All these factors contribute to a longer battery operating time.

**8808** 8/89

**8809** 8/89

**8810** 8/89

## Tungsten carbide burr (rotor-cutter) DIN 8032/8033 – 6 mm shaft ∅

**Application recommendations:**

- Use high turning speeds, if possible. Please observe our turning/cutting speed recommendations. With stationary use or countersunk jobs with 360°-wraps, this burr can be used at speeds below 3000 min$^{-1}$ as an exception.
- Only use with rigid clamping systems/drives; tool beat and rattle leads to premature wear.
- The contact surface of the burr to the workpiece should not exceed one third of the circumference during processing. An excessively large wrap angle of > 1/3 leads to uneven milling behaviour. This leads to tooth breakage.
- For poor heat conductors such as stainless steel, titanium alloys etc., we recommend a significant reduction in turning speed to avoid damaging the tool. Blue staining to the shank and tool should be avoided.
- For heavily lubricating materials it is sensible to use lubricants (grease, petroleum, chalk or other) to prevent the tooth system clogging.

**Carbide burrs can generally be reground. Re-grinding of small and miniature burrs is not advisable due to economic reasons.**

**Tooth system C/3 PLUS (according to DIN MX)**

**Tooth system 3 (according to DIN MY)**

**Tooth system 4 (according to DIN MX)**

**Tooth system 5 (according to DIN F)**

**Aluminium tooth system**

**Tooth system Special Alu**

**Tooth system INOX Reduced vibration and less noise**

**Tooth system STEEL 50 % higher cutting performance compared to conventional cross cutters**

| Material groups | | | Processing | Tooth system | Cutting speed |
|---|---|---|---|---|---|
| Steel, cast steel | Unhardened, non-tempered steels up to 1200 N/mm² (< 38 HRC) | Construction steels, carbon steels, tool steels, unalloyed steels, case-hardened steels, cast steel | Coarse machining = more material removal | 3 | 450– 600 m/min |
| | | | | C/3 PLUS | |
| | | | Fine machining = less material removal | 3 | 500– 600 m/min |
| | Hardened, tempered steels above 1200 N/mm² (> 38 HRC) | Tool steels, tempering steels, alloyed steels, cast steel | Coarse machining = more material removal | 3 | 250– 350 m/min |
| | | | | C/3 PLUS | |
| | | | | 4 | |
| | | | Fine machining = less material removal | 5 | 350– 450 m/min |
| | | | Coarse machining = more material removal | STEEL | 450– 750 m/min |
| Stainless steel INOX | Rust and acid resistant steels | Austenitic and ferritic stainless steels | Coarse machining = more material removal | 3 | 250– 350 m/min |
| | | | | C/3 PLUS | |
| | | | | 4 | |
| | | | | INOX | 450– 600 m/min |
| | | | Fine machining = less material removal | 5 | 350– 450 m/min |
| Non-ferrous metals | Soft NF metals, NF metals | Alu alloys, brass, copper, zinc | Coarse machining = more material removal | Alu | 600–1100 m/min |
| | | | | Special Alu | 400– 500 m/min |
| | | | Fine machining = less material removal | Alu | 800–1100 m/min |
| | Hard NF metals | Bronze, titanium/titanium alloys, hard Alu alloys (higher Si content) | Coarse machining = more material removal | 3 | 250– 350 m/min |
| | | | | 4 | |
| | | | Fine machining = less material removal | 3 | 350– 450 m/min |
| | | | Coarse machining = more material removal | Alu | 600–1150 m/min |
| | | | | Special Alu | 400– 500 m/min |
| | | | Fine machining = less material removal | Alu | 900–1100 m/min |
| | Heat-resistant materials | Nickel-based and cobalt-based alloys (engine and turbine construction) | Coarse machining = more material removal | C/3 PLUS | 300– 450 m/min |
| | | | | 4 | |
| | | | Fine machining = less material removal | 5 | 350– 500 m/min |
| Cast iron | grey cast iron, white cast iron | Cast iron with lamellar graphite EN-GJL (GG), with nodular graphite/ductile iron EN-GJS (GGS), white malleable EN-GJMVV (GTW), black malleable EN-GJMB (GTS) | Coarse machining = more material removal | 3 | 450– 600 m/min |
| | | | | C/3 PLUS | |
| | | | Fine machining = less material removal | 3 | 500– 600 m/min |
| Synthetics, other materials | Fibre-reinforced plastics (GFP/CFP), thermoplastic synthetics, hard rubber | | Coarse machining = more material removal | Alu | 500–1100 m/min |
| | | | | Special Alu | 500– 900 m/min |
| | | | Fine machining = less material removal | Alu | 500–1100 m/min |

**Safety recommendations:**

**Please observe the recommended revolutions!**

**Example:**
HM burr, tooth system 3 PLUS, ∅ 12 mm. Coarse machining of non-hardened, non-tempered steels. Cutting speed: 450–600 m/min.
**Revolution range: 12000–16000 min-1.**

HM burr, tooth system alu, ∅ 12 mm. Coarse machining of hard NF metals.
Cutting speed: 600–1100 m/min.
**Revolution range: 16000–30000 min-1.**

| | Cutting speeds m/min | | | | | | | |

## HSS burr

**Application recommendations:**

1. HSS burrs, thanks to their special tooth geometry and high production quality, particularly suitable for deburring, chamfering, cast-iron fettling and processing aluminium. They can also be used cost-effectively with low-power machines in the low turning rate range.
2. HSS burrs should be used with low-revolution machines, compared to hard-metal burrs.
3. They are not available for applications where there are high revolution rates.
4. The toughness of high-speed steel (HSS) provides greater stability of tooth cutting.

PFERD

**Tooth system 1 without chip deflector.**

**Tooth system 3 with chip deflector.**

**Tooth system 5 without chip deflector.**

**Observe safety recommendations:**

**Please observe the recommended revolutions!**

| Material groups | | | Processing | Tooth system | Cutting speed |
|---|---|---|---|---|---|
| Steel, cast steel | Uncured, non-tempered steel up to 1200 N/mm² (< 38 HRC) | Construction steels, carbon steels, tool steels, unalloyed steels, case-hardened steels, cast steel | Coarse machining = more material removal | 3 | 60– 80 m/min |
| | | | Fine machining = lower material removal | 3 | 80–100 m/min |
| | | | | 5 | 60– 80 m/min |
| Stainless steel INOX | Rust and acid-resistant steels | austenitic and ferritic stainless steels | Coarse machining = more material removal | 1 | 60– 80 m/min |
| | | | Fine machining = lower material removal | 1 | 80–100 m/min |
| Non-ferrous metals | Soft NF metals | Alu alloys, brass, copper, zinc | Coarse machining = more material removal | 1 | 200–300 m/min |
| | | | Fine machining = lower material removal | | |
| Cast iron | Grey cast iron, white cast iron | Cast iron with lamellar graphite EN-GJL (GG), with nodular graphite/ductile iron EN-GJS (GGS), white malleable EN-GJMVV (GTW), black malleable EN-GJMB (GTS) | Coarse machining = more material removal | 3 | 60– 80 m/min |
| | | | Fine machining = lower material removal | 3 | 80–100 m/min |
| | | | | 5 | 80–100 m/min |
| Synthetics, other materials | Fibre-reinforced, thermoplastic and duro-plastic synthetics, hard rubber, wood | | Coarse machining = more material removal | 1 | 200–300 m/min |
| | | | Fine machining = lower material removal | 1 | 250–300 m/min |

| | Cutting speeds m/min | | | | | |
|---|---|---|---|---|---|---|
| | 60 | 80 | 100 | 200 | 250 | 300 |
| Burr ∅ mm | Revolutions $min^{-1}$ | | | | | |
| 2,3 | 8400 | 11100 | 13900 | 27700 | 34600 | 41600 |
| 3,2 | 6000 | 8000 | 10000 | 19900 | 24900 | 29900 |
| 4 | 4800 | 6400 | 8000 | 16000 | 19900 | 23900 |
| 5 | 3900 | 5100 | 6400 | 12800 | 16000 | 19100 |
| 6 | 3200 | 4300 | 5400 | 10700 | 13300 | 16000 |
| 7 | 2800 | 3700 | 4600 | 9100 | 11400 | 13700 |
| 8 | 2400 | 3200 | 4000 | 8000 | 10000 | 12000 |
| 10 | 2000 | 2600 | 3200 | 6400 | 8000 | 9600 |
| 12 | 1600 | 2200 | 2700 | 5400 | 6700 | 8000 |
| 14 | 1400 | 1900 | 2300 | 4600 | 5700 | 6900 |
| 16 | 1200 | 1600 | 2000 | 4000 | 5000 | 6000 |

**Example:**
HM burr, tooth system 1, ∅ 12 mm. Coarse machining of soft NF metals. Cutting speed: 200–300 m/min.
**Revolution range: 5400–8000 $min^{-1}$.**

## Diamond mounted point

**Design:** Especially suited to quick removal on galvanised coatings. Universal grain: D 126 – medium (to FEPA standard).

**Application:** For tool and production grinding of hard materials such as tungsten carbide, ceramics - pre- and finish sintered - glass as well as some non-ferrous metals.

**Note:** To avoid fringe heat damage to the workpiece and to increase the life of the tool we recommend the use of coolant lubricants.

## Polishing ring for battery-powered devices

NEW

**Design:** Made of crimped cloth, M14 x 2.0 thread.

**Note**: Detailed information about battery-powered tools is found on page 8/67.

**8808** **Sisal**
For pre-polishing and removing defects and scratches. We recommend the use of white polishing paste (Order No. 8811 0005) for steel and stainless steel and brown polishing paste (Order No. 8811 0010) for brass.

**8809** **Notiflex Soft**
For buffing and producing a high-shine surface. We recommend the use of blue polishing paste (Order No. 8811 0015) for steel, stainless steel, brass, copper and aluminium.

8808

## Finishing and deburring discs

**Design:** Twisted-fibre fleece disc with resin-bonded silicon carbide.

**8016 0005** **Scotch-Brite™ FS-WL**
Open weave for a smooth surface without chatter marks.
For achieving distinctive line effects and deburring light grooves on stainless steel profiling and for almost all other **finishing work.**

**8016 0010** **Scotch-Brite™ DB-WL**
Solid construction for higher edge resistance, grit performance and life.
Universally used for **deburring.** Easy for working with contoured workpieces.

**8019** **Scotch-Brite™ XP-WL**
Very strong construction for very high edge strength, cutting performance and service life.
Universally used for **deburring.** Easy for working with contoured workpieces.

## Hand pads

**Design:** With a plastic handle in 4 different colours. Total length 125 mm, pad size 60 x 20 x 10 mm.

**Application:** For cleaning cutting edges, to remove build-up on edges and to extend the tool's life. The cutting edges are drawn off at an angle of 25 ° to 40 °. Ideal for lapping chamfers on free- and angle-ground surfaces, for breaking hard metal and HSS cutting edges after cutting and for re-lapping cutting inserts, punching tools, milling tools, cutter heads, reamers etc.

## Short description for cable qualities

H 05 V V -F 3 G 1.5
1 2 3 4 5 6 7 8

**1 Regulation**
**H** = harmonised line
**A** = nationally approved line

**2 Nominal voltage V**
**03** = 300/300 V
**05** = 300/500 V
**07** = 450/750 V

**3 Insulation sleeves**
**V** = PVC
**R** = natural or synthetic rubber
**S** = silicon rubber
**B** = synthetic rubber

**4 Sheaves**
**V** = PVC
**R** = natural or synthetic rubber
**N** = neoprene rubber
**J** = glass fibre braid
**T** = textile braid
**Q** = polyurethane

**5 Conductor type**
**U** = round, 1-strand conductor
**R** = round, multi-strand conductor
**K** = fine wired for fixed installation
**F** = fine wired for moving lines
**F** = finest wired for moving lines
**Y** = Lan stranded conductor

**6 Number of strands**

**7 Protective conductor**
**G** = with green/yellow strand
**X** = without green/yellow strand

**8 Conductor cross-section**

## Cable box, plastic

**Design:** Robust model **made from impact-proof, special plastic with 4 grounded sockets** and overheating protection. The sockets are equipped with child protection. Furthermore, the cable box offers good stability with its firm double legs and has an ergonomically shaped handle.

**Application:** For use indoors.

## Cable drum, sheet steel with FI plug

**Design:** Very robust model of corrosion-proof, galvanised sheet steel and stable supporting frame **with 3 grounded sockets,** splash-proof and self-closing lids. The cable drum is equipped with overheating protection. The control lamp reacts to overheating and overloading. The cable is approved for severe conditions in line with VDE 0100 Part 704. Due to the **additional rotary contact technology**, the cable drum rotates without the socket unit; this prevents the connected cable from twisting. In addition, this cable drum is equipped with a **FI plug 30 mA as protection against electrocution**. The **cable guide on the handle** allows safe winding and unwinding.

**Application:** For indoor and outdoor use.

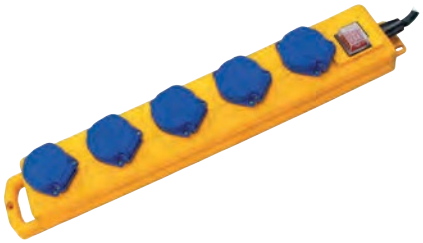
## Power strip

IP 44

**Design:** Particularly robust model made of high-quality, impact-resistant and unbreakable plastic with large, wide contact surface. The sockets have larger distances, are provided in a practical 45° arrangement and have a sealing ring. Furthermore, the power strip has an illuminated on/off switch and a sturdy bracket for hanging or attaching.

**Application:** Suitable for use indoors, outdoors, and on industrial construction sites.

**9013 0005** **5 grounded sockets** with splash-proof and self-closing lids.



**9013 0005**

**9013 0010** **5 grounded sockets** with splash-proof and self-closing lids and **FI plug 30 mA as protection against electrocution accidents.**

| 0015 | Li-Ion | 39.00 (W523) | 5000 | 3.7 | 240 |

## Car charger MidgetPLUS

NEW

SKROSS ADAPT TO THE WORLD

**Design:** An additional device can be charged simultaneously using the extra USB port.

**Application:** USB charger for the car, motorbike, HGV, camper van and boat.

| Order No. | Type of connector | 9024 SKROSS | Output voltage V | Input voltage V | Cable length m |
|---|---|---|---|---|---|
| 0020 | Micro USB | 13.00 | 5 | 16 | 1.2 |
| 0025 | Lightning Connector | 24.00 (W523) | 5 | 16 | 1.2 |

## Travel adapter PRO

NEW

SKROSS ADAPT TO THE WORLD

**Design:** Compact 3-pin world travel adapter; connects devices from all countries with a standard safety socket, e.g. Germany, France, Belgium and Egypt.

**Application:** Suitable for all grounded and non-grounded devices (2- and 3-pin), plug socket for Europe (safety plug and 2-pin European plug), sliding plug: Italy/Switzerland, Australia/China, UK, USA.

| Order No. | Input voltage V | 9024 SKROSS |
|---|---|---|
| 0000 | 100–250 | 22.00 (W523) |

## ATEX torches

In potentially explosive areas appropriately protected lamps must be used in order not to trigger an explosion, for example, from the spark when turning on the lamp.

Therefore the ATEX directives define the following zones:

**Zone 2:** Areas where there is **rarely and briefly** a risk of explosion.

**Zone 1:** Areas, in which there is **occasionally** a risk of explosion.

**Zone 0:** Areas, in which there is a risk of explosion **continually or frequently and over a long time period**.

On each torch there should be a code, which provides information about the application area:

| | |
|---|---|
| **II** | Devices in group II may not be used in mining. |
| **1/2/3** | Specifies the category, this **corresponds to the zone +1.** |
| **G/D** | Suitable for gases/vapours (G) or dust (D). |
| **Ex** | For use in potentially explosive areas. |
| **ia/ib** | Protection class intrinsic safety. |
| **e** | Ignition protection: increased safety. |
| **IIx** | Gas group (IIA = propane, IIB = ethylene, IIC = acetylene/hydrogen). |
| **IIIx** | Dust group (IIIA = combustible suspended matter, IIIB = non-conductive dust, IIIC = conductive dust). |
| **Tx** | Temperature class, specifies the maximum allowable surface temperature. (T6 = 85 °C, T5 = 100 °C, T4 = 135 °C, T3 = 200 °C, T2 = 300 °C, T1 = 450 °C) |

## LED torch PX2

**Design:** Certified gas-, dust- and waterproof safety lamp made of highly resilient and impact-resistant polycarbonate with clip, non-conductive. The rubberised rear switch for single-hand operation is hermetically sealed against the penetration of water and dust. There is also protection against short circuit and incorrectly inserted batteries. ATEX Zone 1, certified, II 2G Ex ib e IIB T4 Gb, working temperature -20 °C to +40 °C. Delivery with 2 micro batteries AAA/LR03.

## LED lamps from the Q and V ranges

Hyperfocus™ for steplessly adjustable light beam from floodlight to spotlight.
The various light modes are controlled using ILC (Intelligent Light Control).
**Boost** = Maximum output, depending on battery and LED
**Dimmer** = Dims your light to the desired effect.
**High** = Bright lighting for long-term use
**Medium** = Medium output, medium longevity
**Memory** = Remembers the last light setting
**Low** = Long-lasting low lighting
**SOS** = SOS function
**Stroboscope function** = Blinking strobe light, frequency 10 Hz

## LED torch Q series

**Design:** Made of anodised aluminium, splash-proof. With gold-coated contacts.
Working temperature from -20 °C to +50 °C.

## Small propane bottle

**Design:** Welded, valve with pressure relief and cap, connection G 3/8" anti-clockwise, can be refilled, base with type approval (§ 14 of the Die Casting Regulation, 82 D 168 B), hanging hook.

**Note:** This small propane gas cylinder may only be equipped with a suitable micro-propane cylinder valve with overpressure protection.

| Order No. | Design | 9061 GCE propaline |
|---|---|---|
| 0011 | Small bottle, 425 g | on request |
| 0031 | Small cylinder valve with overpressure relief valve | on request |
| 0041 | SMall regulator, 1.5 bar fixed | on request |
| | | (999) |

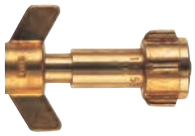
## Propane filling arm

**Design:** Solid brass, connection according to DIN 477, with certification mark 01 D 65 B, with guide pin and wing nut G 3/8" anti-clockwise.

**Application:** For connecting to the small propane cylinder with cylinder valve.

| Order No. | For bottles kg | 9064 GCE propaline | Connection type |
|---|---|---|---|
| 0011 | 5–11 | on request | Profile nut W 21.8 mm x 1/14" anti-clockwise, with guide pin |
| 0031 | 5–33 | on request | Hexagon nut W 21.8 x 1/14" anti-clockwise |
| | | (999) | |



9064 0011

9064 0031

## Propane soft-soldering iron

**Design:** Hammer shape, offset, with fine-regulating spindle. Thanks to the ideally designed air rotary valve, you can adjust an extremely soft and small flame. With wind guard and copper piece 350 g.

GCE propaline Security in action

| Order No. | Gas pressure bar | 9065 GCE propaline | Gas consumption g/h | Hose connection |
|---|---|---|---|---|
| 0010 | 1.5 | on request | max. 65 | G 3/8" anti-clockwise |
| | | (999) | | |

## Propane handle

**Design:** Good insulating, ergonomic wood handle with finely regulating spindle for adjusting gas made of stainless steel, rotary air vane. In addition, the flame adjustment can be regulated, and the tube connection rotated in the respective position.

GCE propaline Security in action

| Order No. | Gas pressure bar | 9067 GCE propaline | Gas consumption g/h | Hose connection | Connection for torch heads |
|---|---|---|---|---|---|
| 0011 | 1.5 | on request | max. 65 | G 3/8" anti-clockwise | M15 x 1 internal |
| | | (999) | | | |

## Propane soldering insert

**Design:** Torch nozzle 4.5 mm with screwed piston holder, stainless steel mouthpiece and handing hook.

| Order No. | Gas pressure bar | 9070 GCE propaline | Gas consumption g/h | Handle component connection |
|---|---|---|---|---|
| 0011 | 1.5 | on request (999) | max. 65 | M15 x 1 outside |

## Copper piece

**Design:** With steel pin ∅ 7 mm.

| Order No. | Design | 9076 GCE propaline | Pin length mm | Weight g |
|---|---|---|---|---|
| 0011 | Hammer shape, offset | on request | 90 | 350 |
| 0021 | Hammer shape, offset | on request | 90 | 500 |
| 0031 | Hammer shape, straight | on request (999) | 90 | 250 |

## Wind guard

**Design:** With locking screw. Suitable for all copper pieces with steel pin ∅ 7 mm.

| Order No. | 9073 GCE propaline |
|---|---|
| 0011 | on request (999) |

## Propane spot torch soldering

**Design:** Model made of brass, bent 40°, with removable steel mouthpiece. Suitable for (Order No. 9067 0011).

**Application:** For brazing work, e.g. with silver solder L-Ag 40 on copper pipe.

| Order No. | ∅ mm | 9079 GCE propaline | Gas pressure bar | Performance kW/h | Gas consumption g/h | For copper pipes ∅ mm | Handle component connection |
|---|---|---|---|---|---|---|---|

| 0071 | 7 | on request (999) | 1.5 | 2.58 | max. 200 | 22 x 1 | M15 x 1 outside |

## Hard- and soft-soldering set

**Design:** Supplied in sheet steel case with carry handle.

**9085 0005** **For brazing and heating.**

**9085 0011** **For soft- and hard-soldering, as well as for heating.**

| Order No. | Design | 9085 GCE propaline | Set contents |
|---|---|---|---|
| 0005 | 9 pcs | on request | 1 handle<br>4 turbo burners ∅ 12; 14; 17 and 20 mm (9094)<br>1 high pressure hose 2 m, G 3/8" anti-clockwise (9112 0021)<br>1 small knob 2.0 bar fixed, for 5 and 11 kg bottles<br>1 gas lighter (9199)<br>1 fork wrench |
| 0011 | 11 pcs | on request (999) | 1 soldering iron with handle, soldering inserts with piston holder (9088 0011)<br>1 wind guard (9073 0011)<br>1 copper piece 350 g, hammer shape offset (9076 0011)<br>4 turbo burners ∅ 12; 14; 17 and 20 mm (9094)<br>1 high pressure hose 2 m, G 3/8" anti-clockwise (9112 0021)<br>1 small knob 2.0 bar fixed, for 5 and 11 kg bottles<br>1 gas lighter (9199)<br>1 fork wrench |

9085 0005

9085 0011

## Propane torch handle universal

**Design:** Robust, well-insulated plastic handle in block shape, with long torque lever, pre-settable pilot flame and combined main shut-off and control valve.

**Application:** For soft and hard soldering, heating, burning, shrinking and lots more.

| Order No. | Gas pressure bar | 9088 | Gas consumption g/h | Hose connection | Connection for torch heads |
|---|---|---|---|---|---|
| 0011 | 0–4 | on request (999) | max. 12000 | G 3/8" anti-clockwise | M14 x 1 outside |

## Propane spot torch soldering

**Design:** Model made of brass, with union nut and removable, chrome-plated stainless steel mouthpiece, for max. 4 bar overpressure. The flame is pointed focused and the air automatically sucked in.

**Application:** For hard and soft soldering work.

| Order No. | Ø mm | 9091 | Gas pressure bar | Performance kW/h | Gas consumption at P = 1.5 bar g/h | For copper pipes Ø mm | Handle component connection |
|---|---|---|---|---|---|---|---|
| 0052 | 5 | on request (999) | 1.5–2.5 | 1.55 | 120 | 12 x 1 | M14 x 1 internal |

## Propane turbo hard soldering insert

**Design:** Model made of brass, with vortex torch head, union nut and screw-off, chromed stainless steel mouthpiece, for max. 2.5 bar overpressure. The air is automatically sucked in.

**Application:** Especially for brazing of copper pipes.

| Order No. | Ø mm | 9094 | Gas pressure bar | Performance at P = 1.5 bar kW/h | Gas consumption at P = 1.5 bar g/h | For copper pipes Ø mm | Handle component connection |
|---|---|---|---|---|---|---|---|
| 0013 | 12 | on request | 1.5–2.0 | 1.93 | 150 | 12 | M14 x 1 internal |
| 0015 | 14 | on request | 1.5–2.0 | 3.22 | 250 | 18 | M14 x 1 internal |
| 0018 | 17 | on request | 1.5–2.0 | 4.06 | 315 | 22 | M14 x 1 internal |
| 0021 | 20 | on request (999) | 1.5–2.0 | 5.66 | 440 | 28 | M14 x 1 internal |

## Propane torch head wide

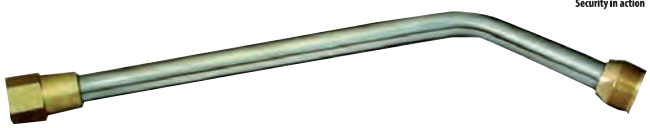
**Design:** Model made of brass, with chromed stainless steel mouthpiece and union nut.

**Application:** For processing plastic foils or laying panels. Especially good for removing layers of paint. The flame warms the paint until bubbles form. The paint can be removed with a spatula or other tool.

| Order No. | Flame width mm | 9097 | Gas pressure bar | Performance kW/h | Gas consumption at P = 1.5 bar g/h | Handle component connection |
|---|---|---|---|---|---|---|
| 0041 | 40 | on request (999) | 1.5–2.0 | 2.83 | 220 | M14 x 1 internal |

## Connection pipe

**Design:** Model made of stainless steel, bent 60°.



| Order No. | Length mm | 9100 | Handle component connection | Torch head connection |
|---|---|---|---|---|
| 0014 | 130 | on request | M14 x 1 internal | M20 x 1 outside |
| 0037 | 350 | on request NEW | M14 x 1 internal | M20 x 1 outside |
| 0051 | 500 | on request | M14 x 1 internal | M20 x 1 outside |
| 0061 | 600 | on request | M14 x 1 internal | M20 x 1 outside |
| 0076 | 750 | on request (999) | M14 x 1 internal | M20 x 1 outside |

## Propane high-performance torch head

**Design:** Model made of stainless steel, flame length larger than 150 mm.

**Application:** For heating, burning and singeing for tar and roof insulation work.

| Order No. | Torch head Ø mm | 9103 | Performance at P = 1.5 bar kW/h | Gas consumption at P = 1.5 bar g/h | Torch head connection |
|---|---|---|---|---|---|
| 0031 | 30 | on request | 15.5 | 1200 | M20 x 1 internal |
| 0041 | 40 | on request | 27.0 | 2100 | M20 x 1 internal |
| 0046 | 45 | on request | 37.9 | 2500 | M20 x 1 internal |
| 0051 | 50 | on request | 47.6 | 3700 | M20 x 1 internal |
| 0061 | 60 | on request | 70.8 | 5500 | M20 x 1 internal |
| | | (999) | | | |

## Heating torch set

**Scope of delivery:**
1 Propane torch handle with long torque lever
1 Burner insert with air adjustment Ø 60 mm
1 Small controller 0.5–4 bar with combination connection for 5 to 33-kg bottles
1 Hose rupture protection
1 HP hose 5 m, 3/8" anti-clockwise

| Order No. | Performance kJ/h | 9104 | Gas consumption at P = 4 bar g/h |
|---|---|---|---|
| 0005 | 35260 | on request | 7600 |
| | | (999) | |

## Hose rupture protection

**Application:** For liquid gas DVGW No. 92.02 e 868.
Prevents the emission of gas in case of damage or loosening of the hose line. Closes the gas passage when the prescribed operating quantity is exceeded by 10%. Re-opening by hand

| Order No. | Gas pressure bar | 9106 | Capacity at qn (g/h) 4 bar | Hose connection input | Hose connection output |
|---|---|---|---|---|---|
| 0011 | 1.5 | on request | 2200 | G 3/8" anti-clockwise inside | G 3/8" anti-clockwise outside |
| 0021 | 4.0 | on request | 6000 | G 3/8" anti-clockwise inside | G 3/8" anti-clockwise outside |
| | | (999) | | | |

## Propane regulator

**Design:** DIN-DVGW certified. Suitable for 5, 11 and 33 kg cylinders.

**9109** **With manometer and variable outlet pressure.** Gas consumption 12000 g/h.

**9110** **With scale and hose rupture protection.** Gas consumption 6100-14000 g/h.

| Order No. | Gas pressure bar | 9109 | 9110 | Hose connection input | Hose connection output |
|---|---|---|---|---|---|
| 0011 | 0.5–4.0 | on request | on request | W 21.8 x 1/14" anti-clockwise | G 3/8" anti-clockwise |
| | | (999) | (999) | | |

9109

9110

## High pressure hose

**Design:** DIN 4815, DIN EN 1763-1, pressure class 30. Completely reinforced, 4 x 4 mm.

| Order No. | Version with terminals | 9112 | Length m |
|---|---|---|---|
| 0021 | both sides G 3/8" anti-clockwise | on request | 2 |
| 0031 | both sides G 3/8" anti-clockwise | on request | 3 |
| 0051 | both sides G 3/8" anti-clockwise | on request | 5 |
| | | (999) | |

## Multi-purpose blowtorch

**Design:** The extremely shockproof device features a very fine adjustment on the gas feed. Use with cartridge C 206 GLS, which is protected by a steel bell. Due to the polypropylene handle, the device feels good in the hand and can be operated easily with just one hand. Delivery without cartridge.

**Application:** Suitable for soft and hard soldering and for other trade and DIY jobs. Perfect multi-purpose blowtorch for a versatile use.

**Note:** For replacement cartridge see (Order No. 9121 0011).

**9115** **Soudogaz X 2000, with burner X 1550.**

**9118** **Soudogaz X 2000 PZ, with burner X 1700 and piezo electric ignition.**

| Order No. | Gas consumption g/h | 9115 CAMPINGAZ | 9118 CAMPINGAZ |
|---|---|---|---|
| 0011 | 120 | 39.40 (W936) | 45.00 (W936) |

9115

9118

## Burners and accessories

**Design:** Suitable for multi-purpose blow torches X 2000 and X 2000 PZ.

**9124 0011** **Fine solder burner X 1650**
Flame with **extra fine tip.** For soldering with tin or for classic soldering of small pieces, which only need to be heated in a small area: e.g. jewellery, loosening of screws, etc.

| Order No. | Description | 9124 CAMPINGAZ | Gas consumption g/h |
|---|---|---|---|
| 0011 | Fine solder burner X 1650 | 19.70 (W936) | 30 |

**9124 0031** **Flat burner XP 1650**
With **broad, flat flame.** For uniform heating of surfaces, burning of paint, singeing wood or tin plating large surfaces.

| Order No. | Description | 9124 CAMPINGAZ | Gas consumption g/h |
|---|---|---|---|
| 0031 | Flat burner XP 1650 | 19.70 (W936) | 140 |

## Bunsen burner

**Design:** Compact Bunsen burner with replacement cartridge. The security assembly system allows the cartridge to be exchanged only when it is fully emptied.

**Application:** For heating of solutions in flasks and test tubes, paint drying, glue cooking, smoke blackening and heating prior to bending, for example, glass tubes.

**Note:** For replacement cartridge see (Order No. 9121 0011).

| Order No. | Gas consumption g/h | 9124 CAMPINGAZ |
|---|---|---|
| 0051 | 55 | 69.00 (W936) |

## Disposable cartridge C 206 GLS

**Design:** Plug-in cartridge with butane/propane gas mixture at a ratio of 80/20. With gas-lock system, fulfils the new EN 417:2012 and is compatible with older consumer devices. Largely withholds the gas when separated from the device. Suitable for multi-purpose blowtorches (Order No. 9115 0011, 9118 0011) and Bunsen burners (Order No. 9124 0051).

| Order No. | Net weight g | 9121 CAMPINGAZ | PU | Content ml |
|---|---|---|---|---|
| 0011 | 190 | 2.75 (W936) | 36 | 314 |

## Fine soldering iron type 260 BD

kurtz ersa

**Design:** Light, handy model with interchangeable, pencil-point ERSADUR permanent soldering tip 1.1 mm. The internally heated tip together with the PTC heating element provide excellent efficiency with minimum energy consumption.

**Application:** Due to the slim construction, particularly useful in hard to reach places, such as inside devices. Suitable for modern electronics.

| Order No. | Performance W | 9130 kurtz ersa | Preheating time approx. min | Soldering tip temperature °C | Supply voltage V | Weight g |

## Soldering pistol Multi-Sprint 960 ED

**Design:** Ultra light, model without a transformer and with chisel-shaped LF-ERSADUR permanent soldering tip 3.2 mm. The internally heated tip together with the PTC heating element provide excellent efficiency with minimum energy consumption. By periodically pressing the button, the heat feed can be regulated, because the tip heats only as long as the button is pressed. Max. soldering tip temperature depends on the switch-on period.

**Application:** Especially because of its very short heat-up time, it is ideally suited to fast individual soldering, such as in the service and repair area. Due to the large range of soldering tips for this device, a wide range of applications can be processed (see next page).

kurtz ersa

| Order No. | Performance W | 9143 kurtz ersa | Preheating time approx. s | Supply voltage V | Weight g |
|---|---|---|---|---|---|
| 0075 | 75 | 54.20 (W933) | 20 | 230 | 230 |

## Soldering station Analog

**Design:** Electronic continuously controlled soldering station with chisel-shaped LF-ERSADUR permanent soldering tip 2.2 mm. The internally heated tip together with the PTC heating element provide excellent efficiency with minimum energy consumption. Furthermore, the soldering iron has a highly flexible, heat-resistant connection cable. The high impedance of the compensating bushing connected with the soldering tip on the front of the device ensures structural integrity. In addition, the device has new tip twist protection and a multifunctional soldering iron stand with cleaning sponge and swivelling sponge container for right and left handed people.

The device has Ersa RESISTRONIC temperature regulation technology in which the PTC heating element assumes the temperature sensor task.

**Application:** Especially suitable for smaller and medium-sized soldering spots. Due to the large range of soldering tips for this device, a wide range of applications can be processed (see next page).

## Digital soldering

**Design:** Electronic continuously controlled soldering station with chisel-shaped ERSADUR permanent soldering tip 2.2 mm. The internally heated tip together with the PTC heating element provide excellent efficiency with minimum energy consumption. Furthermore, the soldering iron has a centre-fed PVC connection cable. The high impedance of the compensating bushing connected with the soldering tip on the front of the device ensures structural integrity. In addition to the free choice of temperature within the permissible temperature range, **3 fixed temperatures or 2 fixed temperatures and a standby temperature can be programmed.** Moreover, the device has a **power bar graph display,** a **calibration and a power-off function.**

Furthermore, it offers new tip twist protection and a multifunctional soldering iron stand with cleaning sponge and swivelling sponge container for right and left handed people.
The device has Ersa RESISTRONIC temperature regulation technology in which the PTC heating element assumes the temperature sensor task.

**Application:** Especially suitable for smaller and medium-sized soldering spots. Due to the large range of soldering tips for this device, a wide range of applications can be processed.

## Gas soldering set Independent

**Design:** Ergonomically shaped, anti-static gas soldering iron with immediate ignition at the touch of a button thanks to the built-in piezo ignition and stepless power setting function. Operation is performed with commercial purified butane lighter gas.

**Application:** Ideal for service, installation, repair and maintenance work, especially when there is no electricity. Due to the large range of soldering tips for this device, a wide range of applications can be processed.

**9153** **Type 75**
1 gas soldering iron, 2 chisel-shaped soldering irons 1.0 and 2.4 mm, 1 tool rest, 1 cleaning sponge, 1 sponge holder, 1 plastic case.

**9156** **Type 130**
1 gas soldering iron, 2 chisel-shaped soldering irons 1.0 and 2.4 mm, 1 cleaning sponge, 1 sponge holder, 1 plastic case.

| 0005 | De-soldering pump, 11.3 cm³ | 11.65 |
| 0100 | De-soldering tip (pack of 2) | 4.75 (W933) |

## Solder

STANNOL

**9163** **Soldering wire**
Soldering wire S 321 ISO 9453:2006 S-Pb60Sn40 IEC 61190-1-3 ORH1/2.1.2.A. For soldering on metal, except aluminium, e.g. cans, brass cans, copper boilers, batteries and lots more. **Not suitable for soldering in electronics and electrical engineering.** If possible, flow medium residue should be removed after soldering.

9163

**9166** **Tin solder**
Solder wire HS 10 2510, with activated resin flux, non-corrosive on non-ferrous metals, fast flowing. ISO 9453:2006 S-Pb60Sn40 IEC 61190-1-3 ROM1/1.1.2.B. With 2.5% flux content. For soldering in electrical engineering, electronics, electrical assembly and automotive technology; for soldering copper, brass, silver and surfaces made of silver, cadmium, nickel and tin.

9166

**9169** **Electronics solder**
Solder wire HF 32, **with halogen-free activated rosin flux.** The flux residues are transparent, dry, hard and non-corrosive. ISO 9453:2006 S-Sn60 Pb39Cu1 IEC 61190-1-3 ROLO/1.1.3.B. With 3.5% flux content. For soldering, especially in electronics, electrical engineering, telecommunications and miniature art.

9169

**9173** **Fittings solder, solid**
DVGW GW 2, ISO 9453:2006 S-Sn97Cu3/TC300. Melting range 230 to 250 °C. For soldering in cold and hot water installations, on heaters to 110 °C, fuel oil lines, in the food industry, for refrigeration and air conditioning technology. Applicable with fittings paste (Order No. 9176 0025).

9173

| Order No. | Design | 9163 STANNOL Soldering wire, Ø 2 mm | 9166 STANNOL Tin solder, Ø 2 mm | 9169 STANNOL Electronics solder, Ø 1 mm | 9173 STANNOL Fittings solder, Ø 3 mm |

| 0050 | 500 g spool | 24.60 (W939) | – (W939) | – (W939) | – (W939) |

## Tin solder

STANNOL

**Design:** According to ISO 9453:2006 S-Pb60Sn40, extruded, triangular rod.
Tin content: 40%

**Application:** For general soldering and tinning works.

| Order No. | Dimensions approx. mm | 9180 STANNOL | PU | Weight per rod g |
|---|---|---|---|---|
| 0010 | 11 x 440 | 11.75 (W939) | 4 | approx. 250 |

## Fitting paste

STANNOL

**Design:** S-Sn97Cu3. Metal content 60%. According to ISO 9453:2006, DVGW Reg. No. FL 019 with flux filling DIN EN 29454-1 3.1.1.C, DVGW GW 7 2.1.2, grain size 75 µm. Applicable with fittings solder (Order No. 9173 0025).

**Application:** For soldering in cold and hot water installations, on heaters to 110 °C, fuel oil lines, in the food industry, for refrigeration and air conditioning technology.

**Note:** Contains zinc chloride, irritating.

| Order No. | Design | 9176 STANNOL |
|---|---|---|
| 0025 | 250 g can | 23.90 (W939) |

## Soldering grease

**Design:** According to DIN EN 29454-1 3.1.1.C.

**Application:** For soft soldering tin plate and leaded panels and for tinning copper and brass. Not suitable for soldering in electronics and electrical engineering.

**Note:** Contains zinc chloride, irritating.

STANNOL

| Order No. | Design | 9183 STANNOL |
|---|---|---|
| 0005 | 50 g can | 2.34 |
| 0010 | 100 g can | 3.18 |

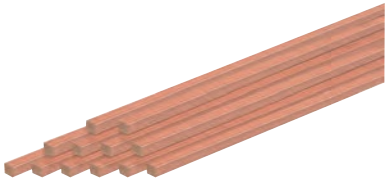
| | | (W939) | |

## Brazing solder (copper-phosphorus solder)

**Design:** Without silver, according to DIN EN 1044-CP203 L-CuP6, melting range 710 °C, working temperature 730 °C. 93.8 % Cu, 6.2 % P, DVGW GW2 4.3.2. Delivered in a 1 kg carton.

**Application:** For copper, cold and warm water installations and gas installations. Only with soldering flux in conjunction with brass or red brass.

STANNOL



| Order No. | Dimensions mm | 9197 STANNOL |
|---|---|---|
| 0005 | 2 x 500 | 51.30 |
| | | (W939) |

## Silver solder

**Design:** According to DIN 8513, L-AG45Sn DVGW GW 2 3.2 + 4.3.2, round rods, approx. 8 g.

**Application:** For copper, cold and hot water as well as gas installations.

STANNOL

| Order No. | Dimensions mm | 9198 STANNOL | PU | Operating temperature °C |
|---|---|---|---|---|
| 0015 | 1.5 x 500 | 20.70 (W939) | 25 Δ | 670 |

Δ Supply only possible as a whole packaging unit.

## Cleaning fleece

**Design:** Metal-free, solvent-resistant and elastic. Supplied in sleeve of 10 pcs.

**Application:** For the fast, scratch-free cleaning of soldering spots on copper solder. Wet and dry operation for the removal of oxide layers, corrosion, surface dirt as well as grease and oily residues.

ROTHENBERGER

| Order No. | Dimensions mm | 9917 ROTHENBERGER | Weight g |
|---|---|---|---|
| 0010 | 60 x 130 | 5.95 (W592) | 80 |

## Flame protection mat

**Design:** Very flexible, asbestos-free mat with protection up to 1000 °C for soldering torch and welding heat.

**Application:** For avoiding fire risk and protecting wall coverings, cables, carpets and other flammable materials, including over long working period. Being flexible, the mat can be formes and used almost anywhere.

ROTHENBERGER

| Order No. | Dimensions mm | 9119 ROTHENBERGER | Weight g |

|---|---|---|---|
| 0010 | 400 | 5.70 (W945) | 305 |

## Multifunctional welder's tongs FIX CO2

**Application:** For loosening and affixing gas sleeves and power nozzles, to clean gas sleeves and to cut welding wire.

| Order No. | For nozzles mm | 9238 | Length mm |
|---|---|---|---|
| 1215 | 12–15 | 34.00 | 180 |
| 1518 | 15–18 | 34.00 (W945) | 210 |

## Welding protective mask solarmatic comfort

NEW

optrel swiss made

**Design:** With automatic protection levels from protection level 4 to protection levels 9–13. By means of a potentiometer knob on the outside, continuous adjustment can also be set manually between protection level 9 and 13. In addition, the device has a delay switch. In that case, the switching time is adjustable between dark/light. The energy is supplied by solar cells, so there is no need to replace batteries. In addition, the mask has a comfortable headband that can be adjusted externally in all directions. The protection panes and glare protection cassette can be replaced quickly and easily.

**Application:** Suitable for electrodes, metal inert gas, high performance, cored wire, TIG, plasma and micro-plasma welding as well as plasma cutting.

**Note:** Not suitable for gas and laser welding.

| Order No. | Switching time light-dark ms | 9206 optrel | Weight g |
|---|---|---|---|
| 0005 | 0.1–0.35 | 288.00 (W946) | 490 |

### Accessories

| Order No. | Design | 9206 optrel |
|---|---|---|
| 0010 | Protection pane, external (pack of 10) | 21.40 NEW |
| 0015 | Viewing pane, outside (pack of 5) | 7.40 NEW |
| 0020 | Forehead sweat band, cotton, with velcro fastener (pack of 2) | 5.40 (W946) |

## Welding protection helmet e650

optrel swiss made

**Design:** Ideal work instrument for most welding work. In addition to the infinitely variable DIN 9-13 blackness values, the helmet also offers infinitely variable sensitivity adjustment and delayed opening. All features can be selected and adjusted from the outside, and thus guarantee maximum comfort and efficiency. The built-in grinding function allows turning off the LCD by pressing a button, thus allowing for flawless sanding. The energy is supplied by solar cells and supported with replacement batteries. In addition, the mask has a comfortable headband that can be adjusted from the outside in all directions. The viewing pane can be replaced quickly and easily.

**Application:** Suitable for electrodes, metal inert gas, high performance, cored wire, TIG, plasma and micro-plasma welding as well as plasma cutting.

**Note:** Not suitable for gas and laser welding.

| Order No. | Switching time light-dark ms | 9206 optrel | Weight g |
|---|---|---|---|
| 0006 | 0.12–0.17 | 288.00 (W946) | 490 |

## Welding protection helmet Solar Protect

**Design:** The entry-level model with modern filter technology for high security (certified according to EN 379 and EN 175). With a viewing area of 38 x 94 mm, the user always has the best view of the work surface. Automatic protection stages of light level DIN 4 in 0.2 ms intervals to dark level DIN 9-13. The gradation of the dark level can be set manually inside the helmet. UV/IR protection adjusts continuously to stage DIN 16 The energy is supplied by solar cells.

**Application:** Suitable for MMA, MIG-MAG and TIG applications, TIG suitable from 50 amps.

**Note:** For outside panes see (Order No. 9223).

| Order No. | Design | 9208 |
|---|---|---|
| 0005 | Safety helmet | 131.00 |
| 0010 | Forehead sweat band (pack of 2) | 2.52 |
| | | (W947) |

## Welding protection helmet with breathing protection system

NEW

**Design:** Welding protection helmet; the entry-level model with modern filter technology for high security (certified according to EN 379 and EN 175). With a viewing area of 38 x 94 mm, the user always has the best view of the work surface. Automatic protection stages of light level DIN 4 in 0.2 ms intervals to dark level DIN 9-13. The gradation of the dark level can be set manually inside the helmet. UV/IR protection adjusts continuously to stage DIN 16 The energy is supplied by solar cells.
**Breathing protection system,** the ideal addition to the welding protection helmet. This new breathing protection system regulates the flow of air in 8 levels from 170 l/min to 240 l/min. The air flow is displayed using easy-to-read LEDs; the operating elements are well protected from dust and dirt by the sealed keypad. The electronic control (AIR FLOW system) automatically regulates the air flow to the preset volume of air. The lightweight high-performance Li-Ion battery supplies at least 8 h (9 h at 180 l/min) of energy. The battery can be charged inside and outside the breathing unit using the charger (included). Low battery status is indicated by the visual and acoustic warning signals. A vibrating alarm also informs the user of a saturated filter. The TH3PSL filter (with pre-filter) offers the best protection. The lightweight shell is made from durable plastic, whilst the padded band offers great comfort for the wearer. The air tube is protected by a flame-retardant sleeve. Delivery: Welding protection helmet is delivered fully assembled with the breathing protection system.

**Application:** Suitable for MMA, MIG-MAG and TIG applications, TIG suitable from 50 amps.

**Note:** For outside panes see (Order No. 9223).

| Order No. | Design | 9208 |

| 0020 | Replacement mirror | 2.27 (W945) |

## Hand riveter NTH

**Design:** Made of high quality die-cast aluminium with forged pliers jaws made of steel. In addition, the hand riveter has a handy cuff handle, opening spring for automatic mandrel ejection and optimal one hand operation as well as a retaining clip.

**Application:** For aluminium to ∅ 5 mm.

**Scope of delivery:** hand riveter NTH, 1 installation wrench and 4 nosepieces 10/18, 10/24, 10/27 und 10/32.

**Nosepiece attachment:**

| Rivet ∅ | Rivet material | nosepiece |
|---|---|---|
| 2.4 | Aluminium | 10/18 |
| 3 and 3.2 | Alu, Cu, steel, stainless steel, Stinox, Alu/Alu, PG-Alu, PG-steel | 10/24 |
| 4 | Aluminium, Cu | 10/24 |
| 4 | steel, CAP-Alu, CAP-Cu, Alu/Alu, PG-Alu | 10/27 |
| 4.8 and 5 | Aluminium, PG-aluminium | 10/32 |

| Order No. | Equipment lift mm | 9304 | Length mm | Weight g |
|---|---|---|---|---|
| 0005 | 8 | 16.15 (W960) | 260 | 570 |

## Hand riveter NTS

GESIPA®

**Design:** Made of high quality die-cast aluminium with forged pliers jaws made of steel. The slim pliers head also enables work in hard to reach places. In addition, the hand riveter has a handy cuff handle, opening spring for automatic mandrel ejection and a retaining clip.

**Application:** For aluminium up to ∅ 5 mm as well as steel and stainless steel up to ∅ 4 mm.

**Scope of delivery:** Hand riveter NTS, 4 nosepieces 10/18, 10/24, 10/27 and 10/32.

**Nosepiece attachment:**

| Rivet ∅ | Rivet material | Nosepiece |
|---|---|---|
| 2.4 | Aluminium | 10/18 |
| 3.2 | CAP-aluminium, CAP-Cu | 10/18 |
| 3 and 3.2 | Alu, Cu, steel, stainless steel, Stinox, Alu/Alu, PG-Alu, PG steel | 10/24 |

| 4 | steel, CAP-Alu, CAP-Cu, Alu/Alu, PG-Alu | 10/27 |
| 4 | Stainless steel, Stinox, PG-steel | 10/29 |
| 4.8 | CAP-aluminium, CAP-Cu | 10/29 |
| 4.8 and 5 | Aluminium, PG-aluminium | 10/32 |

| Order No. | Equipment lift mm | 9305 GESIPA | Length mm | Weight g |
|---|---|---|---|---|
| 0005 | 8 | 38.70 (W960) | 275 | 480 |

## Hand riveter NTX/NTX-F

GESIPA®

**Design:** Made of high quality die-cast aluminium with forceps jaws made of forged chrome vanadium steel. The slim pliers head also enables work in hard to reach places. The intermediary lever system reduces effort and causes demolition damping. In addition, the hand riveter has a handy cuff handle and a retaining chain.

**Application:** For aluminium up to ∅ 5 mm as well as steel and stainless steel up to ∅ 4 mm.

**Nosepiece attachment:**

| Rivet ∅ | Rivet material | Nosepiece |
|---|---|---|
| 2.4 | Aluminium | 10/18 |
| 3.2 | CAP-aluminium, CAP-Cu | 10/18 |
| 3 and 3.2 | Alu, Cu, steel, stainless steel, Stinox, Alu/Alu, PG-Alu, PG-steel | 10/24 |

| 0015 | 8 | 60.10 (W960) | 260 | 575 |

## Hand riveter Flipper®

**Design:** Made of die-cast aluminium with forged pliers jaws made of high-quality steel. The required **hand strength** is reduced by 40% **after repeated actuation.** The hinge pin is mounted to prevent turning. With plug-on mandrel-collecting vessel, a spring reset for automatic mandrel ejection and an opening spring.

**Application:** For aluminium up to Ø 5 mm, steel and stainless steel up to Ø 4 mm.

**Scope of delivery:** Hand riveter Flipper®, 1 assembly key and 3 mouthpieces 10/18, 10/24, 10/29.

**Nosepiece attachment:**

| Rivet Ø | Rivet material | Nosepiece |
|---|---|---|
| 2.4 | Aluminium | 10/18 |
| 3.2 | CAP-aluminium, CAP-Cu | 10/18 |

## Rivet gun HN 2

**Design:** Made of high-quality die-cast aluminium, with closed shell, which adds stability and offers protection from dirt. The tooth segment transmission with favourable lever arm arrangement reduces the force required and dampens the tear-off effect. Repeated re-engagement very easy, even on workpiece. The hinge pin is mounted to prevent turning and features internal axial securing. In addition, the hand riveter features a plug-in and pivotable riveting mandrel container as well as handy handles.

**Application:** For all materials from Ø 3.0 to 6.4 mm, except PolyGrip® and G-Bulb® blind rivets with Ø 6.4 mm made of stainless steel.

**Scope of delivery:** Hand riveter HN 2, 5 nosepieces 16/29, 16/32, 16/36, 16/40, 16/45.

**Nosepiece attachment:**

| Rivet Ø | Rivet material | Nosepiece |

## Lazy-tong rivet punch SN 2

**Design:** Made of high-quality die-cast aluminium, with closed shell, which adds stability and offers protection from dirt. The device is equipped with a galvanised scissors system made of high-strength steel. The slim housing also enables work in hard to reach places. The favourable leverage with 4-way slide block bearings considerably reduces the hand strength required.

**Application:** For all materials from ∅ 3.0 to 6.4 mm.

**Scope of delivery:** Scissors riveter SN 2, 5 nosepieces for ∅ 3.2 mm, 4.0 mm, 4.8 mm, 6.0 mm and 6.4 mm, 1 installation wrench.

**Nosepiece attachment:**

| Rivet ∅ | Rivet material | Nosepiece |

## Blind rivet gun PH 2 pneumatic-hydraulic

**Design:** The hydraulic head adjustable by 360° is made of aluminium and is equipped with a wear-resistant cylindrical surface. The pneumatic cylinder is made of die-cast aluminium with smooth-running, wear-resistant and hard-chromed piston made of hardened steel. The wear-resistant compact seal has a large wiping action and a long service life. With quick-action ventilating valve for high working results. Favourable centre of gravity for fatigue-free operation, low noise pneumatic circuit. With mandrel-collection container and a user-friendly handle.

**Application:** For all materials from ∅ 3 to 5 mm, and for blind rivets ∅ 2.4 mm with small feed unit. Not suitable for CAP-blind rivets made of stainless steel.

**Scope of delivery:** Blind rivet pistol PH 2, 5 nosepieces 16/24, 16/27, 16/29, 16/32, 16/36, 1 set chuck jaws, 1 receptacle, 2 installation wrenches MSU and MSZ.

**Nosepiece attachment:**

| Rivet ∅ | Rivet material | Nosepiece |

## Blind rivet gun TAURUS® series pneumatic-hydraulic

**Design:** With integrated protection device against mandrels flying out. The receptacles for the alternate mouthpieces are located in the bottom of the device. The compressed air used for the setting process is also used to suck up the rest of the mandrel. The new gripper jaw system increases the service life many times over. The trailing port prevents being affected by the hose. The rivet suction can only be switched on by lifting the machine. Retractable suspension bracket on the head. Coordinated device lift for quick work sequences with removable mandrel-collecting container.

**Nosepiece attachment:**

| Rivet Ø | Rivet material | Nosepiece |

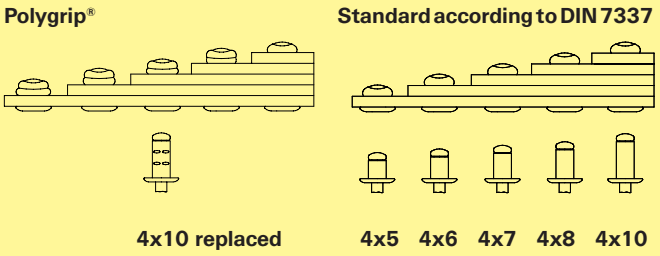
## PolyGrip® multiple range blind rivet

Particularly suitable when the material thickness of the material to be riveted changes frequently.

- Type style restriction due to large clamping range
- Reduction of type style diversity in the warehouse
- Fewer errors in processing by reducing the risk of confusion
- Best hole fill, even with larger hole tolerances
- Reliable rivet mandrel lock
- Clean closure head formation and high-strength riveted joint



## PolyGrip® multiple range blind rivet Alu/steel standard, domehead

**Design:** Hollow rivet made of aluminium AlMg 2.5, rivet mandrel made of galvanised steel.

Hollow rivet: Alu AlMg 2,5 | Mandrel: Galvanised steel

## Why should it be a GESIPA® blind riveter?

1. Predetermined breaking points to suit the sleeve length on the mandrels. This does not need to be followed up several times for longer rivets.
2. Carefully selected materials and a complex geometry ensure a high-quality and visually appealing connection.
3. Each blind rivet is washed, heat-treated and has a bright galvanised mandrel. This ensures clean working and longer service life of the riveter.
4. 100% routine test by modern infrared technology.
5. Special designs for special applications on request.
6. Made in Germany.

**GESIPA® blind rivets exceed the requirements of DIN EN ISO 14 589 with respect to tolerance of the rivet and bore hole diameter, minimum shear and tensile strength as well as clamping length and material combination.**

**ETA approval in line with EU Construction Products Regulation No. 305/2011**
Blind rivets that meet the requirements of EU Construction Products Regulation No. 305/2011 and that meet the test specifications of the European Technical Approval (ETA) requirements, **can be identified by the ETA key behind the riveting shaft.**

## Blind rivet aluminium/steel, standard domehead

**Design:** Hollow rivet made of aluminium AlMg 3, mandrel made of galvanised steel.

## Hand-held blind rivet nut gun GBM 10

**Design:** Made of high quality die-cast aluminium with forged pliers jaws of steel chrome-vanadium steel. A simple stroke adjustment by knurled nut with stroke scale ensures safe and complete setting of the insert. The threaded mandrels can be changed quickly and easily without tools. In addition, the hand riveter has a handy cuff handle and an opening spring for simple operation
Delivery with threaded mandrel M5.

**Application:** For blind rivet nuts made of aluminium to M6, made of steel and brass as well as stainless steel to M5.

## Hand-held blind rivet nut gun GBM 30

**Design:** Enclosures and radial bearings made of forged steel with galvanised steel tube lever arms. A simple stroke adjustment by adjustment ring with stroke scale ensures safe and complete setting of the insert. The threaded mandrels can be changed quickly and easily without tools. The device also features a quick-twisting device that allows quick and easy entry and drilling the mandrel out. In addition, the hand riveter has a favourable ratio with minimum effort, even with large blind rivet nuts and plastic-coated grip pieces.

**Application:** For blind rivet nuts made of aluminium and steel from M3 to M10 as well as brass and stainless steel to M8.

## Battery-operated blind rivet nut gun FireBird® range

**Design:** Compact, shock-resistant housing. A high reliability is achieved by the electronic controller. Triggering the setting process is separate from the widening drill process The electronic control monitors the setting stroke. The threaded mandrels and the stroke settings can be changed quickly and easily without tools. Furthermore, the devices have electronic temperature and overload protection. The hanger is attached to the retractable head. Hand protection, a favourable centre of gravity for fatigue-free operation, removable mandrel collection holder and user-friendly handle.

**9340 0005** **FireBird®**
For steel to M8, for aluminium to M10 and for M6 stainless steel. Delivery with 3 threaded mandrels M4; M5; M6, 3 nosepieces M4; M5; M6, Allen wrench, double open-ended spanner SW 24/27 mm, 1 quick-change rechargeable battery 14.4 V/1.3 Ah, 1 rapid charger, 1 steel sheet case.

**Note:** For replacement quick-change rechargeable battery see (Order No. 9321 0007).
For quick charger see (Order No. 9322 0006).

## Blind rivet nut gun FireFox® range, pneumatic-hydraulic

**Design:** Compact, shock-resistant shell. The control protects the thread of the blind rivet nut and ensures a secure anchoring in the workpiece.

**Scope of delivery:** 1 blind rivet nut pistol, 2 double open-ended spanners 24/27 mm, 1 Allen screwdriver 4 mm, 1 refill bottle with hydraulic oil 100 ml, 1 oil refill container.

**9341 0001** **FireFox® 1**
Controlled via the force setting. With rubber base for better stability.
For aluminium up to M6 and M3–M5 for all other materials.

**9341 0005** **FireFox® 2**
Controlled either via lift or force setting.
For all materials from M3 to M10 as well as for aluminium and steel to M12. Delivery with 1 threaded mandrel M6 and 1 mouthpiece M6.

## Quick coupling NW 7.2

**Design:** Made of brass, with oil- and heat-resistant nitrile (Perbunan) seals. Shut-off on one side, self-sealing when coupled. In addition, it prevents contamination of internal parts by the closed locking sleeve. When using steel nipples, this coupling can also be used for compressed air tools thanks to the hardened locking rods. Operating pressure: 0-35 bar.

**Note:** For coupling plug see Order No. 9433.

## Safety coupling NW 7.4

**Design: Push-button version.** The shell is made of aluminium with oil- and heat-resistant nitrile (Perbunan) seals, button and valve are made from galvanised hardened steel; the inner parts are made of stainless steel, and the thread is made of nickel-plated brass. The flow rate at 6 bar is 1800 l/min (Δp=1 bar). These couplings conform to ISO Standard 4414.

**Technique:** Press in the plug to couple. After the plug snaps audibly, the clutch is locked. To detach, press the push-button twice. On first press the coupling is vented, however, the plug remains secured in the coupling. Pushing the second time releases the plug.

**Note:** Operating pressure max. 12 bar. For coupling plug see Order No. 9448.

**9434 0170–0180** **With hose nozzle.**

## Spiral hose made of nylon with swivel fitting

**Design:** Both sides fully integrated **with anti-kink spring.** Due to Nylon 12 (PA), this spiral hose has a very high re-rolling force, saves space through small turns and is easy to use. The hose has good vibration absorption, excellent abrasion resistance and good compression performance.

**Application:** Operating temperature from –40 °C to +100 °C. Maximum operating pressure at 23 °C is 13 bar with hose Ø 6.3 x 7.9 mm and 11 bar with hose Ø 9.5 x 11.8 mm.

RIEGLER

For safe and effective flow of gaseous and liquid media, such as compressed air, oils, gases, greases, fuels, organic and inorganic substances.

| Order No. | Inner diameter mm | 9440 RIEGLER | Outside Ø mm | Length m | Connection inch | Cable Ø mm |

## PVC braided hose, transparent

**Design:** 3-level construction with core made of soft PVC, pressure-retainer made of polyester and cover made of soft PVC. For use with standard couplings and connectors, taking the conveying media, the operating pressure and the temperature into account. Temperature range: -15°C to +60°C

**Application:** Suitable for food, drink and alcoholic liquids in line with the EU Regulation for Contact with Foodstuffs No. 10/2011/EU (simulants A, B, C) as well as compressed air and chemical substances (resistance chart available on request).

**Note:** Hydrocarbons have a negative effect on flexibility and can lead to the hose material breaking.

NEW

TRICOFLEX

**Design:** 5-layer construction with core made of soft PVC, intermediate layer made of soft PVC, jersey fabric, intermediate layer made of soft PVC and cover made of soft PVC, flexible and comfortable to use. Non Torsion Technology (TNT), UV- and weatherproof, temperature resistance: -15 °C to +60 °C.

**Note:** Couplings compatible with GEKA® system.

| Order No. | Inner diameter inch | 9445 TRICOFLEX | Wall thickness mm | Operating pressure bar | Length m |
|---|---|---|---|---|---|
| 0170 | 1/2 | 34.30 | 2.30 | 9 | 25 |
| 0175 | 1/2 | 61.60 | 2.30 | 9 | 50 |
| 0180 | 3/4 | 50.20 | 2.85 | 8 | 25 |
| 0185 | 3/4 | 93.40 (W972) | 2.85 | 8 | 50 |

## GEKA® with quick coupling

NEW

GEKA

**Design:** Made of brass with form seal NBR. Clip distance standard at 40 mm, compatible with all GEKA® models. Temperature range from -5 °C to +100 °C.

**Application:** For inserting clamps and press sleeves. Suitable for water, industry, suction and pressure hose.

| Order No. | Connection inch | 9423 GEKA | Max. operating pressure bar |
|---|---|---|---|
| 0200 | 1/2 | 3.43 | 40 |
| 0205 | 3/4 | 3.59 (W972) | 40 |

## GEKA® plus thread piece

NEW

GEKA

**Design:** Made of brass, with external (AG) and internal thread (IG), with NBR flat seal ring on thread side. Clip distance standard at 40 mm, compatible with all GEKA® models. Temperature range from -5 °C to +100 °C.

**9423 0220 + 0225** **With external thread**

External thread

| Order No. | Connection inch | 9423 GEKA | Max. operating pressure bar |
|---|---|---|---|
| 0220 | 1/2 | 3.40 | 40 |
| 0225 | 3/4 | 3.40 (W972) | 40 |

**9423 0210 + 0215** **With internal thread.**

Internal thread

| Order No. | Connection inch | 9423 GEKA | Max. operating pressure bar |
|---|---|---|---|
| 0210 | 1/2 | 3.66 | 40 |
| 0215 | 3/4 | 3.66 (W972) | 40 |

## GEKA® plus blind coupling

NEW

GEKA

**Design:** Made of brass with form seal NBR. Clip distance standard at 40 mm, compatible with all GEKA® models. Temperature range from -5 °C to +100 °C.

| Order No. | Design | 9423 GEKA | Max. operating pressure bar |
|---|---|---|---|
| 0230 | With borehole for attaching small chains | 3.75 (W972) | 40 |

## Hose holder

RIEGLER

**Design:** Made of aluminium for easy wall mounting with variable hole pattern. Sunken boreholes ensure a smooth surface. The option of placing a small hose holder below a larger one creates additional storage capacity with almost the same use of space due to the curved shape of the holder.

| Order No. | Size | 9445 RIEGLER | Length mm | Width mm | Height mm |
|---|---|---|---|---|---|
| 0245 | Small (35–40 m with NW 6 mm) | 18.90 | 186 | 57 | 85 |
| 0250 | Medium (45–50 m with NW 9 mm) | 38.80 | 248 | 97 | 118 |
| 0255 | Large (45–50 m with NW 13 mm) | 45.80 (W961) | 336 | 132 | 152 |

## IDEAL® hose clip

**Design: DIN 3017.** With embossed inside of band, rounded edges and strong steel strip for safe guidance of the screw and the belt for transmitting higher forces.

**Application:** Suitable for cooling water connections, non-pressurised and pressurised fuel pipes and vents, oil lines, lines in the household appliance industry, hose connections in the commercial vehicle industry as well as connections of pipes in plumbing and mechanical engineering.

**9423** **Material W1,** band, housing and screw made of **bright-galvanised steel.** Slotted hex bolt wrench size 7 mm, with integrated Phillips.

**9426** **Material W4,** band, housing and screw made of **non-corrosive chrome-nickel steel (1.4301)**. Slotted hex bolt wrench size 7 mm.

| Order No. | Chucking capacity mm | 9423 | 9426 | PU | Tape width x tape thickness mm |
|---|---|---|---|---|---|

| 1055 | 28–31 | 34.20 (W959) | 100 |

KNIPEX

## Hose clamp pliers

You can find our complete range of hose clamp pliers from 📖 6/234.

## Plastic compressed-air hose reel

**Design:** Particularly robust model made of high-strength special plastic with high-quality fabric-reinforced hose and DIN fitting. Shell made of galvanised steel pipe. The reel can be wound and unwound during operation thanks to the axial port. Delivery with metal one-handed quick couplings, connector hose and wall mount.

| Order No. | Hose length m | 9443 format | Inner diameter mm | Outside Ø mm | Operating pressure bar |
|---|---|---|---|---|---|
| 0020 | 20 | 53.40 (W903) | 9 | 15 | 15 |

## Automatic hose reel

**Design:** Compact, rugged, shock-resistant and pivoting housing for wall or ceiling mounting. With blocking means for securing the compressed air hose against reverse flow, can be turned off if necessary. The return springs are made from special steel and ensure a complete and even return of the compressed air tube. Delivery with compressed air hose made from polyurethane with coupling and plug.

**Application:** For organisation and safety at the workplace. The avoidance of tripping hazards is an important contribution to accident prevention.
Ideal for commercial businesses and industry.

9429 0009

9429 0012

| Order No. | Hose length m | 9429 | Inner diameter mm | Outside Ø mm | Operating pressure bar | Dimension mm | Weight kg |
|---|---|---|---|---|---|---|---|
| 0009 | 9 | 163.50 | 8 | 12 | 10 | 325 x 275 x 185 | 3.4 |

Articles marked ◊ are not held in stock, procurement is effected at short notice.

## Filter, multifix range

**Design:** Centrifugal separator with sintering filter element. With semi-automatic discharge valve and die cast zinc Shell.

**Application:** To clean compressed air from pneumatic tools, cylinders, valves and lots more.

RIEGLER

| Order No. | Connection thread inch | 9401 RIEGLER | Flow quantity at 6 bar m³/h | Nominal width DN | Height mm | Max. operating pressure bar | Operating temperature °C |

## Pressure regulator with manometer, multi-fix range

**Design**: Reversible diaphragm pressure regulator independent of supply pressure with secondary ventilation. The pressure can be adjusted by pushing in the hand wheel.

**Application:** Reduces the fluctuating fuel line pressure on compressed air systems to the desired operating pressure to keep it constant.

**Note:** Flow rate measurement: at P1 = 8 bar.

RIEGLER

| Order No. | Connection thread inch | 9402 RIEGLER | Flow rate l/min | Nominal width DN | Height mm | Max. operating pressure bar | Operating temperature °C |

## Filter regulator, multifix range

**Design:** With polycarbonate container and manometer. Reversible diaphragm pressure regulator independent of supply pressure with secondary ventilation, combined with a centrifugal separator. The pressure can be adjusted by pushing in the hand wheel.

**Application:** To clean and regulate compressed air from pneumatic tools, cylinders, valves and lots more.

**Note:** Flow rate measurement: at P1 = 8 bar.

RIEGLER

## Maintenance unit, two-piece, multi-fix range

**Design:** Two-part maintenance unit. Comprising a reversible diaphragm pressure regulator independent of supply pressure with secondary ventilation, combined with a centrifugal separator and a proportional lubricator. Shell made of zinc die casting.

**Application:** To clean, regulate and oil compressed air from pneumatic tools, cylinders, valves and lots more.

**Note:** Flow rate measurement: at P1 = 8 bar.

RIEGLER

## Mist lubricator, multifix

**Design:** Proportional lubricator, with die-cast zinc Shell and manual discharge valve. Lubricant can be filled under pressure.

**Application:** To enrich the compressed air with oil mist for a reliable lubrication of pneumatic compressed air tools, cylinders, valves and lots more.

**Note:** Minimum operating pressure 0.5 bar.

| Order No. | Connection thread inch | 9408 RIEGLER | Flow quantity at 6 bar m³/h | Nominal width DN | Height mm | Max. operating pressure bar | Operating temperature °C |

| 0015 | 40 | 17.90 (W970) | G 1 |

## Mini mist lubricator

**Design:** Oil container made of polycarbonate.

**Application:** For mounting on striking pneumatic tools (nail guns, staplers, pneumatic screwdrivers) with burst rhythm. Also suitable for tools with continuous compressed air requirements, such as grinding and polishing machines.

**Note:** Fixed oil dosage, approx. 0.4 $cm^3$ per 100 working cycles. One filling represents 3000 working cycles.

| Order No. | Connection thread inch | 9425 RIEGLER | Nominal width DN | Max. operating pressure bar | Operating temperature °C |
|---|---|---|---|---|---|
| 0005 | G 3/8 | 20.30 (W970) | 8 | 2 | 50 |

## Pressure gauge

**Design:** Standard Bourbon gauge, with plastic housing and simple scale in bar, in accordance with EN 837-1. Accuracy class 1.6.

**Application:** For gaseous, liquid, non-high-viscosity and non-crystallising fluids to be measured, that do not corrode copper alloys.

**9431** Lower connection.

**9457** Connection concentric rear.

## High-power blow gun, metered

**Design:** Infinitely adjustable, lightweight high-power blow gun with extremely strong blow power. Light and secure to hold, even under full pressure application.

**Note:** Extension tubes are available for blowing out in hard-to-access places.

| Order No. | Connection | 9485 RIEGLER |
|---|---|---|
| 0072 | Coupling plug DN 7.2 | 36.10 (W970) |

## Blow gun with noise-dampening nozzle

**Design:** Made of aluminium, blue-anodised.

**Application:** For blowing out and cleaning machines, tools, boreholes, hollow items and lots more.

| Order No. | Connection | 9486 RIEGLER |
|---|---|---|
| 0072 | Coupling plug DN 7.2 | 8.75 (W970) |

## Coolant high pressure nozzle

**Design:** Shell made of high-quality plastic granules. The nozzle can be rotated 360° for precise coolant distribution. The nozzle can be adjusted using an Allen key or the adjustment key included (Order No. 9600 0500) and stays in its position without a locking nut.

**Application:** Fast processing during machining with high rotation speeds through high-pressure cooling up to 70 bar.

**Type CD:** Compact model for use in narrow spaces.
**Type XW:** Model with especially large swing range.

## Simple spray system Jetspray

**Design:** Coolant spray system with LOC-LINE segment hose, compressed air line, suction line for coolant, control valve and a strong magnetic clamp, which can be deactivated, with V-shaped base for affixing to surfaces, including uneven surfaces. Via the control unit, the amount of refrigerant and air supply can be set separately. This allows for maximum lubrication and extended tool life with minimal coolant needed. Supplied in 3 l canister with screw top

**Application:** For cooling workpieces and tools on all machine tools, such as drilling, milling, turning, grinding, EDM and lots more.

JETSPRAY Minimalmengen-Schmier-System

## Machine positioning element LEVEL-MOUNT®

**Design:** Elastomer body of synthetic rubber, oil and ageing resistant, outer cap of metal, yellow powder coated, pressure plate made of ductile iron, screw made of galvanised steel.

**Application:** For the flexible and anchor-free set-up of machines and presses.

**Note:** The load values listed in the table are reference values , which were determined from the viewpoint of good stability and anchor free installation of machines.

**Selecting the right element:**
Determine load per element (machine weight: attachment points),
determine type of machine,
select elements according to the table below,
compare screw size with receiving hole.

## Hand lever grease gun easyFILL 400

NEW

PRESSOL

**Design:** Similar to DIN 1283. Made of steel, galvanised, for use in harsh environments, wall thickness 1 mm. Pump piston with precision fit to the cylinder (no lubrication). Suitable for 400 g grease cartridge, in line with DIN 1284, grease filler valve (Order No. 9582), or loose grease. Processes greases up to min. 10 °C. Delivery with armoured hose M10 x 1, 11 x 300 mm and mouthpiece, 4 BA, M10 x 1 and 10 grease follower pistons.

**Note:** No spring mechanism required. Simply push the cartridge in, start the grease follower pistons and begin. The vacuum in the grease press button causes the pistons to move upwards independently. The variable stroke principle means that the grease gun requires minimum movement of the lever. For multi-purpose grease see (Order No. 9814 or 9816).

## Grease filler pump

**Design:** Due to the high sliding cover, the amount of grease which is still in the bucket can always be checked. The filling attachment is offset so that grease guns with offset filler nipples can be filled without issue. The large handles allows for convenient removal of the grease follower piston. Delivery with suction pipe, filler nipple M10 x 1 for converting grease guns by other manufacturers, and dust cap on the filling nozzle secured with a chain.

**Application:** For filling grease guns and pneumatic presses.

PRESSOL

## Engraver Vibroscript

**Design:** Maintenance-free and double-insulated, 230 V/50 Hz power consumption 9 W, short-range 15 min, 6000 rpm stylus vibrations. The engraving depth can be adjusted with the setting screw and are therefore tailored to the hardness of the material. Delivery with 2 m cable and hard metal stylus.

**Application:** For engraving on iron, steel, non-ferrous metals, stone, ceramics, glass, wood and lots more.

**Note:** When engraving in very hard materials or for larger engravings, we recommend using the diamond tip (Order No. 9724 0015).

| Order No. | Description | 9724 |

## Marking machine LabelManager 280

**Design:** Hand device with QWERTY keyboard. Easy operation, automatic tape cutter and firmer. Large, two-line graphics display, which also shows text effects used. 3 fonts, 7 font styles, 6 font sizes, 9-label memory, special characters, can print up to 10 copies of a label (DYMO® D1 labels with the widths 6, 9 and 12 mm in several colours). Simple text processing with the help of quick-access buttons. Can be connected to a PC or Mac® (compatible with Windows Vista®, Windows® 8, Windows® XP and Mac OS® v.10.5 or higher - only Intel®) via USB for individual design. Power supply via a li-ion battery.

**Scope of delivery:** Label maker, D1 tape, black on white, 12 mm, li-ion rechargeable battery and power cable.

| Order No. | Dimensions mm | 9729 DYMO |
|---|---|---|
| 0012 | 107.5 x 206 x 46.5 | 84.20 (W992) |

## Label maker DYMO LM 500TS

**Design:** Touch screen label maker, fast text input via computer-like **QWERTY keyboard**, easy operation, automatic tape cutter. Large, coloured touch screen with print preview for displaying and editing labels (DYMO® D1 labels with a width of 6, 9, 12, 19 and 24 mm). Can save settings and data for up to five different users and with memory for the last 15 printed labels, the 10 most often printed labels and for 10 label templates. 10 fonts, 32 font styles, 25 font sizes, 5 frames, 1 underline. Prints up to 5 lines of text (on 19 and 24 mm label width). With barcode print (UPC-E, Code-39, Code-128, EAN 13, EAN 8, UPC-A, QR Code) Can be connected to a PC or Mac® (compatible with Windows Vista®, Windows® 8, Windows® XP and Mac OS® v.10.5.8 or higher - only Intel) for individual design. Power supply via a li-ion battery.

**Scope of delivery:** Label maker, tape 24 mm (Order No. 9741 0020), software CD, manual and cable for USB connection, rechargeable battery pack.

| Order No. | 9734 DYMO |
|---|---|
| 0050 | 277.00 (W992) |

## Tape for script DYMO D1

**Design:** Tape cassette with self-adhesive, durable lettering tape. Tape length 7 m.

**Note:** Suitable for labelling machines LM 260 P (Order No. 9729) and LM 500TS (Order No. 9734).

**9735** **Tape width 12 mm.**

**9738** **Tape width 19 mm.**

| 0025 | white | 6.00 | |

(W996)

## Zinc spray

**Design:** 95 % pure zinc, temperature resistant to +500 °C. Highly pigmented, 90 % zinc in dry film. Quick-drying, electrically conductive and can be varnished.

**Application:** Zinc primer for metallic substrates. Ideal for exhaust systems, manifolds, pipe elbows, heat exchangers, automotive repair and body work. Furthermore, suitable for repair of damaged hot-dip galvanizing, for corrosion protection of welded joints, steel buildings, steel doors, road barriers, smoke explorers and other thermally stressed parts.

| Order No. | Design | 9778 E-COLL | PU | Colour |
|---|---|---|---|---|
| 1400 | 400 ml spray can | 7.65 | 12 | Grey matte |

(W980)

## Zinc spray, light

**Design:** Temperature resistant to +500 °C. Quick-drying, electrically conductive and spot weldable.

**Application:** Suitable for all body work, for the repair of damaged hot-dip galvanising, as an intermediate layer in spot welding, as well as corrosion protection.

| Order No. | Design | 9781 E-COLL | PU | Colour |
|---|---|---|---|---|
| 1400 | 400 ml spray can | 7.15 | 12 | silver grey, bright, shiny |

(W980)

## Zinc Alu Spray

**Design:** Temperature resistant to +500 °C. Quick-drying, electrically conductive and can be painted over. Forms a tough, flexible, non-greasy protective film that can be welded.

**Application:** Primer for metallic substrates. Long-term protection for polished and electroplated iron workpieces, for repairs of damaged galvanised parts and for coating of welding and drilling.

| Order No. | Design | 9780 E-COLL | PU | Colour |
|---|---|---|---|---|
| 1400 | 400 ml spray can | 7.80 (W980) | 12 | Silver, shiny |

## Zinc dust colour

**Design:** The zinc dust paint consists of about 95% zinc and 5% resin. Zinc gives metal surfaces cathodic rust protection and protects by by means of resistant synthetic resin film. Dilute with trade resin, nitro or universal thinner, see (Order No. 9838 or 9840).

**Application:** Water-resistant, double protection against rust formation on metals. Ideal for chassis work, for repairing damaging zinc layers, for coating drill holes and welded areas, as conductive intermediate layer for spot welding, as a primer for water and weather-exposed systems, and for the protection of steel constructions, pipelines, ships, oil platforms, sea containers and lots more.

| Order No. | Design | 9782 E-COLL | PU | Colour |
|---|---|---|---|---|
| 1800 | 800 g can | 18.10 (W980) | 12 | Grey matte |

## Aluminium spray 900

**Design:** Temperature resistant up to +800 °C, from 99.5% pure aluminium.

**Application:** Corrossion protection for all metal substrates. For wheels, exhausts and truck bodies as well as in air-conditioning and ventilation technology, for combustion turbines, piping, tanks and to achieve a colour match with the freshly galvanised surface after application of zinc spray.

| Order No. | Design | 9784 E-COLL | PU | Colour |
|---|---|---|---|---|
| 1400 | 400 ml spray can | 6.90 (W980) | 12 | silver, shiny (chrome effect) |

## Stainless steel spray

**Design:** Temperature resistant up to +300 °C, with high chemical resistance.

**Application:** Stainless steel primer for metallic substrates, protects against rust and is resistant to abrasion. For repairing damaged stainless steel parts.

| Order No. | Design | 9786 E-COLL | PU | Colour |
|---|---|---|---|---|
| 0400 | 400 ml spray can | 7.60 (W980) | 12 | anthracite |

## Primer spray

**Design:** With non-toxic pigments. Filling power, fast drying and paintable.

**Application:** Ideal corrosion protection with long-term effect: For metal, wood and plastics, as well as for priming after welding.

| Order No. | Design | 9788 E-COLL | PU | Colour |
|---|---|---|---|---|
| 1400 | 400 ml spray can | 7.10 (W980) | 12 | grey |

## Corrosion protection wax

**Design:** Temperature resistant from -30 °C to +90 °C, dropping point approx. 100 °C. Achieves 240 hours in the salt spray test (DIN 50 021).

**Application:** As a temporary corrosion protection for suitable components, such as on folds and surfaces on motor vehicles, construction machinery, agricultural implements and tools. Also suitable for interior preservation of pressure vessels.

| Order No. | Design | 9791 E-COLL | PU | Colour |
|---|---|---|---|---|
| 1400 | 400 ml spray can | 6.30 (W980) | 12 | clear |

## Silicone spray

**Design:** Solvent-free, temperature resistant from 0 °C to +180 °C.

**Application: The ideal mounting aid.** Forms a tremendously stable lubricating and protective film. Protects against moisture and rust. Lubricates, protects, impregnates and eliminates jamming, squeaking and sticking of workpieces. Therefore, for universal use as a release agent and anti blocking agent for paper, wood, printing and packaging industries as well as for the foam and textile processing, for the protective gas and electrode manual welding, as a release agent for plastics technology, for all thermoplastics and thermo sets and rubber (except silicone rubber) and as maintenance and care product for the automotive sector.

| Order No. | Design | 9794 E-COLL | PU | Colour |
|---|---|---|---|---|
| 1400 | 400 ml spray can | 3.66 (W980) | 12 | clear |

## Separating spray

**Design:** Silicone free.

**Application:** Protects the welding nozzle and acts as a blowing agent for protective gas and electric welding. Prevents sticking and burning on gas nozzle and workpiece surfaces. After treatment, the workpieces can be painted, electroplated, anodised, and burnished without any problem.

| Order No. | Design | 9792 E-COLL | PU | Colour |
|---|---|---|---|---|
| 1400 | 400 ml spray can | 3.92 (W980) | 12 | clear |

## Rust primer

**Design:** Free of lead and chromate, with a resin base. Temperature-resistant to +80 °C. Quick drying and weather resistant. Largely resistant against oils and petrols, with good adhesive properties.

**Application:** Suitable for indoor and outdoor use. For basic coating of iron and steel, galvanised workpieces, non-ferrous metals and wood.

**Note:** Not suitable for hot-dip galvanised workpieces.

| Order No. | Design | 9790 E-COLL | PU | Colour |
|---|---|---|---|---|
| 0400 | 400 ml spray can | 8.70 | 12 | grey |
| 1400 | 400 ml spray can | 8.70 (W980) | 12 | red-brown |

## Construction site marker spray

**Design:** Solvent-free dispersion of lead-and cadmium-free pigments. Contains no chlorinated solvents. Fluorescent colours except black and white.

**Application:** For all markings, e.g. on building sites, car parks, wood, grass, sand, gravel, steel and lots more.

| Order No. | Design | 9779 E-COLL | PU | Colour |
|---|---|---|---|---|
| 0005 | 500 ml spray can | 7.25 | 12 | yellow |
| 0015 | 500 ml spray can | 7.25 | 12 | red |
| 0020 | 500 ml spray can | 7.25 | 12 | pink |
| 0035 | 500 ml spray can | 7.25 (W980) | 12 | black |

## WD-40 multi-functional product

**Design:** Silicone-, resin- and PTFE-free. Temperature resistance from –45 °C to +148 °C.

**Application:** It infiltrates rust layers, loosens jammed mechanics and jammed vehicle and machine parts. Removes stubborn stains, repels moisture from electrical contacts and prevents current leakage. In addition, WD-40 leaves a thin protective film which inhibits the formation of moisture and rust on metal parts.

| Order No. | Design | 9796 WD-40 | PU |

## WD-40 Specialist®

NEW

**9796 0050** Universal cleaner. NSF K1 registered. For removal of grease, oil and dirt, without residue.

**9796 0055** Contact spray, NSF K2 registered. For removal of oil, dirt and oxidation residues on electric/electronic devices.

**9796 0060** Rust remover, NSF H2 registered. Temperature resistance from -20 °C to +90 °C. Quickly penetrates jammed parts made of metal, alloys, plastic or rubber, and protects from further corrosion.

**9796 0065** Silicone spray, colourless lubricant, water-repellent, NSF H2 registered Temperature resistance from -35 °C to +200 °C. Protects against moisture, is suitable for metals, plastics, wood and rubber.

**9796 0070** White lithium spray grease, water- and temperature-resistant lubricant, NSF H2 registered. Temperature resistance from -18 °C to +145 °C. For reducing friction for metals, including with high loads.

**9796 0075** PTFE lube spray, NSF H2 registered. Temperature resistance from –20 °C to +100 °C. Lubricates, protects and extends the service life of tools and devices made from metal, glass, vinyl, plastic and rubber.

**9796 0080** PTFE dry lube spray, quick-drying dry lubricant, NSF H2 registered. Temperature resistance from –45 °C to +260 °C. To reduce friction and wear for metal, plastic and glass.

9796 0050

9796 0070

## Rust remover

**Design:** With specially developed solid/lubricant combination based on molybdenum disulphide as well as specially selected raw materials.
Temperature resistance from –30 °C to +150 °C.

**Application:** Loosens rusted screws, nuts and machine parts. Prevents new rust formation and protects against wear.

| Order No. | Design | 9798 E-COLL | PU |
|---|---|---|---|
| 1300 | 300 ml spray can | 4.80 (W980) | 6 |

## Leak locator

**Design: Non-toxic according to DIN-DVGW.** Silicone-free.

**Application: Leak testing agent for pressurised systems.** For finding leaks in pressurised pipes and containers. Ideal for checking compressors, steel cylinders, valves, isolating valves, breathing equipment, oxyacetylene and gas welding equipment, Bunsen burners, vents, screw joints, air brakes and lots more. Suitable for compressors, refrigerants, acetylene, butane, natural gas, carbon dioxide, oxygen, propane, city gas, nitrogen, hydrogen, ammonia.

| Order No. | Design | 9800 E-COLL | PU |
|---|---|---|---|
| 1400 | 400 ml spray can | 3.57 (W980) | 12 |

## Freeze spray

**Design:** For local cooling up to –45 °C.

**Application:** Metal construction parts can thus be placed in the closest fits, and dismantled again as well. For troubleshooting in electrical circuits due to thermal overload and preventing heat damage when soldering electrical components. Ideal for maintenance work in the production and repair sector as well as in the automotive trade. In the same way, tissue samples for microscopy can be prepared in the field of medicine.

| Order No. | Design | 9801 E-COLL | PU |
|---|---|---|---|
| 0400 | 400 ml spray can | 7.75 (W980) | 12 |

## Compressed air spray

**Design:** Temperature resistant to +80 °C. No ignition and explosion hazard when properly used.

**Application:** For dusting, blowing out and away, for example, from electronic assemblies as well as for cleaning vacuum pump systems and equipment under clean room conditions in semiconductor manufacturing.

| Order No. | Design | 9801 E-COLL | PU |
|---|---|---|---|
| 1000 | 400 ml spray can | 7.75 (W979) | 12 |

## Compressed air spray 67

**Design:** Incombustible, clean and oil-free compressed gas, with certified safety. No ignition and explosion hazard when properly used.

**Application:** For the safe, clean and oil-free blowking out of dirt and dust on machines, control boxes, precision mechanics, computers, visual equipment and lots more.

| Order No. | Design | 9803 CRC | PU |
|---|---|---|---|
| 0011 | 200 ml spray can | on request (999) | 12 |

## Contact cleaner Contact 60

**Design:** Loosens tough oxide layers and reduces contact resistances.

**Application:** For the fast repair of faults in systems and equipment as well as for the preventative maintenance of fault-prone modules, connectors, switches and lots more.

| Order No. | Design | 9803 CRC | PU |
|---|---|---|---|
| 0015 | 200 ml spray can | on request (999) | 12 |

## Label remover Solvent 50

**Design:** The highly effective solvent based on natural orange terpene penetrates the label and loosens the adhesive.

**Application:** For removing labels and stickers in warehouses, dispatch, offices and workshops. Also removes sticky residue like tar spots or adhesive residue from stickers. Reaction time about 2-4 minutes.

**Note:** Do not use on solvent-sensitive plastics such as perspex or CD cases.

| Order No. | Design | 9803 | PU |
|---|---|---|---|
| 0021 | 200 ml spray can | on request (999) | 12 |

## Industrial atomiser

**Design:** With Viton seal and plastic nozzle. The feed rate is 1.5 ml per stroke, with adjustable nozzle. Height 26.5 cm, width 11 cm.

**Application:** For light chemicals, solvents, detergents and mould oil.

**Note:** For professional atomiser see (Order No. 9561).

| Order No. | Design | 9802 |
|---|---|---|
| 0005 | 1 l hand sprayer, empty | 5.35 (W980) |

## Industrial pressure sprayer

**Design:** With Viton seal and acid-resistant plastic nozzle. Very powerful air pump for priming of pressure. The precision plastic nozzle is adjustable and swivels in every direction. Sturdy container with measuring scale. Safety valve supplies pressure relief. Height 34 cm, width 14.5 cm.

**Application:** For light chemicals, solvents and detergents.

**Note:** For professional atomiser see (Order No. 9561).

| Order No. | Design | 9804 |
|---|---|---|
| 0005 | 1.5 l pressure sprayer, empty | 36.20 (W980) |

## Universal pressure sprayer

**Design:** With Viton seal, safety valve and adjustable plastic nozzle. Sturdy container with measuring scale and smooth-running nylon pump. Due to the new quality of the pressure sprayer it is also suitable as brake cleaner (but testing is required).

**Application:** For light chemicals, solvents and cleaning agents in the automotive and workshop sector, for liquids containing naphta and for mould oil.

**Note:** For professional atomizer see (Order No. 9561).

| Order No. | Design | 9804 |
|---|---|---|
| 0020 | 1.5 l pressure sprayer, empty | 25.60 (W980) |

## Oil binding agent

**Design:** Mineral granulate based on calcium silicate hydrate type III R. Absorbing or chemical binding of organic and inorganic compounds, such as oils, used oils, greases, lubricants, alkalis, paints, lacquers, solvents, hydrocarbons. Avoid contact with strong acids and oxidising agents. Non water-repellent and non-buoyant. Bulk weight: approx. 680 g/l, 1 litre of oil binder binds 0.48 litres of fuel oil, grain size: 0.125-1 mm.

**Area of application:** Binds oils and other liquid spills, suitable for traffic areas. For the cleaning and securing of industrial floors and to scatter dangerous traces of oil on roads and taxiways.

E-COLL

| Order No. | Design | 9808 E-COLL | Colour |
|---|---|---|---|
| 0020 | 20 kg sack (29 litres) | 14.70 (W980) | Beige-grey |

## Oil binding agent

NEW

E-COLL

**Design:** Clay-based oil and chemical binding agent (mol granulated, Type III/R. Binds acids, base/alkaline substances (alkaline solutions) for flammable, combustible, aqueous and polar liquids. Suitable for traffic areas. Bulk weight: approx. 500 g/l, 1 litre of oil binder binds 0.5 litres of oil, grain size: 0.5-1 mm.

**Application:** Binds oil, grease, lubricant and petrol, and other leaked liquids.

| Order No. | Design | 9808 E-COLL | Colour |
|---|---|---|---|
| 0030 | 20 kg sack (40 litres) | 23.00 (W980) | red |

## Oil binding agent

NEW

E-COLL

**Design:** PU-foam granules Type III/R, road- and rain-worthy, for all traffic areas. Water-repellent. Very absorbent, odour-neutralising, long storage life, soil conserving. Lower disposal costs thanks to lightweight product. Bulk weight: approx. 405 g/l, 1 litre of oil binder binds 0.6 litres of oil, grain size: 0.5-4 mm.

**Application:** Binds oil, grease, lubricant and petrol, and other leaked liquids.

| Order No. | Design | 9808 E-COLL | Colour |
|---|---|---|---|
| 0040 | 19 kg sack (40 litres) | 17.45 (W980) | dark beige |

## High-pressure adhesive grease

E-COLL

**Design:** Temperature resistant from –25 °C to +80 °C, good protection from seawater and salt air, good atmosphere-resistance.

**Application:** For lubricating rolling and plain bearings, even in mixed-friction areas, especially grease lubrication for all permissible running speeds. Corrosion protection of sliding parts, especially cable. Excellent corrosion protection against exposure to aggressive water, gases and alkalis.
Ideal for open gears, screws, hinges, bearings, plain bearings and water pumps, water turbines, sluice gates, car washes, cylinder guides, lead screws, screws in underwater equipment, offshore components, lifting equipment, containers and trailer lashing equipment, yachts and shipyard supplier components.

| Order No. | Design | 9810 E-COLL | PU |
|---|---|---|---|
| 1300 | 300 ml spray can | 9.05 (W980) | 12 |

## Chain adhesive spray

E-COLL

**Design:** Temperature resistant from –30 °C to +110 °C, moisture-inhibiting, rust-loosening and water-repellent. Very good adhesion, also does not run off warm surfaces.

**Application:** Suitable for loosening. Very adhesive long-life grease for lubricating cars, motorcycles, bicycles, appliances and lots more. O/X-ring tested. Ideal for chains, wire ropes, all kinds of rods, O-rings, hinges, joints, ball bearings, cable pulleys, door locks, bicycle and worm gear of all kinds.

| Order No. | Design | 9812 E-COLL | PU |
|---|---|---|---|
| 0500 | 500 ml spray can | 6.65 (W980) | 12 |

## Multi-purpose grease

**Design:** The special long-life active ingredient combinations are lithium-emulsified for emergency operating features. The dropping point lies above 180 °C. Consistency index according to DIN 51818: NLGI Class 2.

**Application:** Universal grease for lubricating rolling and sliding bearings, even in mixed friction area, especially for all sliding speeds permissible for grease lubrication. Reduces friction and wear even under high loads.

**9814** **Resin-free, with colloidal graphite.** Temperature resistance from –30 °C to +120 °C. Bearing protection against harmful contaminants. Also with protective properties against corrosion and maintaining the lubricating effect even in the presence of water. Ideal for agricultural machinery, construction equipment, excavators, trucks, tractors, stone crushers, articulated lorries, as well as lifts, battery chargers, conveyor belts and water pumps. Possible designation according to DIN 51502: KPF2K-30.

**9816** **Light.** Temperature resistance from –30 °C to +120 °C, (for short periods up to +130 °C). Protects against corrosion and maintains the lubricating effect even in the presence of water. Ideal for central lubrication systems with eligible conventional tubing cross sections, lifetime lubricated automobile bearings, as lubrication in construction and agricultural machines, electric motor bearings, conveyor roller bearing and axle bearings in railway operation.

| Order No. | Design | 9814 E-COLL | 9816 E-COLL | PU |

9816

## Assembly paste/copper paste

**Design:** Made from neutral carriers, special additives and metal polish. On a copper basis.

**Application:** Offers best separating and solvent effects up to +1100 °C as well as cost-effective wear protection, and forms an effective lubricating and separating film against corrosion and frictional corrosion wear. With pressure loading a flat, coppered surface forms, thanks to the high proportion of solid lubricant. This creates a higher level of protection against cold welding and wear. Ideal for screws, bolts and nuts, plug-on and bayonet connections that are exposed to extremely high temperatures, assembly lubrication of joints on internal combustion engines, flange joints and fittings, lubrication of wearing bushes and also on contact with water.

| Order No. | Design | 9818 E-COLL | PU |
|---|---|---|---|
| 0100 | 100 g tube | 5.95 (W980) | 20 |

## Special Vaseline

**Design:** Acid and non-toxic, highly refined, pharmaceutical and long astringent. The dropping point is approx. +55 °C (DIN ISO 2176), the freezing point is approx. +50 °C (ISO 2207).

**Application:** As separating agent, rust protection and as skincare product. For lubrication, preservation, sealing, insulation and care of leather

| Order No. | Design | 9820 E-COLL | PU | Colour |
|---|---|---|---|---|

9820 1080

9820 1750

## Spray grease

**Design:** Temperature resistant from -25 °C to +120 °C.

**Application:** Universal grease for all industrial uses, as well as for maintenance cleaning and care in the workshop, garage and home. Prevents wear, eliminates squeaking and protects against corrosion. Ideal for conveyor roller bearings, electric motor bearings, axle bearings in railway operation, lifetime lubricated automobile bearings, as lubrication in construction and agricultural machines, chains, drive wheels and door hinges, and lots more.

| Order No. | Design | 9822 E-COLL | PU | Colour |
|---|---|---|---|---|
| 1300 | 300 ml spray can | 5.95 (W980) | 6 | white |

## Anti-Seize metal lubrication

**Design:** Temperature resistance from –180 °C to +1200 °C, pressure-mark resistant to 2300 kp/cm², freshwater- and seawater-resistant, withstands most acids and alkalis, heavy-metal-free.

**Application:** To prevent seizing, wear or corrosion in mechanically held shrink and press fits, screws in aluminium or magnesium castings, for threading or screwing stainless steel and lubricating threaded forging tools for flanges, bolts, fittings, cylinder heads, valve guides, metal seals for vehicles.

| Order No. | Design | 9823 E-COLL | PU |
|---|---|---|---|
| 0400 | 400 ml spray can | 9.20 (W980) | 12 |

## PTFE spray

**Design:** Grease and silicone free. Temperature resistance from –80 °C to +260 °C.

**Application:** Hard-drying permanent separation, lubrication and sliding agent. For the lubrication of saw blades and threads, drawers and instruments, chutes and conveyors. Highly-effective separation agent for wood, plastic and rubber processing.

| Order No. | Design | 9824 E-COLL | PU |
|---|---|---|---|
| 1400 | 400 ml spray can | 6.80 (W980) | 12 |

## Cutting oil spray

**Design:** Chlorine- and silicone-free. Temperature resistance to +180 °C.

**Application:** For all-around processing. Ensures optimum cooling. Outstanding cooling property provides for the extension of tool life, excellent lubricity and a high surface quality. Can be sprayed from all positions. Reduces effort and makes high continuous load and higher cutting speed possible. Ideal for drilling, punching, milling, sawing, turning and lots more.

**Note:** For hand refractometers see (Order No. 9606 📖 9/107).

| Order No. | Design | 9829 E-COLL | PU |
|---|---|---|---|
| 1005 | 400 ml spray can | 6.90 (W980) | 12 |

## opta Cut cutting oil spray

**Design:** Chlorine- and silicone-free.

**Application:** The outstanding cooling properties extend the service life of tools, offer the best lubrication and a high surface quality. From all positions selectively sprayable. For all areas of metalworking, especially for rust- and acid-resistant stainless steels. Ideal for thread cutting, drills and spaces, for assembly and repair works.

| Order No. | Design | 9825 opta | PU |
|---|---|---|---|
| 0400 | 400 ml spray can | 15.30 (W994) | 12 |

## Cutting oil spray opta Cut S DVGW

**Design:** Synthetic, chlorine-free, with DVGW approval.

**Application:** For processing steel and stainless steel. Ideal for thread cutting and sawing at drinking water provision and sanitary facilities.

| Order No. | Design | 9805 opta | PU |
|---|---|---|---|
| 0400 | 400 ml spray can | 10.30 (W994) | 12 |

## Cutting oil spray opta Cut Planto S

**Design:** Cutting oil spray based on naturally replenishable raw materials.

**Application:** For processing steel and stainless steel, cast, non-ferrous metals and aluminium. Good performance for drilling, thread cutting and moulding, as well as reaming. Environmentally friendly and quickly biodegradable.

| Order No. | Design | 9806 | PU |
|---|---|---|---|
| 0400 | 400 ml spray can | 9.20 (W994) | 12 |

## Universal cutting oil

**Design:** Free from hazardous substances. Temperature resistance to +180 °C, free from chlorine and silicone. Not miscible with water.

**Application:** For outstanding cooling, extends the service life of tools, excellent lubricity, high surface quality, reduces effect of force, very durable and great cutting speed. For all normal applications in drilling, punching, milling, sawing, turning and lots more.

| Order No. | Design | 9830 | PU |

## Minimal quantity lubrication opta Minimal 2000

**Design:** Mineral-oil based.

**Application:** For aluminium work. Very good performance for drilling, milling and sawing. Leaves no residue, eliminates the cleaning and degreasing of the workpieces. Residue-free vaporisation at temperatures over 200 °C. Can be used in high pressure and micro-dosing systems.

| Order No. | Design | 9815 |
|---|---|---|
| 0015 | 5 l canister | 159.50 |
| | | (W994) |

## Drilling oil concentrate

**Design:** Contains mineral oil EP-drilling compound, chlorine-free, totally stable and homogeneous. Immune to hardness ranges in water (lime, etc.). Largely resistant to microbial attack. When used properly, physiologically safe.

**Application:** Emulsifiable for long tool life. Ideal for drilling, turning, milling, sawing and thread cutting. For aluminium, non-ferrous metals and their alloys, cast- and stainless steel.

**Application concentration:** Milling: approx. 9% strength (1 l concentrate in 11 l water).
Sawing, turning, drilling: approx. 10% (1 l concentrate in 10 l water).
Thread cutting: approx. 10% (1 l concentrate in 10 l water).

## High performance cooling lubricant concentrate

**Design:** Organically stable, contains mineral oil, nitrite-and chlorine-free and free from PCB, PCT compounds and bacteria. The concentrate is alkaline.

**Application:** The concentrate is stirred with water and forms a stable easy-to-handle emulsion, which offers high tool service lives and perfect surface qualities. Good corrosion protection, long-lasting emulsion and good skin compatibility. Ideal for drilling, turning, milling, sawing, grinding and thread cutting.

**Application concentration:** Grinding: approx. 3% strength (1 l concentrate in 35 l of water).
Sawing, milling, turning, drilling: approx. 5% strength (1 l concentrate in 19 l water).
Thread cutting: approx. 9% strength (1 l concentrate in 11 l water).

9828 0020

## High-performance cooling lubricant opta Cool 500

**Design:** Long-term stable, water-miscible cooling lubricant based on mineral oil with EP wear-protection substances.

**Application:** Emulsion stable with good corrosion protection. Universally applicable for almost all materials and manufacturing, such as turning, milling, drilling machines and saws. Chlorine- and silicon-free. Corresponds to TRGS 611.

**Application concentration:** 5%.

| Order No. | Design | 9827 opta |
|---|---|---|
| 0015 | 5 l canister | 55.20 |
| 0020 | 10 l canister | 103.00 |
| 0040 | 30 l canister | 302.50 (W994) |

## High performance cooling lubricant opta Cool 600 HS

**Design:** Semi-synthetic, water-miscible cooling lubricant, chlorine- and nitrite-free.

**Application:** Stable long-lasting emulsion for drilling, turning, milling, sawing and grinding. Suitable for central installations and single machines. Corresponds to TRGS 611. The coolant provides good corrosion protection and good lubricity.

**Application concentration:** 5-6 %.

| Order No. | Design | 9831 opta |
|---|---|---|
| 0020 | 10 l canister | 113.00 (W994) |

## Premium cooling lubricant opta Cool 700 S

**Version:** Synthetic, water-miscible cooling lubricant with special combination of EP active ingredients. The clear solution is chlorine-, boron-free, amine-free and seal compatible.

**Application:** For processing steel and stainless steel. Very good performance when drilling, turning, milling, cutting threads and sawing, good results when threading forming and reaming. Meets the requirements of TRGS 611.

**Use concentration:** 5% (normal processing), 10% (heavy processing).

| Order No. | Design | 9833 |
|---|---|---|
| 0015 | 5 l canister | 56.80 |
| 0020 | 10 l canister | 107.50 |
| | | (W994) |

## Special cooling lubricant opta Cool Planto S

**Design:** Synthetic, water-miscible special cooling lubricant based on naturally replenishable raw materials. Chlorine- and nitrite-free, environmentally friendly and quick to biodegrade.

**Application:** For processing aluminium, cast, steel and stainless steel. Very good performance for drilling, boring, milling and sawing. Fulfils requirements of TRGS 611.

**Use concentration:** 5-6 % (normal processing), 8-10 % (heavy processing).

| Order No. | Design | 9746 |
|---|---|---|
| 0015 | 5 l canister | 65.30 |
| 0020 | 10 l canister | 125.00 |
| | | (W994) |

## Grinding coolant opta Cool Grind S Premium

**Design:** Synthetic, completely clear, chlorine- and zinc-free, low-foam, skin-friendly and environmentally compatible.

**Application:** For the fine processing on steel and cast surfaces.

**Use concentration:** Normal grinding 3 to 5%.

| Order No. | Design | 9747 |
|---|---|---|
| 0015 | 5 l canister | 53.70 |
| 0020 | 10 l canister | 100.50 |
| | | (W994) |

## Hand-held refractometer

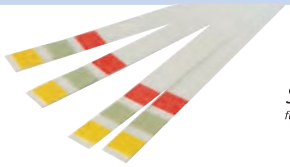
**Design:** Adjustable, automatic temperature compensation, adjustable ocular.

**Application:** For the precise and fast calculation of oil content or other concentrations in cooling lubricants and other water mixtures.

| Order No. | Measurement range % | 9606 |
|---|---|---|
| 0001 | 0–32 | 121.00 |
| | | (W991) |

## Test strips opta

| Order No. | Application | 9748 | PU | Measurement range |
|---|---|---|---|---|
| 0005 | Nitrite load | 0.58 | 100 Δ | 1-80 mg/l |
| 0010 | Nitrate load | 0.58 | 100 Δ | 10-500 mg/l |
| 0015 | pH value | 0.28 | 100 Δ | 7.5–9.5 pH |
| 0020 | Bioburden | 6.25 | 10 Δ | 102–105 disinfectant against bacteria, fungi and yeasts. |
| | | (W994) | | Δ Can only be supplied as a whole packaging unit. |



## System cleaner opta Grotanol SR 1

**Design:** Microbiocidal system cleaner.

**Application:** For cleaning the coolant system of metalworking machines prior to changing the cooling emulsion. PITA disinfectant against bacteria, fungi and yeasts and eliminates grease, dirt nests, bacterial contamination and fungus. Old debris and bacteria columns are reliably removed and washed away.
Also useful as cold cleaner for places, which do not come into contact with cooling lubricant during circulation.

**Note:** Use biocides safely. Always read label and product information before use!

| Order No. | Design | 9845 |
|---|---|---|
| 0020 | 10 kg canister | 145.50 (W994) |

## High-performance stamping and forming lubricant opta Form 1000 S

**Design:** Mineral-oil based. Free from chlorine and heavy metals.

**Application:** For processing aluminium, steel and stainless steel. Especially for stamping, fine blanking and for the most difficult forming.

| Order No. | Design | 9783 |
|---|---|---|
| 0015 | 5 l canister | 61.00 (W994) |

## Bed track oil opta

**Design:** Demulsifying slide and bed track oil with very good stick-slip properties.

**Application:** For use together with water miscible cooling lubricants.

**9785** **CGLP 68**

**9787** **CGLP 220**
Highly viscous.

| Order No. | Design | 9785 | 9787 |
|---|---|---|---|
| 0020 | 10 l canister | 145.50 (W994) | 147.00 (W994) |

## Hydraulic oil opta

**Design:** According to DIN 51524-2, based on ageing-resistant special raffinates.

**Application:** For demanding hydraulic facilities with high thermal loads. Prevents corrosion and has a wear-reducing effect on mixed friction on pumps and hydraulic motors.

| Order No. | Design | 9793 ISO VG 32 | 9795 ISO VG 46 | 9797 ISO VG 68 |
|---|---|---|---|---|
| 0020 | 10 l canister | 71.00 (W994) | 69.20 (W994) | 58.50 (W994) |

## Cleaning and polishing cloth

**Design:** Washable up to 95 °C, without fabric softener

**9835 0005** **Scotch-Brite™ high performance cloth**
For cleaning **all surfaces** with minimal effort. Absorbs up to 100 times more fat and dirt than traditional cleaning cloths. Washable up to 300 times.

**9835 0010** **Scotch-Brite™ Microfaser Polishing Cloth**
Specifically for dry, humid and wet cleaning of all surfaces, **painted and sensitive surfaces.** Removes grease, dust and liquids without creating micro-scratches. Washable up to 50 times.

**9835 0015** **Scotch-Brite™ Mikrofaser-Reinigungstuch**
For damp and wet cleaning of **glass surfaces.** Usage with and without chemicals is possible. Very high dirt- and water absorption, leaves a lint- and streak-free surface.

9835 0005
9835 0010
9835 0015

| Order No. | Design | 9835 3M | Colour | Dimension mm |
|---|---|---|---|---|
| 0005 | High-performance cloth | 9.90 | blue | 320 x 360 |
| 0015 | Micro-fibre cleaning cloth | 7.75 | green | 320 x 400 |
| 0010 | Micro-fibre polishing cloth | 9.25 (W981) | yellow | 320 x 360 |

## Acetone

**Design:** Solvent with low boiling-point and excellent removal action for acetate, nitrocellulose and methacrylate paints.

**Application:** For thinning paint, as a paint stripper, removes very oily, grease and hardened marks, can be used in the processing of plastics.

| Order No. | Design | 9849 E-COLL | PU |
|---|---|---|---|
| 1010 | 1 l can | 5.75 (W980) | 12 |

## Brake cleaner

**Design:** Free from aromatic and halogenated hydrocarbons as well as silicone. Free of acetone, butanol, ethyl acetate, dries quickly.

**Application:** Universal multi-purpose cleaner, that degreases using special solvents. Removes even stubborn dirt thoroughly and gently. For cleaning drum and disc brakes, brake pads, springs, clamps, couplings, coverings, printing plates and clutch parts generally, transmissions, carburetors, fuel pumps, engine parts and lots more.

| Order No. | Design | 9832 E-COLL | PU |
|---|---|---|---|
| 1500 | 500 ml spray can | 3.98 (W980) | 10 |

## Stainless steel cleaner and care spray

**Design:** Silicone free.

**Application:** For caring for, cleaning, protecting and reducing finger prints on stainless steel surfaces. Effortlessly treats surfaces without scrubbing. Easy to use and economical in use. The protective film left means water drips off. Cleans large surfaces without streaking. For stainless steel surfaces on dishwashers, countertops, cabinets, shelves, thermo carts, convection ovens, wall coverings and lots more.

| Order No. | Design | 9834 E-COLL | PU |
|---|---|---|---|
| 0400 | 400 ml spray can | 5.95 (W980) | 12 |

## Universal foam cleaner

**Design:** Silicone-free, non-corrosive, develops no corrosive fumes, and generates no static charge.

**Application:** For use on small areas in workshops, offices, the home, machines and internal car cleaning Removes dirt, oil, grease, tar, organic residues on glass, plastic, rubber, chrome, paint, metal, Formica, stone and carpets

| Order No. | Design | 9834 E-COLL | PU |
|---|---|---|---|
| 0500 | 500 ml spray can | 6.85 (W980) | 12 |

## Methylated spirit

**Design:** 94 % vol. ethyl alcohol, mildly flammable.

**Application:** Due to the high proportion of alcohol, denatured alcohol is suitable for cleaning and degreasing glass, plastic, chrome, rubber, for diluting lacquers, solvents and antifreeze in windscreen washers (1:2).

| Order No. | Design | 9836 E-COLL | PU |
|---|---|---|---|
| 1010 | 1 l bottle | 4.01 (W980) | 12 |

## Universal nitro thinner

**Design:** Contains completely evaporating solvents.

**Application:** Specially designed thinner for all common paints such as nitro, resin and chlorinated rubber coatings. The high dissolving power promotes the spreading properties in paint. Produces high-gloss paint appearance. Ideal as a thinner and cleaning agent for painting and lacquering jobs, for bodywork and automotive industries, and for the cleaning of paint equipment and spray guns.

| Order No. | Design | 9838 E-COLL | PU |
|---|---|---|---|
| 1010 | 1 l can | 4.55 | 12 |
| 1015 | 6 l canister | 22.20 (W980) | 4 |

## Nitro-thinner

**Design:** Contains completely evaporating solvents, low toxicity.

**Application:** Thinner and cleaning agent for paint shops as well as the bodywork and automotive industries. The high dissolving power promotes the spreading properties in paint. Ideal as a thinner for all common nitro, resin and chlorinated rubber coatings, as well as a thinner and cleaning agent, and for the cleaning of paint equipment and spray guns.

| Order No. | Design | 9840 E-COLL | PU |
|---|---|---|---|
| 1010 | 1 l can | 4.31 | 12 |
| 1015 | 6 l canister | 20.40 (W980) | 4 |

## Petroleum

**Design:** Petroleum product.

**Application:** Very slow evaporating cleaner. Also serves for the corrosion protection of metal parts. Ideal for metalworking companies and vehicle repair shops for rust removal and removal of corrosion protection. Also for metal processing, mould, punch and stripping oil. Can be applied or sprayed on. For cleaning parts contaminated with oil and grease, such as engines, gear Shells, engines and for removing tar.

**Note:** Not permitted for use as a propellant, heating fuel or lubricant.

| Order No. | Design | 9842 E-COLL | PU |
|---|---|---|---|
| 1010 | 1 l can | 6.05 (W980) | 12 |

## Turpentine substitute

**Design:** Petroleum product.

**Application:** Thinner and cleaning agent for painters and decorators, and the handyman. Ideally suited for cleaning parquet and linoleum floors and as a cleaning agent for equipment such as brushes and lots more. For thinning oil, resin and coating varnishes due to the slow evaporation. Can be used for painting, rolling, dipping and spraying. Also suitable for wood and stone floors, glass and textiles.

**Note:** Not permitted for use as a propellant, heating fuel or lubricant.

| Order No. | Design | 9844 E-COLL | PU |
|---|---|---|---|
| 1010 | 1 l can | 6.45 (W980) | 12 |

## White spirit

**Design:** Petroleum product. Vaporises residue-free.

**Application:** High-quality cleaning and degreasing agent, also used in the paint and lacquering industry. For cleaning dirt spots on carpets. For removing grease spots on textiles and upholstery. For the degreasing of plastic, stone, tiles and metals, where quick drying is required after cleaning.

**Note:** Not permitted for use as a propellant, heating fuel or lubricant.

| Order No. | Design | 9851 E-COLL | PU |
|---|---|---|---|
| 1010 | 1 l can | 5.40 (W980) | 12 |

## Hand cleaner, liquid

**Design:** Extra mild, soap-free, biodegradable and pH neutral.

**Application:** Mild liquid soap for gentle cleaning, even in continuous use. Gentle skin cleansing for light soiling. Ideal for use in offices and administrative areas, as well as for washing and toilet facilities.

**Note:** For dispenser system see (Order No. 9856) or pump (Order No. 9850).

| Order No. | Design | 9846 E-COLL | PU |
|---|---|---|---|
| 0010 | 1 l bottle | 5.10 (W980) | 10 |

## Moisturising handwash cream

**Design:** Phosphate-free handwash cream for removing the toughest dirt, and for quick and gentle cleaning. Surfactants biodegradable, soap-free.

**Application:** For the most stubborn dirt, also for tough sticky work substances such as printing inks, fresh paint and tar which do not come off with solvent-free hand washing.

**Note:** For dispenser system see (Order No. 9856) or pump (Order No. 9850) for the 1 l bottle.

| Order No. | Design | 9848 E-COLL | PU |
|---|---|---|---|
| 0004 | 250 ml bottle | 3.94 | 24 |
| 1005 | 500 ml can | 4.45 | 27 |
| 1010 | 1 l bottle | 7.65 | 10 |
| 1020 | 3 l round container | 17.20 (W980) | 3 |

## Pump

**Design:** Made of plastic.

**Application:** Dispenser for mounting on 1 l bottles. Hand washing cream (Order No. 9848) and hand cleaner liquid (Order No. 9846).

| Order No. | 9850 E-COLL |
|---|---|
| 0006 | 8.90 (W980) |

## Wall bracket

**Design:** Made of chrome steel.

**Application:** Wall mount for round 3 l container. Hand washing cream (Order No. 9848).

| Order No. | 9850 E-COLL |
|---|---|
| 0010 | 27.10 (W980) |

## Dispenser pump

**Design:** Pump made of plastic, metal spout.

**Application:** Dispenser for mounting on round 3 l containers. Hand washing cream (Order No. 9848).

| Order No. | 9850 E-COLL |
|---|---|
| 0015 | 46.40 (W980) |

## Dispensers

**Design:** Made of plastic.

**Application:** Dispenser for 1 l bottles. Hand washing cream (Order No. 9848) and hand cleaner liquid (Order No. 9846).

| Order No. | 9856 E-COLL |
|---|---|
| 0010 | 60.80 (W980) |

## Skin protection creme

NEW

**Design:** For oily, grease dirt, and tough-to-remove soiling. Silicone-free, easy to distribute, quickly forms a dry and stable protective film after being rubbed in. Doesn't affect dexterity or the function of the skin.

**Application:** Protects the skin when working with oil, grease, graphite, rust, dust, paint, (PU) glue, resin, filler and lots more.

| Order No. | Design | 9846 | PU |
|---|---|---|---|
| 0020 | 1 l can | on request (999) | 12 |

## Invisible hand protection

NEW

E-COLL

**Design:** To protect skin from all types of soiling in non-aqueous areas of work. Makes it easier to clean hands. With soothing glycerine and beeswax. No preservatives or silicone.
**Application:** Offers protection against oil, dirt and paint, adhesives, varnishes etc. Before starting work, simply rub into the hands. Rinse with water after work.

| Order No. | Design | 9846 E-COLL | PU |
|---|---|---|---|
| 0030 | 250 ml tube | 5.05 | 25 |
| 0040 | 1 l can | 13.15 (W980) | 1 |

## Hand care cream

E-COLL

**Design:** O/W emulsion, slightly greasy, absorbs well and silicone-free, perfumed. Moisturises the skin and supplies it with fatty materials. Cares with moisturising allantoin. Panthenol has an anti-inflammatory effect and accelerates the healing process.

**Application:** Care, protection and regeneration of the skin for all skin types after work. Ideal for printers and car repair workshops, for the rubber, leather and textile industries, as well as mechanical engineering.

| Order No. | Design | 9852 E-COLL | PU |
|---|---|---|---|
| 0100 | 100 ml bottle | 2.91 (W980) | 12 |

## Handwashing paste

E-COLL

**Design:** Sand free and moisturising hand washing paste. Phosphate-free and biodegradable. Combination of mild, skin-friendly surfactants (= active washing substances), skin-care and organic friction products. The fine soft wood granules, in largely cubic shape, relieve the drain lines.

**Application:** Preferably against medium to strong soiling caused by water-insoluble materials with grease and pigment base.

| Order No. | Design | 9854 E-COLL | PU |
|---|---|---|---|
| 1005 | 500 ml can | 2.25 | 18 |
| 1020 | 10 l bucket | 19.90 (W980) | 1 |

## Hand cleansing wipes

E-COLL

**Design:** Wipe size 25 x 25 cm.

**Area of application:** Suitable for gentle removal of contamination without water Removes grease, oil, paints, adhesives, ink, grass stains and lots more.

| Order No. | Design | 9853 E-COLL |
|---|---|---|
| 0072 | Dispensing bucket with 72 cloths | 20.50 (W980) |

## Spray glue

**Design:** Fast-drying contact adhesive.
Temperature resistance from –40 °C to +90 °C.

**Area of application:** For fast bonding of large surfaces. Suitable for bonding paper, cardboard, wood, leather and lots more.

| Order No. | Design | 9855 E-COLL | PU |
|---|---|---|---|
| 1400 | 400 ml spray can | 9.70 (W980) | 12 |

## Screw locker Loctite 222

**Design: Low strength** thread locker for connections to M 36.

**Application:** To secure screws, nuts and bolts from loosening due to vibration, such as gearboxes, housings, and enclosures. **The connections can be disassembled using normal hand tools.**

| Order No. | Content ml | 9861 LOCTITE | PU |
|---|---|---|---|
| 0010 | 10 | on request | 12 |
| 0051 | 50 | 47.70 (W978,999) | 12 |

## Screw locker Loctite 242

**Design: Medium strength** screw locker for connections to M36.

**Application:** To secure screws, nuts and bolts from loosening due to vibration, such as gearboxes, housings, and enclosures. Easy to apply thanks to thixotropic component.

| Order No. | Content ml | 9858 LOCTITE | PU |
|---|---|---|---|
| 0010 | 10 | on request | 12 |
| 0050 | 50 | on request (999) | 12 |

## Screw locker Loctite 243

**Design: Medium strength** screw locker for connections to M36.

**Application:** To secure screws, nuts and bolts from loosening due to vibration, such as gearboxes, housings, and enclosures. Easy to apply thanks to thixotropic component. **With KTW recommendation. The connections can be disassembled using normal hand tools.**

| Order No. | Content ml | 9860 LOCTITE | PU |
|---|---|---|---|
| 0010 | 10 | 12.20 | 12 |
| 0050 | 50 | 40.00 (W978) | 12 |

## Screw locker Loctite 270

**Design: High strength** screw locker for connections to M20.

**Application:** To secure screws, nuts and bolts from loosening due to vibration, such as gearboxes, housings, and enclosures. **Can only be removed if warmed to 300 °C.**

| Order No. | Content ml | 9862 LOCTITE | PU |
|---|---|---|---|
| 0010 | 10 | 12.25 | 12 |
| 0050 | 50 | 40.00 (W978) | 12 |

## Screw locker Loctite 2701

**Design: High strength** screw locker for connections to M20.

**Application:** For permanent locking and sealing of threaded fasteners against loosening and leakage from shock and vibration. Especially for passive materials and applications where **maximum resistance to hot oil** is required. Operating temperature range: -55 °C to +150 °C.

| Order No. | Content ml | 9864 LOCTITE | PU |
|---|---|---|---|
| 0010 | 10 | 13.65 | 12 |
| 0050 | 50 | 52.40 (W978) | 12 |

## 2-component epoxy glue Loctite 3430

NEW

**Design:** Universal and fast. Viscosity 23 Pa.s.

**Appliation:** For structural bonding and for clean, almost invisible joints. For bonding glass, decorative panels, display cabinets and for general work.

| Order No. | Content ml | 986A LOCTITE | PU |
|---|---|---|---|
| 0024 | 24 | 17.00 (W978) | 12 |

## 2-component epoxy glue Loctite 3450

NEW

**Design:** Fast-hardening, viscosity 35 Pa.s.

**Application:** For bonding or repairing metal components. Thanks to its ability to fill gaps, it is suitable for rough or poor-quality metal surfaces.

| Order No. | Content ml | 986B LOCTITE | PU |
|---|---|---|---|
| 0025 | 25 | 16.50 (W978) | 6 |

## 2-component epoxy glue Loctite 3463

NEW

**Design:** Steel-filled, workable stick. Adheres to damp surfaces and below water. Can be drilled, filed and painted over.

**Application:** Emergency repairs for sealing leakages in pipes and tanks. For smoothing welded joints and repairing small cracks in cast parts.

| Order No. | Content g | 986C LOCTITE | PU |
|---|---|---|---|
| 0050 | 50 | 13.15 (W978) | 12 |

## Superglue Loctite 401

**Design:** Universal superglue, viscosity 100 mPa.s.

**Application:** Bonds virtually all plastics, elastomers, paper, cardboard, wood and metal. Especially suitable for porous materials.

| Order No. | Content g | 9866 LOCTITE | PU |
|---|---|---|---|
| 0003 | 3 | 4.11 | 12 |
| 0020 | 20 | 22.30 (W978) | 12 |

## Superglue Loctite 406

**Design:** Universal superglue, viscosity 20 mPa.s.

**Application:** Particularly suitable for bonding plastics.

| Order No. | Content g | 9877 LOCTITE | PU |
|---|---|---|---|
| 0020 | 20 | 25.60 (W978) | 12 |

## Superglue Loctite 415

**Design:** Powerful bonding and quick-curing. Viscosity 100 mPa.s.

**Application:** The product is particularly suitable for bonding metals and metal to plastic and rubber as well as for bonding porous and uneven parts.

| Order No. | Content g | 9868 LOCTITE | PU |
|---|---|---|---|
| 0021 | 20 | 27.60 (W978) | 12 |

## Superglue Loctite 416

**Design:** Universally applicable, viscosity 1200 mPa.s

**Application:** Suitable for universal applications.

| Order No. | Content g | 9869 LOCTITE | PU |
|---|---|---|---|
| 0021 | 20 | 27.40 (W978) | 12 |

## Superglue Loctite 454

**Design:** Universal instant adhesive gel, viscosity in gelatinous form, with P1 NSF Reg. No. 123009.

**Application:** Ideal for use on vertical and overhead surfaces. Bonds paper, wood, cork, foam, leather, cardboard, metal and plastic.

| Order No. | Content g | 9879 LOCTITE | PU |
|---|---|---|---|
| 0003 | 3 | on request | 12 |
| 0020 | 20 | on request (999) | 10 |

## Superglue Loctite 3090

NEW

**Design:** Universal instant adhesive gel, viscosity in gelatinous form.

**Application:** For porous materials like wood, paper, leather, cork and textiles.

| Order No. | Content g | 986D LOCTITE | PU |
|---|---|---|---|
| 0010 | 10 | 24.30 (W978) | 12 |

## Plastic primer Loctite 770

NEW

**Design:** Is used to pretreat polyolefins or other materials with a low surface energy so that they can be bound with adhesives.

**Application:** For tough-to-bond materials such as polyethylenes, polypropylenes, polytetrafluoroethylenes (PTFE) and thermo-plastic elastomers.

| Order No. | Content g | 986F LOCTITE | PU |
|---|---|---|---|
| 0010 | 10 | 32.30 (W978) | 10 |

## Thread sealant Loctite 542

**Design:** Medium strength pipe sealant, liquid. With DVGW approval (EN 751-1): NG–5146 AR0855.

**Application:** Ideal for precision-threaded metal connections with a thread size up to 3/4" in hydraulic and pneumatic systems, as well as for small threaded connections.

| Order No. | Content ml | 9885 LOCTITE | PU |
|---|---|---|---|
| 0010 | 10 | on request | 12 |
| 0050 | 50 | on request (999) | 12 |

## Flange sealing Loctite 574

NEW

**Design:** Multi-purpose, high tolerance to oil and very resistant to water and glycol.

**Application:** For the sealing of hard-to-reach connections between warp-resistant metal sealing and flange surfaces.

| Order No. | Content ml | 986G LOCTITE | PU |
|---|---|---|---|
| 0050 | 50 | 27.10 (W978) | 12 |

## Thread sealant Loctite 577

**Design:** Medium strength pipe sealant.

**Application:** Multi-purpose thread sealant for all normal metal threads and coarse threads up to 80 mm (3" ). Ideal for fast processing at low temperatures, e.g. for outdoor maintenance work. Seals immediately at low pressure. **Mit DVGW und WRC approval.**

| Order No. | Content ml | 9889 LOCTITE | PU |
|---|---|---|---|
| 0050 | 50 | 27.90 | 12 |
| 0251 | 250 | 126.00 (W978) | 10 |

## Thread pipe sealant Loctite 55

**Design:** Nylon thread, white coating.

**Application:** For sealing metal and plastic threads up to 6 inches in diameter in the domestic and industrial sectors. The thread pipe sealant can be used in contact with drinking water (hot and cold), gas, compressed air and industrial oils.
Complies with the requirements of the KTW recommendation for cold and hot water and is suitable for suitable for potable water up to +85 °C in accordance with BS 6920. Also via the **DVGW approval,** Reg. No. DV-5142 AU 0166, tested according to EN 751-2 (grade ARp) and DIN 30660.

## Retainer Loctite 603

**Design:** Oil-tolerant retaining product, firmness to touch after approx. 10 minutes.

**Application:** For bond gaps up to 0.1 mm. Fast-hardening and very strong. Tolerates low oil-based contaminants. Used for bonding of cylindrical fitting parts, particularly in those cases where clean surfaces cannot always be guaranteed. The product cures under air between close fitting metal surfaces and prevents loosening and leakage independent from shock and vibration. Typical applications include attaching roller bearings or oil impregnated bushings in bearing Shells. With WRC approval.

| Order No. | Content ml | 9871 LOCTITE | PU |
|---|---|---|---|
| 0050 | 50 | 52.70 (W978) | 12 |

## Retainer Loctite 638

**Design:** Very strong, multi-purpose retaining product, firmness to touch after approx. 5 minutes.

**Application:** For bond gaps up to 0.25 mm. Ideal for places where a high resistance to dynamic, axial and radial loads is required, such as in gears, pulleys and lots more. **Mit DVGW und WRC approval.**

| 0051 | 50 | on request (999,W978) | 12 |

## Flange sealing Loctite 5910

NEW

**Design:** Permanently elastic flange sealing for non-warp-resistant flanges and for plastic/plastic and metal/plastic combinations. Also suitable as replacement for solid sealants, very good resistance to vibrations.

**Applications:** For oilt tanks, housing lids, motors, gearboxes and water pumps.

| Order No. | Content ml | 9899 LOCTITE | PU |
|---|---|---|---|
| 0050 | 50 | 10.35 (W978) | 10 |

## Loctite 7061 Quick cleaner

NEW

**Design:** Solvent-based surface cleaner with an acetone base, vaporises very quickly.

**Application:** For degreasing and cleaning surfaces. Is used for final cleaning prior to assembly and to remove most greases, oils, liquid lubricants, metal chips and fine particles from the bonding surfaces.

| Order No. | Content ml | 9872 LOCTITE | PU |
|---|---|---|---|
| 0050 | 400 | 9.85 (W984) | 10 |

## Loctite 7063 Quick cleaner

**Design:** Solvent-based surface cleaner.

**Application:** For degreasing and cleaning surfaces to be bonded with LOCTITE® adhesives. The product can also be used to clean and degrease machine parts during maintenance works.

| Order No. | Content ml | 9872 LOCTITE | PU |
|---|---|---|---|
| 0100 | 400 | 12.40 (W978) | 12 |

## Loctite 7200 Quick cleaner

NEW

**Design:** Glue and sealant remover. For aluminium and other soft metal flanges with surfaces that could be damaged by scratching off the sealant.

**Application:** Removes hardened sealants and solid sealants.

| Order No. | Content ml | 9872 LOCTITE | PU |
|---|---|---|---|
| 0400 | 400 | 14.15 (W978) | 12 |

## Sealant

NEW

**Design:** Suitable for the effective sealing of metal to metal and plastic to plastic.

**Applicaiton:** Seals water and oil pumps, cylinder heads and oil tanks, motors and inlet distributors, gearbox and switchgear casing compenents, threads. Also suitable for the assembly of gas turbines, water-cooled generators and turbo vacuum systems, and for coating preformed seals.

| Order No. | Content ml | 9872 | PU |

## Reaction adhesive UHU PLUS SOFORTFEST

**Design:** Solvent-free two-component adhesive with an epoxy resin base, for fast bonding on small surfaces. The processing time is up to 2 minutes, firmness to touch is achieved after 5 minutes. End strength is 800 N/cm². The adhesive bond cures transparent, impact-resistant, non-aging and moisture resistant.

**Application:** Especially suited to fast bonding on small surfaces. For metal, glass, porcelain, wood, marble, stone, concrete, thermosetting plastic, glass fibre reinforced plastic, rigid PVC, rubber and lots more.

**Note:** Not suitable for polyethylene, polypropylene, polytetrafluoroethylene, polystyrene, soft PVC and adhesions on large glass surfaces.

UHU

## First Aid kit

Due to the new ASR A4.3 (Technical Regulation for workplaces) First Aid rooms, means and equipment for First Aid will be subject to guidelines for all workplaces. ASR A4.3 specifies requirements of the German Workplace Ordinance, such as the requirements for means and equipment for First Aid as well as First Aid rooms or the type and number of First Aid kits and their content to be provided. The technical regulations for workplaces (e.g. ASR A4.3) differentiate between large and small operational First Aid kits. The minimum content is described in table 2 of ASR A4.3. The standards DIN 13157 (small) and DIN 13169 (large) are comparable and can be considered basic equipment.

**Minimum number of First Aid kits to be provided**

| | | |
|---|---|---|
| Administration and Commercial operations | 1 to 50 employees | 1 × DIN 13157 |
| | 51 to 300 employees | 1 × DIN 13169 |
| | Each further 300 employees extra | 1 × DIN 13169 |
| Production and Processing operations | 1 to 20 employees | 1 × DIN 13157 |
| | 21 to 100 employees | 1 × DIN 13169 |
| | Each further 100 employees extra | 1 × DIN 13169 |
| Construction site | 1 to 10 employees | 1 × DIN 13157 |
| | 11 to 50 employees | 1 × DIN 13169 |
| | Each further 50 employees extra | 1 × DIN 13169 |

**A large First Aid kit DIN 13169 can also be replaced by two small First Aid kits DIN 13157. First Aid kits according to ASR A4.3 can also be deployed in the field service.**

## First-aid box, small, DIN 13157

**Design:** Orange, two same-size case shells with transparent cover plates for the protection of the content and all-round rubber seal. Variable internal compartments due to separators, can be sealed.

**Supplied:** In impact-resistant ABS plastic case with wall bracket with 90°stop arrest and content standard according to DIN 13157.

| Order No. | Design | 9946 format | Dimensions W x D x H mm |
|---|---|---|---|
| 0005 | First-aid box, DIN 13157 | on request | 260 x 170 x 110 |
| 1005 | Refill pack, DIN 13157 | on request (999) | – |

## First-aid box, large, DIN 13169

**Design:** Orange, two same-size case shells with transparent cover plates for the protection of the content and all-round rubber seal. Variable internal compartments due to separators, can be sealed.

**Supplied:** In impact-resistant ABS plastic case with wall bracket with 90°stop arrest and content standard according to DIN 13169.

| Order No. | Design | 9947 format | Dimensions W x D x H mm |
|---|---|---|---|
| 0005 | First-aid box, DIN 13169 | on request | 310 x 210 x 130 |
| 1005 | Refill pack, DIN 13169 | on request (999) | – |

## Eye wash station

**Design:** Dust-protected wall box with 2 x 0.5 l sterile eyewash bottles (according to DIN EN 15154-4), with identification eye rinse and mirror. In case of first-aid, kit is very easy and quick to open.

**Application:** Particularly suitable for use in workplaces where foreign bodies and dust and dirt accumulate. **Flushing time a total of about 10 minutes.**

| Order No. | Design | 9945 plum | Dimensions W x D x H mm |
|---|---|---|---|
| 0005 | Wall box | 51.00 | 227 x 110 x 265 |
| 0010 | Eye wash bottle 0.5 l | 13.45 (W998) | – |

October 2017

## Catalogue conditions

1. This catalogue is valid from 01.10.2017 to 30.09.2019. Following the expiration date particularly also all specified prices shall lose their validity. This also applies in case of the publication of a subsequent catalogue.

2. This catalogue is exclusively designed for commercial purposes.

3. All specified prices are subject to change and plus statutory VAT. We have to reserve the right to charge the prices applicable at the date of delivery in the event of changes in the market place.

4. Unless otherwise stated, the price is applicable for each single product. If package units are marked with Δ , the goods can just be offered within the stated packaging unit. In case of larger purchasing quantities, an individual quote may be neessary.

5. This catalogue is protected by copyright. Any reprinting, also in excerpts, is only admissible with the explicit consent of the author.

6. Images used in the catalogue may deviate from the original product. We are not liable for possible printing errors, product changes due to technical development and changes of the model. Due to print-technical reasons, also the colours in the catalogue may deviate from the original colour of the products.

7. For the remainder, all order processing and deliveries are based on our terms of sales, service and payment.

**All prices quoted in this catalogue are recommended retail prices of EDE International AG.**

**3D Probe** . . . . . 3/123–3/125
3D Probe – Dial . . . . . 3/124–3/125
3D Probe – Digital . . . . . .3/123

# A

**Abrasives** . . . . . 8/45–8/47, 8/51–8/57
. . . . . 8/62–8/66, 8/80–8/90
**Abrasive**
Abrasive Bands, Aluminium Oxide . . . .8/55
Abrasive Bands, Ceramic . . . . . .8/55
Abrasive Bands, Zirconia Alumina . . . .8/55
Abrasive Sleeves . . . . . .8/65
Hand Pads . . . . . .8/62
Non-Woven Abrasive Roll. . . . . 8/62–8/64
Non-Woven Abrasive Sleeves. . . . . .8/65
Polishing Star. . . . . .8/57
**Abrasive Accessories**
Abrasive Cap . . . . . .8/57
Abrasive Cap Holder . . . . . .8/56
Arbors. . . . . 8/56–8/57
Arbors for Coarse Cleaning Disc. . . . . .8/54
Clamping Disks for
Filet Weld Fleece Grinding Disc . . . . . .8/51
Grinding Roll . . . . . .8/56
Hand Block. . . . . .8/62
Hand Pad . . . . . .8/90
Holders for Abrasive Bands, Cylindrical8/55
Madrel . . . . . .8/64
Mandrel for Coarse Cleaning Disc . . . .8/53
**Abrasive Cleaning Disc**
Coarse Cleaning Disc Arbor . . . 8/53–8/54
Coarse Cleaning Disc with
Fibreglass Underlay . . . . . .8/52
High Performance Abrasive
Bristle Disc. . . . . .8/54
**Abrasive Mop Disc**
Abrasive Flap Disc for Stainless Steel,
Ceramic Grain . . . . . .8/47
Abrasive Flap Disc for Stainless Steel,
Zirconia Alumina . . . . . .8/46
Abrasive Flap Disc,
Zirconia Alumina . . . . . 8/45–8/46
Angle Grinder Flap Disk . . . . . .8/51
Combi Abrasive Flap Disc for
Stainless Steel. . . . . .8/47
Non-Woven Polishing Flap Wheel . . . .8/66
Non-Woven Wheel . . . . . .8/66
Polishing Flap Wheel. . . . . .8/66
**Mounted Point**
Aluminium Oxide Mounted Point
Set Assorted Shapes. . . . . .8/82
Arch-Pointed Nose
Mounted Point . . . . . 8/80–8/81
Ball Mounted Point . . . . . .8/81
Conical Mounted Point . . . . . .8/81
Cylindrical Aluminium Oxide Mounted Point
for Stainless Steel . . . . . .8/83
Cylindrical Mounted Point. . . . . .8/80
Diamond Mounted Ball Shape . . . . . .8/84
Diamond Mounted Cylindrical Shape. . .8/84
Fine Mounted Point Cyclindrical Shape 8/83
High Grade Aluminium Oxide
Mounted Point . . . . . .8/80, 8/82
Tool Grinding Mounted Point
Cylindrical. . . . . .8/81
**Polishing Tools**
Felt Disc . . . . . .8/88
Felt Point . . . . . .8/88
Finishing Mop . . . . . .8/89
Polishing Mop . . . . . .8/89
**Sharpening Stones**
Aluminium Oxide Oil Stone. . . . . .8/85
Hard Arkansas Oil Stone. . . . . .8/86
Sharpening Oil Stone . . . . . .8/86
Sharpening stone Assorted Shapes. . .8/86
Silicon Carbide Oil Stone . . . . . .8/85
**Wetstone**
Diamond Wetstone . . . . . .8/88
Original Hard Arkansas Natural Stone 8/87
Silicon Carbide Wetstone . . . . . .8/87
Super Arkansas Block Wetstone . . . . .8/87
Wetstone Japanese Type . . . . . .8/88

**Adhesives** . . . . . 9/119–9/126
**Accessories**
Applicator Gun. . . . . .9/121
Mixer . . . . . .9/121
Tape Dispenser . . . . . .9/124
**Adhesive Tape**
Aluminium Adhesive Tape . . 9/122, 9/125
Carpet Tape . . . . . .9/126
Caution Glass Tape . . . . . .9/123
Double Side Adhesive Tape . . . . . .9/122

Fabric Adhesive Tape . . . . . 9/124–9/125
Hook/Loop Fastener . . . . . .9/126
Masking Tape . . . . . 9/123, 9/126
Packing Tape . . . . . .9/122
Paper Adhesive Tape. . . . . .9/126
PVC Packing Tape . . . . . .9/123
PVC Warning Tape . . . . . .9/123
Tartan Adhesive Tape . . . . . .9/125
Woven Adhesive Tape. . . . . .9/122

**Adhesive Tape Dispenser**
Tape Dispenser . . . . . .9/124

**Adhesives**
Adhesive Cleaner. . . . . .9/120
Adhesive UHU . . . . . 9/120–9/121
Hot Adhesive Cartridge . . . . . .9/119
Hot Adhesive Gun . . . . . .9/119
Strong Adhesive . . . . . .9/119
Strong Adhesive Gel . . . . . .9/119

**Aerosols** . . . . . .9/95–9/104, 9/109–9/110

**Aerosol**
Aluminium Spray. . . . . .9/96
Anti-Seize Metal Lubrication. . . . . .9/103
Brake Cleaner. . . . . .9/109
Chain Adhesive Spray . . . . . .9/101
Compressed Air Spray . . . . . .9/99
Construction Site Marker Spray . . . . . .9/97
Contact Cleaner . . . . . 9/98–9/99
Cutting Oil Spray . . . . . 9/103–9/104
Freeze Spray . . . . . .9/99
High-Pressure Adhesive Grease . . . . .9/101
Label Remover Solvent . . . . . .9/100
Leak Locator. . . . . .9/99
Multi-Purpose Grease . . . . . .9/102
Primer Spray . . . . . .9/96
PTFE Spray. . . . . .9/103
Rust Remover . . . . . .9/98
Rust Spray . . . . . .9/97
Separating Spray. . . . . .9/97
Silicone Spray . . . . . 9/97–9/98
Spray Grease . . . . . 9/98, 9/102
Stainless Steel Cleaner . . . . . .9/109
Stainless Steel Spray . . . . . .9/96
Universal Cleaner. . . . . .9/98
Universal Foam Cleaner. . . . . .9/110
WD-40 . . . . . .9/98
WD-40 Specialist . . . . . .9/98
Zinc Powder Paint . . . . . .9/96
Zinc Spray . . . . . 9/95–9/96

**Air Tools** . . . . . 9/58–9/78, 9/89

**Air Tool Accessories**
Automatic Hose Reel. . . . . .9/67
Ball Valve . . . . . .9/70
Compressed Air Coupling . . . . . .9/59
Compressed Air Fitting . . . . . 9/60–9/62
Coolant Hose System . . . . . 9/73–9/77
Coupling Packet. . . . . .9/69
Filter . . . . . .9/68
Filter Element for Multi-Fix Range . . . .9/69
Filter Regulator . . . . . .9/68
Holding Bracket . . . . . .9/69
Hose Clamp . . . . . .9/66
Hose Clips . . . . . .9/66
Hose Holder. . . . . .9/65
Maintenance Unit,
Two-Piece Multi-Fix Range . . . . . .9/68
Mist Lubricator. . . . . 9/69–9/70
Plastic Compressed-Air Hose Reel . . . .9/67
Pressure Gauge . . . . . .9/70
Pressure Regulator with Manometer . .9/68
PVC Braided Hose . . . . . .9/64
PVC Compressed-Air Hose . . . . . .9/64
Quick Coupling . . . . . .9/58
Spiral Hose. . . . . .9/63

**Air Tools**
Blow Grease Guns . . . . . 9/71–9/72
Compressed Air Grease Gun. . . . . .9/89
Compressed Air Grease Gun,
Automatic. . . . . .9/89
Hand Tyre Gauges . . . . . .9/71
Simple Spray System . . . . . .9/78
Spray Gun . . . . . .9/71

**Automotive Tools** . . . . . 6/234–6/239

**Automotive Pliers**
Brake Spring Pliers . . . . . .6/234
Cross Wrenches . . . . . .6/239
Hose Clamp Pliers . . . . . .6/235
Oil Filter Wrenches . . . . . .6/236
Spring Clip Pliers. . . . . .6/234
Strap Wrenches. . . . . 6/235–6/236

**Automotive Specialist Tools**
Assembly Levers . . . . . .6/239
Automotive Bending Irons. . . . . .6/237
Automotive Crow Bar Sets . . . . . .6/237
Automotive Crow Bars . . . . . .6/237
Battery Acid Testers . . . . . .6/237
Knee Boards. . . . . .6/238
Roller Boards . . . . . .6/238
Rolling Head Crowbars . . . . . .6/237

**Axes and Hatchets** . . . . . .7/54
Ash Handled Axes and Hatchets . . . . .7/54
Wood Splitting Axe / Hammer . . . . . .7/54

# B

**Batteries** . . . . . .4/13, 9/6, 9/12
Batteries/Rechargeable . . . . . .9/6, 9/12
Charger/Adapter . . . . . .9/6
Replacement CR Batteries . . . . . .4/13

**Bench Centres** . . . . . .4/104
Bench Centre with Disk Blocks. . . . . .4/104
Sliding Bench Centre. . . . . .4/104
Tailstock for Bench Centre . . . . . .4/104

**Blacksmiths Tools** . . . . . .5/96, 7/21
45° Welting Tongs . . . . . .7/21
90° Welting Tongs . . . . . .7/21
Blacksmiths Tongs . . . . . .5/96
Straight Welting Tongs. . . . . .7/21

**Blowtorch** . . . . . .9/29

**Blowtorch**
Multi-Purpose Blowtorch . . . . . .9/29

**Blowtorch Accessories**
Bunsen Burner. . . . . .9/29
Burners & Accessories . . . . . .9/29
Disposable Cartridge . . . . . .9/29

**Bolt Cutters.** . . . . . 5/97–5/98
Bolt Cutters . . . . . .5/98
Compact Bolt Cutters . . . . . .5/97
Steel Wire Mesh Cutter. . . . . .5/98

**Bore Gauges** . . . . . 4/39–4/45

**Bore Gauges / Micrometres**
Bore Gauges Analogue
3 and 4 Point . . . . . 4/41–4/42
Bore Gauges and Set. . . . . 4/42–4/43
Bore Gauges Digital
3 and 4 Point . . . . . 4/43–4/45
Dial Bore Gauge. . . . . .4/39
Inside Bore Gauge Set. . . . . 4/40–4/41
Setting Device For Bore Gauge. . . . . .4/40

**Broaching Tools** . . . . . 2/149–2/151

**Keyway Push Type**
Guide Bushing . . . . . 2/149–2/150
Keyway Broach Set . . . . . .2/151
Keyway Push-Type Broach I . . . . . .2/149
Keyway Push-Type Broach II. . . . . .2/149
Keyway Push-Type Broach III . . . . . .2/149
Keyway Push-Type Broach IV . . . . . .2/150
Keyway Push-Type Broach V . . . . . .2/150
Keyway Push-Type Broach VI . . . . . .2/150
Spare Shim . . . . . 2/149–2/150
Square Broach. . . . . .2/151

**Brushes** . . . . . 7/2–7/9, 8/59–8/61,8/64
. . . . . 9/19–9/20, 9/22–9/24, 9/35
Broom Handle . . . . . 9/23
Broom Head . . . . . 9/23
Bucket . . . . . 9/24
Dustpan . . . . . 9/24
Hand Brush . . . . . 9/24
Metal Handle Holder . . . . . 9/23
Paint Brush . . . . . 9/19–9/20, 9/22
Soldering Fluid Brush . . . . . 9/35
**Flap Brushes**
Flap Brushes, Coarse . . . . . 8/64
Non-Woven Flap Brush . . . . . 8/59–8/61
**Honing Brushes**
Honing Brushes . . . . . 7/3
**Radial Bristle Brushes**
Radial Bristle Brush . . . . . 7/6
**Silicone Brushes**
Silicone Carbide Brushes . . . . . 7/6–7/7
**Wire Brushes**
Bevel Brush . . . . . 7/6
Cup Brushes . . . . . 7/4, 7/8
De-Carb Brushes . . . . . 7/9
File Brushes . . . . . 7/2
Hand Wire Brushes . . . . . 7/2
Plastic Handle Hand Scratch Brushes . . 7/2
Rotary Wire Brushes . . . . . 7/5
Spark Plug Brushes . . . . . 7/2
Spindle Mounted Wire Brushes . . . . . 7/7
Tube Brushes . . . . . 7/3
Twist Knot Wire Brushes . . . . . 7/5
Weld Brushes . . . . . 7/2

**Burrs** . . . . . 8/69–8/75, 8/77–8/79
**Burr Accessories**
Spindle . . . . . 8/79
**Carbide Burrs**
Angle Shape WKN . . . . . 8/71–8/73
Ball Shape . . . . . 8/70, 8/73
Conical Pointed . . . . . 8/70, 8/74
Conical Shape with Radius End KFL . . . 8/71
Cylindrical Drum WRC . . . . . 8/69, 8/73
Cylindrical ZYA,
with End-Tooth System . . . . . 8/69, 8/73
Cylindrical ZYA,
without End-Tooth System . . . . . 8/69, 8/72
Drop Shape . . . . . 8/70, 8/73
Flame Shape B . . . . . 8/71, 8/74
Pointed Tree Shape . . . . . 8/70, 8/74–8/75
Round Arch Sharpe RBF . . . . . 8/71, 8/74
Tungsten Carbide Burr . . . . . 8/75
Tungsten Carbide Burr Set . . . . . 8/72
**HSS Burrs**
Angle Shape HSS 63 . . . . . 8/78
Ball Shape F . . . . . 8/78
Club Shape HSS 64 . . . . . 8/78
Conical Pointed G . . . . . 8/78
Conical Shape with Radius End L . . . . . 8/77
Cylindrical Shape A
with End-Tooth System . . . . . 8/77
Drop Shape O . . . . . 8/78
Drum Shape C . . . . . 8/77
HSS Burr Set . . . . . 8/79
HSS Engraving Point . . . . . 8/79
HSS Light Metal Burr . . . . . 8/79
Pointed Tree Shape . . . . . 8/77

# C

**Cable** . . . . . 9/2–9/6
Extension Cables . . . . . 9/5–9/6
Extension Sockets . . . . . 9/4–9/5
Reels . . . . . 9/2–9/4

**Cable Connectors** . . . . . 5/69, 5/71–5/72
Cable Lug / Cable Connector
Assortment . . . . . 5/69
Crimping Set
for Cable Connectors . . . . . 5/71–5/72
Mounting Tool for MC3 Connectors . . . 5/72

**Cable Shears** . . . . . 5/48–5/52
Bowden Cable Cutters . . . . . 5/52
Cable Shears . . . . . 5/48–5/49, 5/51
Cable Shears – Offset . . . . . 5/48
Cable Shears
with Telescopic Arm . . . . . 5/50–5/51
KT45/KT55 Cable Shears . . . . . 5/51
VDE Cable Shears . . . . . 5/49–5/50
VDE Cable Shears – Offset . . . . . 5/49
Wire Rope & Cable Shears . . . . . 5/52
Wire Rope Shears . . . . . 5/52

**Cable Tie Tools** . . . . . 5/86, 5/88–5/89
Cable Laying System . . . . . 5/86
Cable Tie Puller . . . . . 5/88–5/89
Heat Shrinks . . . . . 5/89

**Cable Ties** . . . . . 5/87–5/88
Assorted Cable Ties . . . . . 5/87
Cable Ties . . . . . 5/87
Cable Ties – Detachable . . . . . 5/88
Cable Ties – ‚Speedy' Detachable . . . . 5/88
Cable Ties with Steel Tips . . . . . 5/88

**Cable Tools** . . . . . 5/86
Cable Puller . . . . . 5/86

**Calipers** . . . . . 4/60–4/61, 4/94, 4/13–4/17
. . . . . 4/6–4/12, 4/18–4/20, 4/24, 4/26
**Caliper Gauges**
Digital/Analogue Caliper Gauges . . . . . 4/61
Inside Groove Caliper Gauges . . . . . 4/60
**Calipers**
Caliper Accessories . . . . . 4/13, 4/24, 4/26
Compass Vernier Caliper . . . . . 4/94
Dial Calipers . . . . . 4/8
Digital Pocket Calipers . . . . . 4/8–4/12
Digital Workshop Calipers . . . . 4/17–4/20
Vernier Pocket Calipers . . . . . 4/6–4/8
Wooden Cases For Calipers . . . . . 4/17
Workshop Calipers . . . . . 4/14–4/20

**Carbide Rod** . . . . . 2/136
Carbide Rod . . . . . 2/136
Engraving Blank . . . . . 2/136

**Carpenters Tools** . . . . . 7/53–7/54
Carpenters Mallets . . . . . 7/54
Carpenters Set . . . . . 7/53
Carpenters Square . . . . . 7/53
Marking Gauges . . . . . 7/53
Precision Bevel . . . . . 7/53
Stainless Marking Out Device . . . . . 7/54

**Centering Devices** . . . . . 3/125
Precision Centering Device –
CENTRO . . . . . 3/125

**Chisel Hand Protection**
**(Metal Working)** . . . . . 6/210, 7/52–7/53
Universal Chisel Hand Protector . . . . . 6/210
**Wood Chisels**
Wood Chisel Set . . . . . 7/53
Wood Chisel with Two Blades . . . . . 7/52
Wood Chisels . . . . . 7/52–7/53

**Chisels** . . . . . 5/144, 6/208–6/210
Non-Arcing Chisel . . . . . 5/144
**Chisels for Metal Working**
Cross Chisels . . . . . 6/208
Electricians Chisels . . . . . 6/209
Flat Chisels . . . . . 6/208
Grooving Chisels . . . . . 6/210
Joint Chisels . . . . . 6/209
Parting Chisels . . . . . 6/210
Slot & Body Chisels . . . . . 6/209
Splitting Chisels . . . . . 6/209
Tile Chisels . . . . . 6/209

**Circle Cutter** . . . . . 1/105
Circle Cutter . . . . . 1/105
Circle Cutter Accessories . . . . . 1/105

**Clamps and Clamp Accessories** . . . . . 3/154–3/156, 3/158–3/185, 5/7–5/15
**Accessories**
Clamping Base . . . . . 3/185
Correction Wedge . . . . . 3/168
Correction Wedge – Precision Height 3/169
Notched Clamping Lever . . . . . 3/164
Screw Jack – Heavy Duty . . . . . 3/167
Screw Jack with Flat Support . . . . . 3/166
Screw Jack with Locking Nut . . . . . 3/167
Screw Jack with Magnetic Base . . . . . 3/166
Stepped Packing – Block . . . . . 3/165
Stepped Packing – Universal . . . . . 3/165
Stepped Packing Universal – Set . . . . 3/165
T-Bar Spanner . . . . . 3/185
**Clamps**
All Steel Screw Clamp . . . . . 5/9–5/10
Angle Clamp for Metal . . . . . 5/15
C Screw Clamp . . . . . 5/15
Cast Iron Clamp . . . . . 5/8
Clamp – Bevelled with Adjustable Screw Support . . . . . 3/164
Clamp – Fork – Bevelled . . . . . 3/163
Clamp – Forked with Nose . . . . . 3/163
Clamp – Stepped . . . . . 3/162, 3/164
Clamp – Straight . . . . . 3/162
Clamp – Swan Necked . . . . . 3/162
Clamp – Swan Necked with Adjustable Screw Support . . . . . 3/164
Clamping Claw – Adjustable . . . . . 3/169
Clamping Claw – Deep . . . . . 3/170
Clamping Claw – Stable . . . . . 3/169
Clamping Sets . . . . . 3/154–3/155
Clamps – Compact . . . . . 3/185
Clamps – Flat . . . . . 3/170
Clamps – Machine Table . . . . . 3/184
Clamps – Toggle . . . . . 3/171–3/183
Construction Screw Clamp . . . . . 5/13
Deep Jaw Screw Clamp . . . . . 5/8
Edge Clamp . . . . . 5/9
Grappler Clamp . . . . . 5/14
High Performance Clamp . . . . . 5/13–5/14
Lightweight Screw Clamp . . . . . 5/9
Locksmiths Screw Clamp . . . . . 5/13
Machine Hand Vice . . . . . 5/7
Magnesium Lever Clamp . . . . . 5/11
Mechanical Collets . . . . . 3/156
MITEE-BITE Clamp Claw with Eccentric Screw Down . . . . . 3/159
MITEE-BITE Clamping Mandrel XPA . 3/160
MITEE-BITE Double Wedge Clamp . . 3/159
MITEE-BITE Eccentric Tension Clamp 3/158
MITEE-BITE Eccentric Tension Clamp with T-Slot Nut . . . . . 3/158
MITEE-BITE Tension Clamp – Pitbull . 3/161
Parallel Clamp . . . . . 5/15
Parallel Screw Clamp . . . . . 5/7
Power Clamps . . . . . 3/182–3/183
Pressure Plates for Screw Clamp . . . . . 5/10
Ring Hand Vice . . . . . 5/7
Single Hand Clamp . . . . . 5/11–5/12
Single Hand Edge Clamp . . . . . 5/9
Standard Hand Vice . . . . . 5/7
Steel Lever Clamp . . . . . 5/11
Surface Clamp . . . . . 5/15
Tapered Hand Vice . . . . . 5/7
U Screw Clamp . . . . . 5/14
U Screw Clamp – High Performance . . 5/14
Variable Clamping Attachment . . . . . 5/10

Metric Button Die – Solid . . . . . 1/225
Metric Button Die Left Hand – Solid . 1/225
Metric Button Die Set – Solid. . . . . 1/225
Metric Die Nut . . . . . 1/226
Metric Fine Button Die – Solid . . . . . 1/226–1/227
NPT Button Die – Solid . . . . . 1/229
PG Button Die – Solid . . . . . 1/228
UNC Button Die – Solid . . . . . 1/229
UNF Button Die – Solid. . . . . 1/229

**Disc Cutter** . . . . . 7/21
Plastic Handle Disc Cutter. . . . . 7/21
Spare Blade for Disc Cutter . . . . . 7/21
Spare Blade Holder for Disc Cutter . . . 7/21

**Dividers and Calipers**. . . . . 4/93
Dividers . . . . . 4/93
Inside and Outside Calipers . . . . . 4/93
Spring Dividers . . . . . 4/93

**Drill Chucks**. . . . . 3/30–3/35, 3/51
**Accessories**
Chuck Adaptor Mount. . . . . 3/34
Chuck Release Fork . . . . . 3/34
Drill Chuck Shanks . . . . . 3/35
Replacement Jaws . . . . . 3/35
SDS plus Mounting Shank . . . . . 3/30
**Keyless**
Heavy Duty Keyless – Taper Mount . . . 3/31
Keyless – Morse Taper Shank . . . . . 3/34
Keyless – Taper Mount . . . . . 3/31
Keyless – Taper Mount – Clamping Safety Device . . . . . 3/32
Keyless – Taper Mount – High Performance . . . . . 3/33–3/34
Keyless – Threaded Mount . . . . . 3/31
Keyless – Threaded Mount – Clamping Safety Device . . . . . 3/32
Keyless – Threaded Mount – Radial Locking . . . . . 3/32–3/33
Precision Keyless – Taper Mount . . . . . 3/32
**Micro Universal Drill Chuck**
Micro Universal Chuck . . . . . 3/51
**Sprocket Chuck**
Impact Resistant – Taper Mount . . . . . 3/30
Impact Resistant – Threaded Mount . . 3/30
Prima – 1/4" A/F Hexagon Drive . . . . . 3/30
Prima – SDS Plus Drive. . . . . 3/30
Replacement Key – Sprocket Chuck . . 3/31

**Drilling** . . 1/8–1/47, 1/49–1/57, 1/60–1/99 . . . . 1/231, 2/159–2/160, 2/187–2/188 . . . . . 5/136–5/137, 6/153
**Centre Drills**
Centre Drill . . . . . 1/53, 1/55
Centre Drill – Long Series. . . . . 1/54
Centre Drill – Protected Form . . . . . 1/55
Centre Drill – Radius Form . . . . . 1/54, 1/56
**Glass Drill**
Glass Drill QuickBit CeramiMaster . . . . 1/90
Glass Drill QuickBit CeramiMaster – Set . . . . . 1/90
**HSS / HSCo**
Tool Selection and Data . . . . . 1/2–1/7
1:50 Taper Drill . . . . . 1/36
Blacksmiths Drill . . . . . 1/15
Double Ended Stub Sheet Metal Drills. . 1/9
Drill with 1/4" A/F Hexagon Shank. . . . . 1/8, 6/153
Drill with 1/4" A/F Hexagon Shank Set. . . . . 1/8, 6/153
Empty Drill Boxes and Trays . . . . . 1/25
Jobber Drill Set – Rolled. . . . . 1/15
Jobber Drill Sets – Profile Ground . . . . . 1/17, 1/19

Jobber Drills – Rolled . . . 1/14–1/15, 1/24
Jobber Drills and Jobber Drill Sets . . 1/20–1/24, 1/26–1/36
Long Series Drills – Profile Ground . . . . . 1/37–1/38
Long Series Drills – Rolled . . . . . 1/37
Long Series Jobber Drills . . . . . 1/37–1/41
Micro Drills. . . . . 1/8
Stub Drills and Stub Drills Sets . . . . . 1/13, 1/9–1/12
Taper Shank Core Drill . . . . . 1/45
Taper Shank Drill – Bushing Length . . 1/44
Taper Shank Drill – Profile Ground . . . . . 1/42–1/43
Taper Shank Drill – Rolled . . . . . 1/41
Taper Shank Extra Long Series Drill. . . 1/46
VOLKEL Drill with 1/4" A/F Shank Set . . . . . 1/8, 6/153
**Masonry and Wall Drills**
Masonry and Wall Drill . . . . . 1/90
Masonry and Wall Drill Set. . . . . 1/90
**Milling Stepped Drills**
Drill Saw. . . . . 1/99
Milling Stepped Drills . . . . . 1/99
**Replacement HT800 Insert**
Accessories for HT800 WP . . . . . 1/50, 5/136–5/137
Replacement Insert Drill Bodies . . . . . 1/47
Replacement Inserts HT800 WP 1/49–1/50
**SDS Hammer Drills**
SDS Hammer Drill Accessories . . . . . 1/87–1/88, 1/91
SDS Max Hammer Drill. . . . . 1/86
SDS Max Hammer Drill – TriJet. . . . . 1/86
SDS Plus Hammer Drill . . . . . 1/83–1/84
SDS Plus Hammer Drill – Sets . . . . . 1/84

SDS Plus Hammer Drill – TriJet . . . . . 1/85
SDS Plus Hammer Drill – TriJet Sets . . 1/85
**Sheet Metal Drills**
Precision Sheet Metal Drill . . . . 1/94–1/95
Precision Sheet Metal Drill – Sets . . . . . 1/94–1/95
Universal Stepped Drills . . . . . 1/96–1/98, . . . . . 1/231, 6/153
Universal Stepped Drills – Sets . . . . . 1/96–1/98, 6/153
**Solid Carbide**
Tool Selection and Data . . . . . 1/58–1/59
142° Spot Drill . . . . . 1/60
3 Flute Solid Carbide Drill . . . . . 1/82
90° Spot Drill . . . . . 1/60
Carbide Tipped Drill . . . . . 1/61
Centre Drill . . . . . 1/60
Gun Drills . . . . . 1/80–1/81
Jobber Drill . . . . . 1/64–1/65, 1/69
Solid Carbide Drill SuperLine 3 x D . . . . . 1/66–1/68
Solid Carbide Drill SuperLine 5 x D . . . . . 1/71–1/74
Stub Drill for Hard Materials . . . 1/66–1/69
Stub Drills . . . . . 1/62–1/63
Through Coolant Carbide Drill 20 x D . 1/79
Through Coolant Carbide Drill 25 x D . 1/79
Through Coolant Carbide Drill 30 x D . 1/80
Through Coolant Carbide Drill 5 x D . . . . . 1/74–1/75
Through Coolant Carbide Drill SuperLine 12 x D . . . . . 1/78
Through Coolant Carbide Drill SuperLine 3 x D . . . . . 1/66–1/68
Through Coolant Carbide Drill SuperLine 5 x D . . . . . 1/71–1/75
Through Coolant Carbide Drill SuperLine 7 x D . . . . . 1/76–1/77
Through Coolant Carbide Drill VA 4 x D . . . . . 1/69–1/70
Through Coolant Carbide Small Fitting Drill 5 x D . . . . . 1/71
**Spot Drills**
120° Spot Drill . . . . . 1/57
120° Spot Drill – Long Series . . . . . 1/57
90° Spot Drill . . . . . 1/56
90° Spot Drill – Long Series . . . . . 1/57
**Stone and Concrete Drills**
Concrete and Natural Stone Drill ProXtreme . . . . . 1/89
Concrete and Natural Stone ProXtreme Set . . . . . 1/89
Stone and Concrete Drill . . . . . 1/89
Stone and Concrete Drill Set . . . . . 1/89
**Subland Drills**
180° Multiple Twist Stepped Drill for Through Holes . . . . . 1/52
180° Short Stepped Drill for Through Holes . . . . . 1/51
90° Multiple Twist Stepped Drill for Core Holes . . . . . 1/52
90° Multiple Twist Stepped Drill for Through Holes . . . . . 1/52
90° Short Stepped Drill for Thread Core Holes . . . . . 1/51
90° Short Stepped Drill for Through Holes . . . . . 1/51
Multiple Twist Stepped Drill . . . . . 1/52
Short Stepped Drill . . . . . 1/51
**U-Drill**
Tool Selection and Data . . . . . 2/186
Eccentric Sleeve For U-Drill . . . . . 2/187
U-Drill Body x 3D . . . . . 2/187
U-Drill Inserts . . . . . 2/159–2/160, 2/188
**Woodworking Drills**
Formwork Drill . . . . . 1/93
Forstner Drill Bit . . . . . 1/93
LEWIS Auger . . . . . 1/92
Wood Drill . . . . . 1/92
Wood Drill – Set . . . . . 1/92
Wood Drill Countersink Attachment . . . 1/92

Hand Lever Grease Gun . . . . . 9/80
High-Pressure Grease Gun . . . . . 9/79
Machine Positioning Element . . . . . 9/79
Suction & Pressure Spray . . . . . 9/79

**Grease Gun Accessories**
Accessories for Hand Lever Grease Gun . . . . 9/80–9/81
Grease Filler Pump . . . . . 9/88

**Grinding** . . . 8/2–8/7, 8/17, 8/8–8/11, 8/19 . . . . . 8/27–8/30, 8/32–8/36, 8/41–8/42 . . . . . 8/47–8/53, 8/58–8/59, 8/90–8/91

**Cup Wheel**
Cup Wheel . . . . . 8/3, 8/17, 8/19
Diamond Cup Wheel . . . . . 8/3

**Dressing Tools**
Diamond Dressing Tool . . . . . 8/4
Diamond Multi-Grain Dressing Tool . . . . 8/4
Diamond Multi-Point Dressing Tool . . . . 8/5
Diamond Single-Point Dressing Tool . . . 8/5
Grinding Wheel Dressing Stone . . . . . 8/3
Grinding Wheel Dressing Tool . . . . 8/4–8/5
Sharpening Stone for Diamond and CBN Wheels . . . . . 8/4

**Grinding Disc**
Compact Grinding Disc . . . . . 8/53
Deburring Disc, Perforated . . . . . 8/33
Fibre Grinding Disc Ceramic Grain . . . . 8/33
Fibre Grinding Disc for Stainless Steel Work . 8/32, 8/41–8/42
Fibre Grinding Disc for Steel Working . . . . . 8/32, 8/41–8/42
Fibre Grinding Disc, Aluminium Oxide . . . . . 8/27–8/28
Fibre Grinding Disc, Ceramic Grain . . . . 8/29
Fibre Grinding Disc, Ceramic Grit with Zirconia Alumina Admixture . . . . . 8/28
Fillet Weld Fleece Grinding Disc . . . . . 8/51
Finishing & Deburring Disc . . . . . 8/90
Flap Grinding Disc, Aluminium Oxide . . 8/47
Flap Grinding Disc, Aluminium Oxide Cool . . . . . 8/48
Flap Grinding Disc, Ceramic Grain-Cool . . . . . 8/49–8/50
Flap Grinding Disc, Cubitron . . . . . 8/51
Flap Grinding Disc, Zirconia Alumina . . . . . 8/48–8/50
Flap Wheel for Steel, Wood & Synthetics . . . . . 8/58
Fleece Flap Wheel . . . . . 8/52
Green Corps Rough Grinding Disc . . . . . 8/9
Grinding Wheel CC-Grind (Elasticated) 8/10
Grinding Wheel CC-Grind Solid (Elasticated) . . . . . 8/11
Roloc Fleece Disc Cubitron . . . . . 8/42
Rough Grinding Disc for Aluminium . . . 8/10
Rough Grinding Disc for Stainless Steel . . . . . 8/7–8/9
Rough Grinding Disc for Steel . . . . . 8/6
Rough Grinding Disc for Steel and Cast Processing . . . . . 8/9
Special Flap Wheel for Stainless Steel Work . . . . . 8/58–8/59

Standard Velcro-Fleece Disc with Centring . . . . . 8/35
Velcro Grinding Disc, Aluminium Oxide . . . . . 8/34
Velcro Grinding Disc, Perforated . . . . . 8/36
Velcro Grinding Disc, Zirconia Alumina 8/34
Velcro-Fleece Discs with Centring . . . . 8/35
Velcro-Fleece Grinding Disc, Aluminium Oxide . . . . . 8/34
**Grinding Disc Accessories**
Adhesive Backing Pads . . . . . 8/36
Adhesive Backing Pads with Centring 8/35
Backing Pad . . . . . 8/30, 8/41
Hand Sanding Disc . . . . . 8/36
Holder for Fibre Grinding Discs . 8/30, 8/41
Interface Pad . . . . . 8/36
Velcro Backed Pad . . . . . 8/35
**Grinding Wheel**
Grinding Wheel . . . . . 8/2
**Grinding Wheel Accessories**
Backing Pad . . . . . 8/33
Backing Pad for Fibre Grinding Disc . . 8/32
Backing Pads for CC-Grind . . . . . 8/10
Backing Pads for Green Corps Rough Grinding Disc . . . . . 8/9
Reducing Bush . . . . . 8/2
**Lapping/Grinding Paste**
Grinding & Polishing Compound . . . . . 8/91
Grinding Compound, Oil-Soluble . . . . . 8/91
Lapping & Grinding Paste . . . . . 8/90

**Guillotines . . . . . 7/17–7/18**
Guillotine . . . . . 7/17
Sheet Metal and Round Steel Guillotine . . . . . 7/18
Spares for Guillotine . . . . . 7/18

# H

**Hacksaw Frames & Hacksaw Blades . . . . . 6/192–6/194**
**Hacksaw Blades**
Hacksaw Blades . . . . . 6/194
Hacksaw Blades for Universal Saw . . 6/192
**Hacksaw Frames**
Hacksaw Frames . . . . . 6/192–6/193
Mini Hacksaws . . . . . 6/193
Universal Saw Frames . . . . . 6/192

**Hammers & Hammer Handles . . . . . 5/143, 6/195–6/206, 9/37**
**Hammer Handles**
Hammer Handle Ring Wedges . . . . . 6/200
Hammer Handle Wedges . . . . . 6/200
Machinist's Hammer Replacement Handles . . . . . 6/195, 6/200
Masonry Hammer Replacement Handles . . . . . 6/197–6/198
Plastic Hammer – Replacement Handles . . . . . 6/202
Sledge Hammer Replacement Handles . . . . . 6/200
Soft Faced Hammer Replacement Handles . . . . . 6/204, 6/206
Stone Mason's Hammer Replacement Handles . . . . . 6/201
**Hammers**
Bumping Mallets . . . . . 6/202
Carpenters Hammers . . . . . 6/198
Copper Faced Hammers . . . . . 6/202
Dead blow Hammer (Kickback Free) . . . . . 6/205–6/206
Demolition Hammer . . . . . 6/196
Light Metal Hammers . . . . . 6/201
Locksmith's Hammers . . . . . 6/195, 6/205
Machinist's Hammers . . . . . 6/195–6/196
Masonry Hammers . . . . . 6/198
Non-Arcing Club Hammer . . . . . 5/143
Non-Arcing Engineers Hammer . . . . . 5/143
Non-Arcing Sledge Hammer . . . . . 5/143
Plasterers Hatchets . . . . . 6/198
Plastic Faced Hammers . . . . . 6/202
Replacement Hammer Faces 6/203, 6/206
Roofing Hammers . . . . . 6/199
Rubber Faced Hammers . . . . . 6/201
Rubber Faced Hammers Replacement Handles . . . . . 6/201
Sledge Hammers . . . . 6/196–6/197, 6/206
Soft Faced Hammers . . . . . 6/203–6/204
Stone Masons Hammers . . . . . 6/197
Welders Hammers . . . . . 9/37, 6/198
Wood Faced Hammers . . . . . 6/201

**Hand Cleansing . . . . . 9/111–9/113**
**Hand Cleansing**
Hand Care Cream . . . . . 9/113
Hand Cleaning Liquid . . . . . 9/111
Hand washing Paste . . . . . 9/113
Hand Wipes . . . . . 9/113
Moisturising Hand Cream . . . . . 9/112
**Hand Cleansing Accessories**
Dispenser Pump . . . . . 9/112
Pump . . . . . 9/112
Wall Bracket . . . . . 9/112
Wall Dispenser . . . . . 9/112

**Hand Pump . . . . . 9/81–9/82**
**Hand Pump Accessories**
Angled Tube for Universal Hand Pump 9/82
Flexible Tubes for Universal Hand Pump . . . . . 9/82
Straight Tubes for Universal Hand Pump . . . . . 9/81
**Hand Pumps**
Hand Pump . . . . . 9/81
Universal Hand Pump . . . . . 9/81

**Hardness Tester . . . . . 4/128**
Accessories for Leeb Hardness Tester . . . . . 4/128
Hardness Tester Shore . . . . . 4/128
Leeb Hardness Tester . . . . . 4/128
Stand for Shore Hardness Tester . . . . 4/128

**Height Gauges and Accessories . . . . . 4/108–4/110, 4/113–4/115**
Digital Height Gauges . . . . . 4/108–4/110
Height Gauges . . . . . 4/108–4/109
Scriber Tip for Height Gauge . . . . . 4/108
Vertical Linear Measuring Devices . . . . . 4/113–4/115

**Hexagonal Keys & Screwdrivers . . . . . 5/123–5/133, 5/142**
**Hexagonal Keys**
Imperial Hexagonal Key – Short Arm 5/126
Imperial Hexagonal Key – Short Arm Set in Sliding Box . . . . . 5/126
Metric Hexagonal Key – Long Arm . . . 5/127
Metric Hexagonal Key – Long Arm Ball End . . . . . 5/129–5/130
Metric Hexagonal Key – Long Arm Ball End, Easy Colour' . . . . . 5/131
Metric Hexagonal Key – Long Arm Ball End, MagicRing' . . . . . 5/130
Metric Hexagonal Key – Long Arm Ball End Stainless Steel . . . . . 5/132
Metric Hexagonal Key – Long Arm Ball End with Short Leg . . . . . 5/131
Metric Hexagonal Key – Long Arm Set Ball End . . . . . 5/129–5/130
Metric Hexagonal Key – Long Arm Set Ball End, Easy Colour' . . . . . 5/131
Metric Hexagonal Key – Long Arm Set Ball End Stainless Steel . . . . . 5/132
Metric Hexagonal Key – Long Arm Set Ball End with Short Leg . . . . . 5/131
Metric Hexagonal Key – Long Arm Set, in Hand Holder . . . . . 5/128
Metric Hexagonal Key – Long Arm Set, in Sliding Box . . . . . 5/127
Metric Hexagonal Key – Long Arm Set, in Stand . . . . . 5/127
Metric Hexagonal Key – Short Arm . . 5/123

Metric Hexagonal Key – Short Arm Set, Easy Colour' . . . . . 5/124
Metric Hexagonal Key – Short Arm Set Folding . . . . . 5/125–5/126
Metric Hexagonal Key – Short Arm Set in Case . . . . . 5/123
Metric Hexagonal Key – Short Arm Set in Hand Holder . . . . . 5/124
Metric Hexagonal Key – Short Arm Set in Sliding Box . . . . . 5/124
Metric Hexagonal Key – Short Arm Set in Stand . . . . . 5/123
Metric Hexagonal Key – Short Arm Set on Ring . . . . . 5/124
Metric Hexagonal Key – Short Arm Set with Pin . . . . . 5/133
Metric Hexagonal Key – Short Arm with Pin . . . . . 5/133
Metric ‚XZN' Hexagonal Key – Short Arm . . . . . 5/133
Metric ‚XZN' Hexagonal Key – Short Arm Set in Wallet . . . . . 5/133
Non-Arcing Hexagonal Key . . . . . 5/142

**Hexagonal Screwdrivers**

Metric Hexagonal Screwdriver – Ball End . . . . . 5/132
Metric Hexagonal Screwdriver Set – Ball End . . . . . 5/132
Metric Hexagonal T-Handle Screwdriver Set . . . . . 5/128
Metric Hexagonal T-Handle Screwdriver Set with Side Blade . . . . . 5/129
Metric Hexagonal T-Handle Screwdrivers . . . . . 5/128
Metric Hexagonal T-Handle Screwdrivers with Side Blade . . . . . 5/129

**Hole Saw** . . . . . 2/110–2/116

**Carbide Tipped**

Carbide Tipped Key Hole Saw 2/115–2/116

**HSS / HSCo Bi-Metal**

Key Hole Saw . . . . . 2/110
Key Hole Saw Accessories . . 2/114, 2/116
Key Hole Saw Set . . . . . 2/111
Key Hole Saw With Power Change Adaptor 2/112–2/113

# I

**Impact (Power) Sockets & Accessories** . . . . . 6/92–6/99

**1/4" Drive**

Extension Bars . . . . . 6/92
Quick Change Chucks . . . . . 6/92
Security Rings . . . . . 6/93
Socket Drive Adaptors . . . . . 6/92
Sockets – Hexagon, Metric Long Series Magnetic . . . . . 6/92
Sockets – Hexagon, Metric Standard Length . . . . . 6/92
Sockets – Hexagon, Metric Standard Length Magnetic . . . . 6/92

**3/8" Drive**

Extension Bars . . . . . 6/94
Quick Change Chucks . . . . . 6/94
Screwdriver Sockets – Hexagon Head (Male) . . . . . 6/93
Screwdriver Sockets – Torx . . . . . 6/93
Security Rings . . . . . 6/94
Socket Drive Adaptors . . . . . 6/94
Sockets – Hexagon, Metric Long Series . . . . . 6/93
Sockets – Hexagon, Metric Long Series Magnetic . . . . . 6/93
Sockets – Hexagon, Metric Standard Length . . . . . 6/93
Sockets – Hexagon, Metric Standard Length Magnetic . . . . 6/93
Universal Joints (Ball Style) . . . . . 6/94

**1/2" Drive**

Extension Bars . . . . . 6/97
Quick Change Chucks . . . . . 6/97
Screwdriver Sockets – Hexagon Head (Male) . . . . . 6/96
Screwdriver Sockets – Torx . . . . . 6/96
Screwdriver Sockets – Torx, Female . . 6/96
Security Rings . . . . . 6/97
Socket Drive Adaptors . . . . . 6/97
Socket Sets . . . . . 6/95
Socket Sets – Hexagon, Metric Long Series with Plastic Cover . 6/95
Sockets – Hexagon, Metric Long Series . . . . . 6/95
Sockets – Hexagon, Metric Long Series with Plastic Cover . 6/95
Sockets – Hexagon, Metric Standard Length . . . . . 6/94
Universal Joints (Ball Style) . . . . . 6/97

**3/4" Drive**

Extension Bars . . . . . 6/98
Quick Change Chuck . . . . . 6/98
Screwdriver Sockets – Hexagon Head (Male) . . . . . 6/98
Security Rings . . . . . 6/98
Socket Drive Adaptors . . . . . 6/98
Sockets – Hexagon, Metric Long Series . . . . . 6/98
Sockets – Hexagon, Metric Standard Length . . . . . 6/97
Universal Joints (Ball Style) . . . . . 6/98

**1" Drive**

Extension Bars . . . . . 6/99
Security Rings . . . . . 6/99
Socket Drive Adaptors . . . . . 6/99
Sockets – Hexagon, Metric Long Series . . . . . 6/99
Sockets – Hexagon, Metric Standard Length . . . . . 6/99
Universal Joints (Ball Style) . . . . . 6/99

**Insertion Tools** . . . . . 5/68
Electrical Insertion Tool . . . . . 5/68

**Inspection Mirrors** . . . . . 6/174–6/175
Inspection Mirrors . . . . . 6/174–6/175
Inspection Tool Set with Mirrors and Lifters . . . . . 6/175
LED Flexible Shaft Inspection Mirrors 6/175
Long Shaft Inspection Mirror with Retrieval Tools . . . . . 6/174
Long Shaft Inspection Mirrors . . . . . 6/174–6/175

**Insulation Tape** . . . . . 9/124
Electrical Insulation Tape . . . . . 9/124

# J

**Jerrycan** . . . . . 9/85–9/86

**Fuel Cans**

Accessories . . . . . 9/86
Plastic Fuel Canister . . . . . 9/85
Sheet Steel Fuel Canister . . . . . 9/86

**Jig Saw Blades** . . . . . 2/117–2/122
Blade Selection and Data . . . . . 2/117
Jig Saw Blade . . . . . 2/117–2/122

**Jugs** . . . . . 9/86–9/87

**Measuring Jugs**

Measuring Jug Tin Plate . . . . . 9/87
Plastic Measuring Jug . . . . . 9/86

# K

**Key Hole Saw** . . . . . 2/110–2/116

**Carbide Tipped**

Carbide Tipped Key Hole Saw 2/115–2/116

**HSS / HSCo Bi-Metal**

Key Hole Saw . . . . . 2/110

Key Hole Saw Accessories . . 2/114, 2/116
Key Hole Saw Set . . . . . .2/111
Key Hole Saw
With Power Change Adaptor 2/112–2/113

**Knives** . . . . . 5/54–5/57, 7/59–7/67
**Belt Strap Knife**
Belt Strap Knife . . . . . .5/54, 7/65
**Cable Stripping Knives**
Cable Stripping Knife . . . 5/54–5/55, 7/65
Cable Stripping Knife – Plastic Handle 5/55
Cable Stripping Knife –
Rust Proof . . . . . .5/55, 7/65
Cable Stripping Knife –
Wooden Handle. . . . . .5/54
Universal
Cable Stripping Knife . . . 5/56–5/57, 5/59
**Fixed Blade Knives**
Folding Knife . . . . . .7/62
Knife Blades. . . . . .7/62
Professional Knife . . . . . .7/61
Slim Knife. . . . . .7/62
Universal Knife. . . . . 7/61–7/62
**Knives – General**
Deburring / Carving Knife . . . . . .7/66
Gypsum Knife. . . . . .7/65
Industrial Knife. . . . . .7/65
Insulation Knife . . . . . .7/66
Pocket Knife . . . . . .7/65
Tradesmans Knife . . . . . 7/65–7/66
Work Knife. . . . . .7/65
**Multifunction Knives and Tools**
Multifunction Tools . . . . . .7/67
**Safety Foil Cutter**
Martor Industrial Blade . . . . . 7/60–7/61
Martor Safety Foil Cutter. . . . . .7/60
**Safety Knives**
Box for Blades . . . . . .7/61
Safety Knife . . . . . 7/59–7/61
Safety Knives –
Automatic Blade Return . . . . . 7/60–7/61
**Scalpel**
Scalpel . . . . . .7/64
**Snap-Off Knives**
Snap-off Knives . . . . . 7/62–7/64
Snap-off Knives Blades. . . . . 7/63–7/64
**VDE Knives**
VDE Cable Stripping Knife . . . . . .5/55

**Knurling Tools** . . . . . 2/144–2/148
Cut Knurling Tool. . . . . 2/146–2/147
Knurling Wheel . . . . . 2/145, 2/148
Pressure Knurling Tool . . . . . 2/144–2/145
Pressure Knurling Tool Set . . . . . .2/148

# L

**Lamps** . . . . . 9/13–9/18
**Lamp Accessories**
Holding Magnet. . . . . .9/15, 9/18
Inspection Lamp Accessories . . . . . .9/15
Mobile Work Lamp Accessories 9/16–9/18
**Lamps**
Inspection Lamp . . . . . .9/15
Mobile LED Work Lamp . 9/14, 9/16–9/17
Rechargeable Inspection Lamp. 9/14–9/15
Rechargeable LED Hand Lamp . . . . . .9/13
Work Station Lamps . . . . . 9/17–9/18
Work Station Lamps Accessories. . . . . .9/18

**Laser Measuring Tools** . . . . . .4/138–4/142, 4/149
2-Axis Laser Quadrum . . . . . .4/141
Accessories for
Rotation Lasers . . . . . 4/141–4/142
Cross-Line Lasers . . . . . .4/140
Digital Laser Spirit Levels . . . . . .4/149
Laser Distance Meters. . . . . 4/138–4/139
Laser Distance Meters DISTO. . . . . .4/139
Laser Distance-Master Meters . . . . . .4/138
Laser Receivers Xtender . . . . . .4/140
Rotation Lasers . . . . . .4/141
Rotation Lasers Quadrum . . . . . .4/141
Tripods for Cross-Line and
Rotation Lasers. . . . . .4/142

**Lathe Centres**. . . . . 3/25–3/28
**Dead**
Full Tip . . . . . .3/28
Full Tip – Carbide . . . . . .3/28
Half Tip – Carbide . . . . . .3/28
**Revolving**
Revolving Centre – 60° Tip . . . . 3/25–3/28
Revolving Centre – Extended Tip. . . . . .3/26
Revolving Centre – Extended Tip
and Pressure Indicator. . . . . .3/27
Revolving Centre –
Interchangeable Insert Set . . . . . 3/27
Revolving Centre – Orange Line . . . . . .3/25
Revolving Centre – Pipe . . . . . .3/28
Revolving Centre –
Small Housing Diameter . . . . . .3/26

**Lathe Chucks** . . . . . 3/13–3/14, 3/4–3/12
**3 Jaw**
Scroll Chuck – Cam Mount. . . . . .3/5
Scroll Chuck – Plain back . . . . . .3/4
Scroll Chuck –
Precision Rohm DURO-T. 3/13, 3/11–3/12
**4 Jaw**
Scroll Chuck – Cam Mount. . . . . .3/6
Scroll Chuck – Plain Back . . . . . .3/6
**Accessories**
Adaptor Plates . . . . . .3/10
Boring Ring . . . . . .3/11
Chuck Grease. . . . . .3/9
Chuck Keys. . . . . .3/13, 3/9
Swarf Protector . . . . . .3/9
Workpiece Stop. . . . . .3/10
**Replacement Jaws**
Replacement Jaw Navigator . . . . . 3/15
Adaptor Jaws. . . . . .3/14, 3/8
Base Jaws . . . . . .3/8
Hard Inside. . . . . .3/7
Hard Outside . . . . . .3/7
Soft. . . . . .3/7

**Levels**. . . . . .4/100, 4/142–4/147, 4/149
Aluminium/Metal Spirit Levels
. . . . . .4/142–4/143, 4/145, 4/147
Digital Laser Spirit Levels . . . . . .4/149
Electric Spirit Levels . . . . . .4/147
Electricians Spirit Level . . . . . .4/144
Electronic Spirit Level . . . . . .4/145
Machine Line Levels . . . . . .4/100
Magnetic Spirit Levels. . . . . 4/143–4/144
Magnetic Torpedo Spirit Levels . . . . .4/145
Pocket Spirit Levels . . . . . .4/146
Precision Frame Levels . . . . . .4/100
Telescopic Spirit Level. . . . . .4/146
Torpedo Spirit Levels. . . . . .4/144

**Lubricants**. . . . . .9/103, 9/105–9/108
Anti-Seize Metal Lubrication. . . . . .9/103
Cooling Lubricants. . . . . 9/106–9/107
Cooling Lubrication Pen . . . . . .9/105
High Performance
Stamping & Forming Lubricant . . . . .9/108
Lubricants . . . . . .9/105

**Lubricating** . . . . . .9/89
Compressed Air Lubricating
Equipment . . . . . .9/89
Lubricating Equipment . . . . . .9/89

# M

**Machine Vices** . . . . . 3/131–3/143
**Accessories**
Spare Vice Jaws . . . . . .3/137, 3/139,
. . . . . 3/141–3/142
Standard Rotation Plate . . . . . .3/133
Universal Rotation Plate . . . . . .3/134

**Centric Vice**
Centric Vice – Mechanical . . 3/134, 3/140
**Drill Vice**
Drill Vice. . . . . .3/131
Drill Vice – Precision . . . . . 3/132–3/133
Drill Vice – Spare Jaws. . . . . .3/132
**Machine Vice**
Machine Vice – Hydraulic . . . . . .3/135
Machine Vice – Mechanical . 3/133–3/135
Machine Vice –
Mechanical Power Boosted. . . . . .3/135
**NC Compact Clamp Vice**
Accessories for NC
Compact Vices . . . . . .3/137–3/140
NC Compact Clamp Vice . . . 3/135–3/136
NC Compact Clamp Vice – FKG-L . . .3/135
NC Compact Clamp Vice – FKS . . . . .3/136
NC Compact Clamp Vice –
RKE. . . . . 3/136–3/137
NC Compact Clamp Vice –
RKE-LV. . . . . 3/136–3/137
NC Compact Clamp Vice – RKZ-M. . .3/139
Spare Jaws for NC Compact Vices. . .3/141
**Precision Vice**
Precision Vice. . . . . 3/142–3/143
Precision Vice PL-G . . . . . .3/143
Precision Vice PL-S . . . . . 3/142–3/143
Precision Vice PS-SV. . . . . .3/143

**Magnetic Stands and Bases. . . . . .**
. . . . . 4/62–4/67
Magnetic Base Accessories . . . .4/63, 4/65
Small and Large
Magnetic Bases . . . . . 4/62–4/67

**Magnets and Magnetic Clamping . . . . . .**
. . . . . 3/189–3/197, 6/173–6/174
BM Adjustable Magnet . . . . . .3/196
BM Magnetic Mitre Clamps . . . . . .3/196
BM Magnetic Precision Sine Bar . . . .3/190
BM Magnetic Round Chuck . . . . . .3/191
BM Magnetic V-Block . . . . . .3/191
BM Permanent Lifting Magnet . . . . . .3/197
BM Permanent Magnetic
Clamping Plate. . . . . 3/189–3/190
BM Plate Demagnetiser. . . . . .3/192
Button Magnet. . . . . .3/195
Magnetic Flat Gripper . . . . . .3/194
Magnetic Flat Gripper –
Threaded . . . . . 3/193–3/194
Magnetic Labels. . . . . .3/197
Magnetic Lifting Tool . . . . . .3/192
Magnetic Lifting Tool –
Flexible . . . . . .3/192, 6/173–6/174
Magnetic Tape. . . . . .3/197
Multiple Angle Magnet . . . . . .3/196
Organising Magnets . . . . . .3/192
Pan Magnet . . . . . .3/195
Pan Magnet – Flat . . . . . .3/195
Power Horse Shoe Magnet . . . . . .3/195
Round Holding Magnet . . . . . .3/193

**Magnifiers. . . . . 4/85–4/91**
Hand Magnifiers . . . . . .4/85
Head Mounted Magnifiers . . . . 4/87–4/88
Illuminated Bench Magnifiers . . 4/86–4/88
Illuminated
Hand Magnifiers . . . . . 4/86, 4/88–4/89
Microscopes. . . . . 4/89–4/91

**Maintenance Products . . . . . 9/95–9/104**
**Surfaces & Anti-Corrosion**
Aluminium Spray. . . . . .9/96
Anti-Seize Metal Lubrication. . . . . .9/103
Assembly Paste/Copper Paste . . . . . .9/102
Chain Adhesive Spray . . . . . .9/101
Compressed Air Spray . . . . . .9/99
Construction Site Marker Spray . . . . . .9/97
Contact Cleaner . . . . . 9/98–9/99
Corrosion Protection Wax . . . . . .9/97
Cutting Oil Spray . . . . . 9/103–9/104
Freeze Spray . . . . . .9/99
High-Pressure Adhesive Grease . . . . .9/101
Industrial Atomiser . . . . . .9/100
Industrial Pressure Sprayer . . . . . .9/100
Leak Locator. . . . . .9/99
Multi-Purpose Grease . . . . . .9/102
Oil Binding Agent . . . . . .9/101
Primer Spray . . . . . .9/96
PTFE Spray. . . . . 9/98, 9/103
Rust Remover . . . . . .9/98
Rust Spray . . . . . .9/97
Separating Spray. . . . . .9/97
Silicone Spray . . . . . 9/97–9/98
Special Vaseline. . . . . .9/102
Spray Grease . . . . . 9/98, 9/102
Stainless Steel Spray . . . . . .9/96
Universal Pressure Sprayer . . . . . .9/100
WD-40 . . . . . .9/98
Zinc Spray . . . . . 9/95–9/96

**Mandrels. . . . . .3/29**
Mandrel – Sets . . . . . .3/29

**Marking Devices . . . . . 9/91–9/95**
**Marking Devices & Accessories**
Borehole Marker . . . . . .9/94
Cable Marker Set. . . . . .9/94
Carpenter's Pencil . . . . . .9/92
Chalk Holder . . . . . .9/92
Deep-Hole Marker . . . . . .9/93
Engineering chalk . . . . . .9/92
Engraver Vibroscript . . . . . .9/91
Industrial Paint Marker . . . . . .9/95
Industrial Paste Marker . . . . . .9/94
Industrial Permanent Marker. . . . . .9/94
Label Maker . . . . . .9/91
Marking Chalk . . . . . .9/92
Marking Machine Label Manager . . . . .9/91
Metal Marker . . . . . .9/95
Permanent Marker . . . . . .9/93
School Chalk . . . . . .9/92
Soapstone Chalk . . . . . .9/92
Tape for Script . . . . . .9/91
Tool Check . . . . . .9/92
UV Marker . . . . . .9/94

**Marking Gauges. . . . . .4/94**
Marking Gauge with Roller . . . . . .4/94
Precision Beam Compass . . . . . .4/94
Precision Marking Gauge . . . . . .4/94

**Marking Pen . . . . . .4/150**
Blue Quick-Dry Marking Pen. . . . . .4/150

**Marking Spray & Fluid . . . . . .4/150**
Bedding-in Paste . . . . . .4/150
Red and Blue Marking Spray/Fluid. . .4/150

**Measuring Equipment. . . . . .**
. . . . . .4/28–4/29, 4/108, 4/116
. . . . . 4/122–4/124, 4/137
**Measurement Sets**
Sets Of Measuring Equipment . 4/28–4/29
**Measuring Beams**
Granite Measuring Beams. . . . . .4/116
**Measuring Rods/Wheels**
Digital Measuring Rod. . . . . .4/137
Measuring Wheel . . . . . .4/137
Telescopic Measuring Rods . . . . . .4/137
**Measuring Table**
180mm Measuring Table . . . . . .4/108
**Spring Scales**
Spring Scales. . . . . 4/122–4/124
Spring Scales Accessories . . 4/122–4/124

**Micrometers. . . . . 4/30–4/39, 4/44, 4/29**
Digital Micrometer Set . . . . . .4/33
Digital Micrometers. . . . . .4/32
Disc Micrometer . . . . . .4/33, 4/35
External Groove
Micrometer. . . . . 4/33, 4/35–4/36

Inserts For Thread Measuring Micrometers. . . . . 4/36
Inside Micrometers and Extensions. . . . . 4/37–4/39
INTERAPID Micrometer. . . . . 4/31
Micrometer Set . . . . . 4/30, 4/33, 4/39, 4/44, 4/29
Micrometer Stands . . . . . 4/37
Outside Anvil Micrometer . . . . . 4/34
Outside Blade Micrometer . . . . . 4/33, 4/35
Outside Disc Micrometer . . . . . 4/33, 4/35
Outside Micrometers. . . . . 4/30, 4/34–4/35, 4/29
Outside Micrometers – Interchangeable Rods . . . . . 4/37
Outside Spline Micrometer . . . . . 4/35
Pipe Micrometer . . . . . 4/34
Plate Micrometer . . . . . 4/34
Setting Gauges For Micrometers . . . . . 4/37

**Milling** 2/30–2/34, 2/46–2/99, 2/13–2/17 . . . . . 2/10–2/12, 2/18–2/29, 2/100 . . . . . 2/159–2/160, 2/163–2/185 . . . . . 2/195–2/197, 2/203–2/204 . . . . . 2/207–2/208, 2/229–2/230 . . . . . 2/236–2/237

**HSS / HSCo / PM Tools**
Tool Selection and Data . . . . . 2/2–2/9
2 Flute Slot Drill. . . . . 2/16
2 Flute Slot Drill For Aluminium . . . . . 2/15
3 Flute Aluminium End Mill. . . . . 2/21
3 Flute Slot Drill. . . . . 2/19–2/20
Ball Nose 2 Flute Slot Drill . . . . 2/33–2/34
Concave Cutter . . . . . 2/13
Convex Cutter . . . . . 2/13
Corner Rounding Cutter . . . . . 2/33
Double Equal-Angle Cutter . . . . . 2/14
Dovetail Cutter. . . . . 2/32
End Mills . . . . . 2/22–2/23
Flat Top Rippa Cutter . . . . . 2/25–2/26
Long Series 2 Flute Slot Drill . . . . . 2/17
Long Series 3 Flute Aluminium End Mill . . . . . 2/21
Long Series Ball Nose 2 Flute Slot Drill . . . . . 2/33–2/34
Long Series Endmill. . . . . 2/24
Long Series Mini 3 Flute Slot Drill . . . . 2/18
Long Series Rippa Cutter . . . . . 2/30, 2/28
Mini 3 Flute Slot Drill . . . . . 2/17
Rippa Cutter. . . . . 2/30, 2/26–2/29
Shell End Mill. . . . . 2/10–2/11
Side and Face Cutter. . . . . 2/12
Single Angle Milling Cutter. . . . . 2/14
Single Flute Router Cutter HSCo . . . . . 2/15
T-slot Cutter. . . . . 2/32
Woodruff Cutter . . . . . 2/31

**Indexable Insert Tools**
Insert Selection and Data . . . 2/159–2/162
Tool Selection and Data . . . . 2/153–2/158
Adjustable Angle Cutter . . . . . 2/181
Adjustable Core Drill Cutter . . . . . 2/182
Chamfer Tool / Spot Drill . . . . . 2/180, 2/182, 2/184
Counterbore Tool. . . . . 2/182
Disc Mill . . . . . 2/177
End Mill For Aluminium. . . . . 2/176
End Mills 90° Approach . . . . . 2/166–2/167, 2/169
End Mills Button Insert . . . . . 2/172–2/173
Face Mill For Aluminium . . . . . 2/176
Face Mills 45° Approach . . . 2/163–2/165
Face Mills 90° Approach . . . 2/166–2/167, 2/169, 2/171
Face Mills Button Insert. . . . . 2/172–2/173
Long Edge Chamfer Tool. . . . . 2/185
Long Edge End Mill . . . . . 2/168–2/169
Long Edge Shell Mill . . . . . 2/170
Milling Inserts . . . . . 2/159–2/160, . . . . . 2/163–2/166, 2/168, . . . . . 2/170–2/171, 2/173–2/176, . . . . . 2/178–2/181, 2/183–2/185, . . . . . 2/195–2/197, 2/203–2/204, . . . . . 2/207–2/208, 2/229–2/230, . . . . . 2/236–2/237
Screw In Cutter . . . . . 2/167, 2/173, 2/176
T-Slot Cutter . . . . . 2/179

**Solid Carbide Tools**
Tool Selection and Data . . . . . 2/36–2/45
2 Flute Ball Nose Slot Drills . . . . . 2/85–2/88, 2/90
2 Flute Slot Drill. . . . . 2/46–2/48
2 Flute Slot Drill With Corner Radius. . . . . 2/91–2/92
3 Flute Mini Slot Drills. . . . . 2/49–2/50
3 Flute Rippa for Aluminium. . . 2/51–2/53, . . . . . 2/78
3 Flute Slot Drill. . . . . 2/51, 2/53–2/54, . . . . . 2/56–2/59
Ball Nose End Mill . . . . . 2/88
Chamfer Tool . . . . . 2/99–2/100
Corner Rounding Cutter . . . . . 2/97
End Mill . . . . . 2/59–2/73
End Mill With Corner Radius . . 2/93–2/96
Engraving Cutter . . . . . 2/100
Long Series 2 Flute Ball Nose Slot Drills . . . . . 2/89, 2/91
Long Series 2 Flute Slot Drill . . . . . 2/49
Long Series 3 Flute Mini Slot Drill . . . . 2/55
Long Series 3 Flute Slot Drill . . . . . 2/58
Long Series End Mill . . . . . 2/66, 2/70
Long Series End Mill With Corner Radius. . . . . 2/96–2/97
Miniature 2 Flute Slot Drill . . . . 2/46–2/47
Multi-Flute Endmill . . . . . 2/74–2/77
Rippa Cutter. . . . . 2/78–2/84
Single Flute Router . . . . . 2/46
Spot Drill / Chamfer Tool . . . . . 2/98

**Mitre Saw and Box** . . . . . 7/48, 7/50
Mitre Saw. . . . . 7/48, 7/50
Wooden Mitre Boxes. . . . . 7/50

**Morse Taper Sleeves**. . . . . 3/35–3/36
Morse Taper Drifts. . . . . 3/36
Morse Taper Sleeves. . . . . 3/35
Morse Taper Sleeves – Extended . . . . . 3/36
Morse Taper Sleeves – For Taps . . . . . 3/36

# N

**Non-Arcing Tools** . . . . . 5/141–5/144, 7/57

**Non Arcing Chisel**
Non-Arcing Flat Chisel . . . . . 5/144

**Non-Arcing Crow Bar**
Non-Arcing Crow Bar . . . . . 5/144

**Non-Arcing Hammers**
Non-Arcing Club Hammer. . . . . 5/143
Non-Arcing Engineers Hammer . . . . . 5/143
Non-Arcing Sledge Hammer. . . . . 5/143

**Non-Arcing Hexagonal Key**
Non-Arcing Hexagonal Key. . . . . 5/142

**Non-Arcing Pliers**
Non-Arcing Combination Pliers . . . . . 5/143
Non-Arcing Swedish Pipe Pliers. . . . . 5/144
Non-Arcing Water Pump Pliers. . . . . 5/143

**Non-Arcing Scraper**
Non-Arcing Painters Scraper . 5/144, 7/57

**Non-Arcing Screwdrivers**
Non-Arcing Cross Recess Screwdriver . . . . . 5/143
Non-Arcing Recess Screwdriver. . . . . 5/142

**Non-Arcing Shovel**
Non-Arcing Shovel . . . . . 5/144

**Non-Arcing Sockets & Accessories**
Non-Arcing Ratchet. . . . . 5/142
Non-Arcing Socket / Box Spanner . . . 5/142
Non-Arcing Socket / Box Spanner Set . . . . . 5/142

**Non-Arcing Spanners**
Non-Arcing Adjustable Spanner. . . . . 5/144
Non-Arcing Box Spanner Set . . . . . 5/142
Non-Arcing Bung Wrench. . . . . 5/144
Non-Arcing Combination Spanner . . . 5/141

Non-Arcing Double Open Ended Spanner . . . . . .5/141
Non-Arcing Slogging / Striking Spanner . . . . . .5/141

**Nut Splitters** . . . . . 6/229–6/230
Hydraulic Nut Splitter . . . . . .6/230
Mechanical Nut Splitter . . . . . .6/229

# O

**Oil Cans** . . . . . 9/82–9/85
**Oil Cans**
Atomiser. . . . . .9/84
Brush Oiler . . . . . 9/83–9/84
Industry Atomiser . . . . . 9/84–9/85
Liquid Sprayer . . . . . .9/83
Mercury Oiler . . . . . .9/83
Micro Atomiser . . . . . .9/83
Miniature Oiler . . . . . .9/82
Oil Spray Can . . . . . .9/82
Oil Storage Can Tin Plate . . . . . .9/85
Plastic Oiler . . . . . .9/82
Tool Bag Oiler . . . . . .9/82

**Oils** . . . . . 9/103–9/106, 9/108
**Cutting Oil**
Bed Track Oil . . . . . .9/108
Cutting Oil Spray . . . . . 9/103–9/104
Drilling Oil Concentrate . . . . . .9/106
Hydraulic Oil. . . . . .9/108
Universal Cutting Oil . . . . . 9/104–9/105

# P

**Padlocks** . . . . . 7/68–7/69
Aluminium Padlocks . . . . . .7/68
Brass Padlock Set . . . . . .7/68
Brass Padlocks. . . . . 7/68–7/69
Combination Padlocks. . . . . .7/69
Titanium Padlocks . . . . . 7/68–7/69

**Paint Scrapers** . . . . . 5/144, 7/56–7/57
Filling Knives . . . . . 5/144, 7/56–7/57
Glue Spreader . . . . . .7/57
Non-Spark Paint Scrapers. . . . . .5/144
Paint Scrapers . . . . . 7/56–7/57
Spatulas . . . . . .7/56
Wall Scraper Set . . . . . .7/57

**Parallels** . . . . . 3/145–3/146
Parallel – Set . . . . . 3/145–3/146
Parallels . . . . . 3/145–3/146

**Photovoltaics Tools** . . . . . .5/72, 5/84
Photovoltaic Installation Tester. . . . . .5/84
Tools for Photovoltaics . . . . . .5/72

**Pipe Tools and Equipment** . . . . 7/25–7/46
**Gas Pipe Test Equipment**
Cleaning Agents and Preservatives. . . .7/45
Manometer and Feed Unit . . . . . .7/45
ROLLER Coil and Test Pressure Unit . .7/45
ROLLER Electric Testing Pump. . . . . .7/44
ROLLER Filling and Rinsing Unit. . . . . .7/46
ROLLER Manometer . . . . . .7/44
ROLLER Manual Testing Pump. . . . . .7/44
ROTEST Gas Line Tester . . . . . .7/44
**Pipe and Tube Cutters**
Mini Pipe Cutters . . . . . 7/30–7/31
Pipe Cutters . . . . . 7/30–7/33
ROLLERS Pipe Cutters. . . 7/30–7/33, 7/35
Spare Cutting Wheels. . . . . 7/30–7/32
**Pipe Cleaning**
Extension for Pipe Cleaning Cable . . . .7/27
Pipe Cleaning Cable . . . . . .7/27
Pipe Cleaning Spirals for ROLLERS . . .7/28
ROLLERS Ortem 22 Pipe Cleaning Machine. . . . . .7/28
ROLLERS Pipe Cleaning Devices 7/27–7/28
Tools and Spares for ROLLERS Ortem 22. . . . . .7/29
Tools for Pipe Cleaning Cable. . . . . .7/27
**Pipe Cutting Machines**
Cutting Wheels for Pipe Cutting Machine . . . . . .7/39
Deburrer for Pipe Cutting Machine. . . .7/39
ROLLERS Electric Pipe Cutters . . . . . .7/39
ROLLERS Pipe Cutting Machine. . . . . .7/39
Sub-Frame for Pipe Cutting Machine. . 7/39
**Pipe Deburrer**
Inner and Outer Deburrer . . . . . .7/35
**Pipe Freezing System**
Electrical Pipe Freezing System . . . . . .7/46
**Pipe Inspection**
Accessories for Pipe Inspection Camera VideoFlex . 7/25
Accessories for ROLLERS CamView . . 7/26
Accessories for VisioCam . . . . . .7/26
Inspection Camera . . . . . 7/25–7/26
Inspection Camera ROLLERS CamView . . . . . .7/26
Inspection Camera VideoFlex . . . . . .7/25
ROLLERS VisioCam. . . . . .7/26
**Plastic Pipe Shears**
Plastic Pipe Shears . . . . . .7/33
ROCUT Pipe Shears. . . . . .7/34
ROLLERS Pipe Shears. . . . . .7/33
Spares for Pipe Shears . . . . . 7/33–7/34

**Radial Presses**
Accessories for ROLLERS Radial Presses. . . 7/36–7/38
ROLLERS Hybrid Radial Presses 7/35–7/38
Tongs and Rings for ROLLERS Radial Presses. . . 7/36–7/38
**Thread Cutting Equipment**
Ratchet Die Stock . . . . . .7/43
ROLLER Cutting Oil . . . . . .7/42
ROLLER Die-Heads . . . . . .7/43
ROLLER Electric Thread Cutter. . . . . .7/42
ROLLER Extension for Die Heads . . . . .7/43
ROLLER Ratchet Die Stock Set. . . . . .7/43
**Tube and Pipe Benders**
Accessories for Hydraulic Pipe Bender 7/42
Eccentric Angle Bender. . . . . .7/41
Hand Pipe Bender . . . . . 7/40–7/41
Hand Pipe Bender Set . . . . . 7/40–7/41
Hydraulic Pipe Bender. . . . . .7/42
Ratchet Pipe Bender . . . . . .7/40
ROLLER Electric Pipe Bender . . . . . .7/41
Tube Benders. . . . . .7/40

**Planes** . . . . . 7/51–7/52
Bench Plane . . . . . .7/51
Block Surform Plane . . . . . .7/52
Hand Plane. . . . . .7/51
One Handed Plane . . . . . .7/51
Reversible Blades for Hand Plane. . . . .7/51
Scraper Blades. . . . . .7/51
Shoulder Plane. . . . . .7/51
Smoothing Plane . . . . . .7/51
Spare Plane Iron . . . . . .7/51
Surform Blades . . . . . .7/52
Surform Planes . . . . . .7/52

**Pliers** . .5/30–5/35, 7/35–5/50, 5/58–5/59 . . . . . .5/63–5/68, 5/72, 5/90–5/96 . . . . .5/16–5/21, 7/21–5/22, 7/22–5/23 . . . . . .7/23–5/24, 7/24–5/29, 5/119 . . . . . 5/143–5/144, 6/234–6/235
**Automotive Pliers**
Brake Spring Pliers . . . . . .6/234
Hose Clamp Pliers . . . . . .6/235
Spring Clip Pliers. . . . . .6/234
**Circlip Pliers**
Circlip Pliers Set. . . . . .5/39
External Circlip Pliers – Curved. . . . . .5/38
External Circlip Pliers – Straight. . . . . .5/37
Internal & External Circlip Pliers – Curved . . . . . .5/37
Internal Circlip Pliers – Curved . . . . . .5/36
Internal Circlip Pliers – Straight . . . . . .5/36
Precision Circlip Pliers Set. . . . . .5/39

**Combination Pliers**
Power Universal Pliers . . . . . 5/20–5/21
Universal Pliers . . . . . 5/18–5/19
Universal Pliers, small . . . . . 5/18
VDE Power Universal Pliers . . . . 5/20–5/21
VDE Power Universal Pliers – Offset . . 5/21
VDE Universal Pliers . . . . . 5/19
**Crimping Pliers**
Crimping Gripping Pliers . . . . . 5/67
Crimping Lever Pliers . . . . . 5/67
Crimping Pliers . . . . . 5/67–5/68
Crimping Pliers for Co-Axial Connector 5/68
Crimping Pliers for End Sleeves 5/65–5/66
Crimping Pliers for Ferrules . . . . 5/63–5/64
Crimping Pliers for Ferrules – Crescent Profile . . . . . 5/63
Crimping Pliers for Modular Jacks . . . . 5/68
Crimping System Pliers . . . . . 5/72
VDE Crimping Pliers for Ferrules . . . . . 5/63
**Electrical Installation Pliers**
Electrical Installation Pliers . . . . . 5/58
**Electricians Pliers**
Electricians Diagonal Cutters . . . . . 5/43
Electricians End Cutting Pliers . . . . . 5/43
Electricians Gripping Pliers . . . . . 5/44
Electricians Plier . . . . . 5/58
Electricians Pliers & Tool Set . . . . . 5/45
Electricians Pliers Set . . . . . 5/45
Electricians Precision Side Cutting Pliers . . . . . 5/42
Electricians Side Cutting Pliers . 5/40–5/42
Electricians Wire Stripping Pliers . . . . . 5/43
ESD Electricians Gripping Pliers . . . . . 5/47
ESD Electricians Precision Gripping Pliers . . . . . 5/47
ESD Electricians Precision Side Cutting Pliers . . . . . 5/47
ESD Electricians Side Cutting Pliers . . . 5/46
Precision Electricians Gripping Pliers . . 5/44
**End Cutting Pliers**
Bodywork Removal Pliers . . . . . 5/16
Bolt End Cutting Pliers . . . . . 5/29
Electricians Diagonal Cutters . . . . . 5/43
Electricians End Cutting Pliers . . . . . 5/43
End Cutting Pliers . . . . . 5/28
Mechanics Nippers . . . . . 5/16
Pincers . . . . . 5/16
Power End Cutting Pliers . . . . . 5/29
Power Mechanics Nippers . . . . . 5/16
**ESD Pliers**
ESD Electricians Gripping Pliers . . . . . 5/47
ESD Electricians Precision Gripping Pliers . . . . . 5/47
ESD Electricians Side Cutting Pliers . . . 5/46
ESD Electronic Side Cutting Pliers . . . . 5/46
ESD Plier & Screwdriver Set . . . . . 5/48
**Gripping / Self Adjusting Pliers**
Chain Gripping Pliers . . . . . 5/94
Clamping Gripping Pliers . . . . . 5/95
Clamping Gripping Pliers with mobile Jaws . . . . . 5/95
C-Shaped Gripping Pliers . . . . . 5/95
Curved Jaw Gripping Pliers . . . . . 5/93
Long Nosed Gripping Pliers . . . . . 5/94
Open Gripping Pliers . . . . . 5/93, 5/119
Parallel Gripping Pliers . . . . . 5/94
Pipe Gripping Pliers . . . . . 5/96
Pipe Welders Gripping Pliers . . . . . 5/96
Sealing Gripping Pliers . . . . . 5/95
Variogrip Welders Gripping Pliers . . . . 5/96
Welding Gripping Pliers . . . . . 5/96
Wide Mouthed Gripping Pliers . . . . . 5/94
Wide Span Gripping Pliers . . . . . 5/94
**Long Nosed Pliers**
Adjusting Pliers . . . . . 5/25
Assembly Pliers . . . . . 5/28
Flat Pliers . . . . . 5/21
Gripping Pliers – Needle Nosed . . . . . 5/24
Long Nosed Pliers . . . . . 5/22–5/23
Mechanics Pliers . . . . . 5/24
Mechanics Pliers – Angled . . . . . 5/24
Mechanics Pliers – Offset . . . . . 5/24
Mechanics Pliers – Straight . . . . . 5/24
Multi Purpose Pliers . . . . . 5/21
Pointed Pliers – Angled . . . . . 5/27
Pointed Pliers – Straight . . . . . 5/26
Radio Pliers – Angled . . . . . 5/26

Hexagon Shank Screwdriver Bit Sets – Hexagon Head Female . . . . . 6/150
Hexagon Shank Screwdriver Bits – Assorted Sets . . . . . 6/157–6/168
Hexagon Shank Screwdriver Bits – ASSY . . . . . 6/149
Hexagon Shank Screwdriver Bits – Bi-Hexagon . . . . . 6/149
Hexagon Shank Screwdriver Bits – Bulk Packs . . . . . 6/151
Hexagon Shank Screwdriver Bits – Hexagon . . . . . 6/145–6/146, 6/152
Hexagon Shank Screwdriver Bits – Hexagon Head Female . . . 6/150, 6/152
Hexagon Shank Screwdriver Bits – Holders . . . . . 6/136–6/137
Hexagon Shank Screwdriver Bits – Phillips . . . 6/143–6/144, 6/151–6/152
Hexagon Shank Screwdriver Bits – Pozidrive . 6/144–6/145, 6/151–6/152
Hexagon Shank Screwdriver Bits – Slotted . . . . . 6/142, 6/152
Hexagon Shank Screwdriver Bits – Torx . . . . . 6/146–6/149, 6/151–6/152
Hexagon Shank Screwdriver Bits – Tri Wing . . . . . 6/149
Hexagon Shank Tap Sets . . . . . 1/178, 6/155–6/156
Hexagon Shank Taps 1/175–1/176, 1/178, . . . . . 6/155–6/156
Screwdriver Bit Adapter . . . . . 6/138
Screwdriver Bit Holders . . . . 6/136–6/137, . . . . . 6/139–6/140, 6/168–6/169

**Scribers** . . . . . 4/92–9/93
Carbide Tipped Scriber . . . . . 4/92
Engineers Scribers . . . . . 4/92
Pen Scriber . . . . . 4/92
Permanent Scriber . . . . . 9/93

**Sealants** . . . . . 9/117–9/118
Retaining Compound . . . . . 9/117–9/118
Surface Sealant . . . . . 9/117–9/118
Thread Pipe Sealant . . . . . 9/117
Thread Sealant – Loctite . . . . . 9/117

**Separators** . . . . . .
. . . . 6/225–6/227, 6/229, 6/233–6/234
Separator Sets
. . . . . 6/226–6/227, 6/229, 6/233–6/234
Separators & Extractors . . . . 6/225–6/226

**Shaft Testing Device** . . . . . .4/105
Accessories for Shaft Testing Device 4/105
Vertical Shaft Testing Device . . . . . .4/105

**Shim Steel** . . . . . .4/84
Assortment of Brass Shim Steel. . . . . .4/84
Steel and Brass Shim . . . . . .4/84

**Shovels** . . . . . .5/144
Non-Arcing Shovel . . . . . .5/144

**Slitting Saws** . . . . . 2/101–2/109
**HSS / HSSe**
Bore Reduction Ring
for Slitting Saw Blades . . . . . .2/105
HSS Metal Slitting Saw Blade
. . . . . 2/101–2/104, 2/106–2/108
HSSe Metal Slitting Saw Blade
for GF Saws . . . . . .2/101
Set of Slitting Saw Blade Holders . . .2/104
Slitting Saw Blade Holder. . . . . .2/104
**Solid Carbide / Carbide Tipped**
Carbide Slitting Saw Blade . . . . . .2/105
Carbide Tipped Saw Blade . . 2/108–2/109

**Sockets & Accessories** . . . . . .
. . . . .6/30–6/63, 6/92–6/95, 6/13–6/16
. . . . 6/2–6/5, 6/17, 6/6–6/12, 6/18–6/29
. . . . 5/142, 6/104–6/105, 6/167, 6/229
Non-Arcing Ratchet. . . . . .5/142
Non-Arcing Socket / Box Spanner . . .5/142
Non-Arcing Socket /
Box Spanner Set . . . . . .5/142
**1/4" Drive**
Extensions Bars . . . . . .6/13

**Soldering Irons**

Gas soldering Sets . . . . . 9/33
Hammer Soldering Irons . . . . . 9/31
Soldering Irons . . . . . 9/30
Soldering Pistol Multi-Sprint . . . . . 9/31
Soldering Station Analogue . . . . . 9/31
Soldering Station Digital . . . . . 9/32

**Solvents & Thinners . . . . . 9/110–9/111**

Methylated Spirit . . . . . 9/110
Nitro Thinner . . . . . 9/110
Petroleum . . . . . 9/111
Turpentine Substitute . . . . . 9/111
Universal Nitro Thinner . . . . . 9/110
White Spirit . . . . . 9/111

**Spanner Holder . . . . . 5/100**

Plastic Holding Case for Spanners . . . 5/100

**Spanners . . . . . 5/85–5/86, 5/99–5/122 . . . . 5/141–5/142, 5/144, 6/162, 6/168**

**Adjustable Spanners**

Adjustable Spanner . . . . . 5/119
Face Spanner Set – Adjustable . . . . . 5/122
Fixed Face Spanner . . . . . 5/122
Fixed Hook Spanner with Nose . . . . . 5/120
Fixed Hook Spanner with Pin . . . . . 5/120
Hinged Face Spanner . . . . . 5/122
Hinged Face Spanner for Torque Wrench . . . . . 5/122
Hinged Hook Spanner with Nose . . . . 5/120
Hinged Hook Spanner with Pin . . . . . 5/121
Hinged Hook Spanner with Pin for Torque Wrench . . . . . 5/121
Two Hole Nut Spanner . . . . . 5/121

**Box Spanners**

Double Box Spanner . . . . . 5/114
Open Ended Box Spanner . . . 5/114–5/115
Pipe Wrench – Forged . . . . . 5/116
Square Box Spanner . . . . . 5/115
Swivel-headed Spanner . . . . . 5/115
T-Handle Box Spanner . . . . . 5/118
Triangular Box Spanner . . . . . 5/115
Tubular Box Spanner . . . . . 5/116
Tubular Box Spanner Set . . . . . 5/116
VDE Hexagonal Box Spanner Screwdriver . . . . . 5/117

**Claw Spanners**

Claw Spanner . . . . . 5/103

**Combination Spanners**

Combination Spanner – Imperial . . . . 5/104
Combination Spanner – Long . . . . . 5/103
Combination Spanner – Offset . . . . . 5/104
Combination Spanner Set . . . . . 5/102
Combination Spanner Set – Long . . . 5/103
Combination Spanners . . . . . 5/102 Ratchet (Both Ends)
Combination Spanners . . . . . 5/109 Ratchet (Ring End)
Combination Spanner . . . . . 5/106–5/107 Ratchet (Ring End)
Combination Spanner – Reversible . . . . . 5/107–5/109 Ratchet (Ring End)
Combination Spanner Set . . . . . 5/107 Ratchet (Ring End)
Combination Spanner Set – Reversible . . . . . 5/108 Ratchet (Ring End)
Combination Spanner with Hinge . . . . 5/106

**Hook Spanners**

Fixed Hook Spanner with Nose . . . . . 5/120
Fixed Hook Spanner with Pin . . . . . 5/120
Hinged Hook Spanner with Nose . . . . 5/120
Hinged Hook Spanner with Pin . . . . . 5/121
Hinged Hook Spanner with Pin for Torque Wrench . . . . . 5/121

**Non-Arcing Spanners**

Non-Arcing Adjustable Spanner . . . . . 5/144
Non-Arcing Box Spanner Set . . . . . 5/142
Non-Arcing Bung Wrench . . . . . 5/144
Non-Arcing Combination Spanner . . . 5/141
Non-Arcing Double Open Ended Spanner . . . . . 5/141
Non-Arcing Slogging / Striking Spanner . . . . . 5/141

**Open Ended Spanners**
Double Open Ended Spanner Set . . . . . 5/100–5/101, 5/111
Double Open Ended Spanners 5/99, 5/101
Double Open Ended Spanners – Small . . . . . 5/100
Open Ended Box Spanner . . . . . 5/114
Ratchet (Both Ends)
Double Open Ended Spanners . . . . . 5/109
Single Open Ended Spanner . . . . . 5/101
Striking / Slogging Spanner . . . . . 5/113
**Ratchet Spanners**
Bit Ratchets . . . . . 6/162, 6/168
Collar Ratchet (Ring End) Spanner . . . 5/105
Collar Ratchet (Ring End) Spanner Set . . . . . 5/105
Double Ring Ratchet Spanner . . . . . 5/112
Quadro Ring Ratchet Spanner . . . . . 5/112
Ratchet (Both Ends)
Combination Spanners . . . . . 5/109
Ratchet (Both Ends)
Double Open Ended Spanner Set . . . . 5/109
Ratchet (Both Ends)
Double Open Ended Spanners . . . . . 5/109
Ratchet (Ring End)
Combination Spanner 5/106–5/107, 5/109
Ratchet (Ring End)
Combination Spanner – Extra Short. . 5/109
Ratchet (Ring End)
Combination Spanner – Reversible. . . . . 5/107–5/108
Ratchet (Ring End)
Combination Spanner Set . . . . . 5/107
Ratchet (Ring End)
Combination Spanner Set – Reversible. . . . . 5/108
Ratchet (Ring End)
Combination Spanner with Hinge. . . . 5/106
Ratchet Box Spanner Adaptor . . . . . 5/108
Ratchet Ring Spanner for External Torx Screws . . . . . 5/112
Screwdriver Bit Adaptor for Ratchet Spanner . . . . . 5/108
Ring Spanners
Double Ended Ring Spanner – Offset . 5/110
Double Ended Ring Spanner – Straight. . . . . 5/111
Double Ended Ring Spanner Set – Offset . . . . . 5/110
Double Ended Ring Spanner Set – Straight. . . . . 5/111
Double Ring Ratchet Spanner . . . . . 5/112
Half Moon Ring Spanner. . . . . 5/114
Impact Ring Spanner. . . . . 5/113
Quadro Ring Ratchet Spanner . . . . . 5/112
Single Ended Ring Spanner . . . . . 5/113

Pairs of Precision V-Blocks . . . . . .4/111
V-Blocks with Clamps . . . . . .4/111

**VDE Tools . . .** 5/31, 5/34, 5/49–5/50, 5/55 5/58–5/59, 6/63–5/64, 5/91 5/93, 5/19, 5/21–5/27, 5/112 5/117, 5/138, 6/104–6/105, 6/119, 6/121, 6/124, 6/129–6/131, 6/170
**VDE Knives**
VDE Cable Stripping Knife . . . . . 5/55
**VDE Pliers**
VDE Cable Shears . . . . . 5/49–5/50
VDE Cable Shears – Offset . . . . . 5/49
VDE Crimping Pliers for Ferrules 5/63–5/64
VDE Flat Pliers . . . . . 5/21
VDE Long Nosed Pliers . . . . . 5/23
VDE Pointed Pliers – Angled . . . . . 5/27
VDE Power Universal Pliers . . . . . 5/21
VDE Power Universal Pliers – Offset . . . 5/2
VDE Radio Pliers – Angled . . . . . 5/26
VDE Radio Pliers – Straight . . . . . 5/25
VDE Round Nosed Pliers . . . . . 5/22
VDE Side Cutting Pliers . . . . . 5/31
VDE Universal Pliers . . . . . 5/34, 5/19
VDE Water Pump Pliers . . 5/91, 5/93, 7/24
VDE Wire Stripping Pliers . . . . . 5/59
VDE Wire Stripping
Side Cutting Pliers . . . . . 5/31, 5/58
**VDE Screwdrivers**
VDE Double Bit Screwdrivers . . . . . 6/130
VDE Hexagonal Box Spanner
Screwdriver . . . . . 5/117
VDE Phillips Screwdrivers . . . 6/121, 6/130
VDE Pozidrive Screwdrivers . 6/124, 6/130
VDE Screwdriver Sets
. . . . . 6/104–6/105, 6/129, 6/131
VDE Slotted Screwdrivers . . . . . 6/119
VDE Square Screwdrivers . . . . . 6/130
VDE Torque Screwdriver Set 6/104–6/105
VDE Torx Screwdriver . . . . . 5/138
VDE TORX Screwdrivers . . . . . 6/130
**VDE Sockets & Accessories**
VDE Extensions . . . . . 6/63, 6/105
VDE Ratchets . . . . . 6/63, 6/104
VDE Socket Sets . . . . . 6/63
VDE Sockets – Hexagon –
Metric Standard Length . . . . . 6/63
**VDE Spanner**
VDE Open Ended Spanner . . . . . 5/112
VDE Ring Spanner . . . . . 5/112
**VDE Tweezers**
VDE Tweezers . . . . . 6/170

**VDI Tool Holders . . . . . 3/18–3/24, 3/118**
CNC Drill Chuck . . . . . 3/24
Form A1 – Blank . . . . . 3/18
Form A2 – Round Blank . . . . . 3/18
Form B1 – Right . . . . . 3/19
Form B2 – Left . . . . . 3/19
Form B3 – Right Overhead . . . . . 3/19
Form B4 – Left Overhead . . . . . 3/19
Form C1 – Right . . . . . 3/20
Form C2 – Left . . . . . 3/20
Form C3 – Right Overhead . . . . . 3/20
Form C4 – Left Overhead . . . . . 3/20
Form D1 / D2 . . . . . 3/21
Form E1 – U-Drill Holder . . . . . 3/21
Form E2 – Boring Bars . . . . . 3/22
Form E4 – ER Collet Chuck . . . . . 3/23
Form F – Morse Taper . . . . . 3/23
Form Z2 – Sealing Plug . . . . . 3/23
Part Off Blade Holder . . . . . 3/18
Tapping Chuck – Quick Change . . . . . 3/118

**Vices . . . . . 5/2–5/6**
**Pipe Vices**
Reversible Clamping Device . . . . . 5/6
Standard Pipe Vice . . . . . 5/6
**Vice Jaws – Protective**
Aluminium Protective Vice Jaws . . . . . 5/6
Magnetic Protective Vice Jaws . . . . . 5/5
**Vices**
Compact Vice . . . . . 5/5
Height Adjuster . . . . . 5/2
Parallel Vice . . . . . 5/2–5/4
Precision Parallel Vice . . . . . 5/3
Rotary Plate . . . . . 5/3
Rotary Plate / Height Adjuster . . . . . 5/4
Rotary Plate Clamp Screw . . . . . 5/2
Spare Jaw For Parallel Vice . . . . . 5/3
Workshop Vice . . . . . 5/4

Welding Helmet . . . . . 9/38–9/40
Welding Mirror . . . . . 9/41

**Wire Cutters and Strippers. . . .** 5/31, 5/43, 5/52, 5/58–5/62 5/65–5/68, 5/72, 5/98
**Wire Cutters & Strippers**
Automatic Wire Stripping Pliers 5/60–5/62
Automatic Wire Stripping Pliers –
Self Adjusting . . . . . 5/61
Automatic Wire Stripping Pliers –
Shaped Blade . . . . . 5/62, 5/72
Crimping Gripping Pliers . . . . . 5/67
Crimping Lever Pliers . . . . . 5/67
Crimping Pliers . . . . . 5/67–5/68
Crimping Pliers for Co-Axial Connector 5/68
Crimping Pliers for End Sleeves 5/65–5/66
Crimping Pliers for Modular Jacks . . . . 5/68
Crimping System Pliers . . . . . 5/72
Electricians Wire Stripping Pliers . . . . . 5/43
Steel Wire Mesh Cutter . . . . . 5/98
VDE Wire Stripping Pliers . . . . . 5/59
VDE Wire Stripping
Side Cutting Pliers . . . . . 5/31, 5/58
Wire Stripping Pliers . . . . . 5/59–5/60
**Wire Rope Cutters**
Wire Rope & Cable Shears . . . . . 5/52
Wire Rope Shears . . . . . 5/52

**Wire Stripping Tools . . . . . 5/31, 5/43, 5/52–5/60 5/62–5/65, 7/65–5/68, 5/72**
**Crimping Tools**
Crimping Gripping Pliers . . . . . 5/67
Crimping Lever Pliers . . . . . 5/67
Crimping Pliers . . . . . 5/67–5/68
Crimping Pliers for End Sleeves 5/65–5/66
Crimping Pliers for Ferrules . . . . 5/63–5/64
Crimping Pliers for Ferrules –
Crescent Profile . . . . . 5/63
Crimping System Pliers . . . . . 5/72
VDE Crimping Pliers for Ferrules 5/63–5/64

**Pliers**
Electricians Wire Stripping Pliers . . . . . 5/43
VDE Wire Stripping
Side Cutting Pliers . . . . . 5/31, 5/58
Wire Stripping Pliers . . . . . 5/59–5/60

**Stripping Knives**
Cable Stripping Knife . . . 5/54–5/55, 7/65
Cable Stripping Knife – Plastic Handle 5/55
Cable Stripping Knife –
Rust Proof . . . . . 5/55, 7/65

Cable Stripping Knife –
Wooden Handle . . . . . 5/54
Universal Cable
Stripping Knife . . . . . 5/56–5/57, 5/59
**Stripping Tools**
Cable & Wire Strippers . . . . . 5/52–5/54
Coaxial Cable Stripping Tool . . . . . 5/54
Micro Precision Wire Stripping Tool . . 5/54
**Tweezers**
Coated Wire Stripping Tweezers . . . . . 5/62
**VDE Wire Stripping Tools**
VDE Cable Stripping Knife . . . . . 5/55
VDE Crimping Pliers for Ferrules 5/63–5/64
VDE Wire Stripping Pliers . . . . . 5/59
VDE Wire Stripping
Side Cutting Pliers . . . . . 5/31, 5/58

**Work Stop** . . . . . 3/127–3/128
Work Stop . . . . . 3/127–3/128

**Workbenches & Trolleys** . . . . . 6/75–6/91
Folding Workbench . . . . . 6/91
Rolling Workbench . . . . . 6/81
Telescopic Tool Trolley . . . . . 6/77
Tool Trolley Complete
with Tool Modules . . . . . 6/90–6/91
Tool Trolley Modules (Assorted Tool Insert)
. . . . . 6/75–6/77, 6/79–6/80, 6/85–6/87
Tool Trolleys . . . . . 6/77–6/78, 6/82–6/84,
. . . . . 6/88–6/91

**Wrenches** . . . . . 6/235–6/236, 6/239,
. . . . . 7/22–7/25
**Basin Wrenches**
Adjustable Basin Wrench . . . . . 7/24
Installation Wrench . . . . . 7/24–7/25
Spider Wrench . . . . . 7/24–7/25
**Chain Pipe Wrenches**
Chain Pipe Wrench . . . . . 7/22
Heavy Duty Chain Pipe Wrench . . . . . 7/23
**Cross Wrenches**
Cross Wrenches . . . . . 6/239
**Fitting Wrench**
Adjustable Fitting Wrench . . . . . 7/23
**Oil Filter Wrench**
Oil Filter Wrenches . . . . . 6/236
**Strap Wrench**
Strap Wrench . . . . . 7/23, 6/235

## Z

**Z-Axis Presetter** . . . . . 3/128
Z-Axis Presetter . . . . . 3/128

### Notes regarding the tool catalogue

**Edition 2017/19**

#### I. Tool catalogue

This catalogue contains more than 1500 pages of coordinated, high-quality products that we are sure will meet your demands.
The range has been selected by specialist based on many years of experience and countless discussions with our customers.

#### II. Catalogue range

The range is divided into **9 product categories** in order to make using the catalogue easier. Alongside the alphabetic index, the product category overviews make it easier to quickly locate certain products.
The range of products contained in the catalogue has been developed to meet requirements in accordance.

#### III. Terms regarding prices, sales, delivery and payment

The article prices detailed in the catalogue are **guideline prices** without VAT. Unless other quantities are specified, these prices apply to a single unit. If packaging units (PU) are marked with a Δ, the products may only be sold in complete PUs.
The prices are valid until 31.08.2019.
We hope you understand that unpredictable changes to the market may require price corrections and that prices may be lowered or raised as a result.
The legal VAT will be calculated at the rate valid on the day of delivery. **For awkward items and larger quantities, please request our special offer.**
All deliveries are subject to the currently valid edition of our sales, delivery and payment terms.

#### IV. Orders

Each individually defined article has an **8 character catalogue number.**
The **order quantity and catalogue number** are sufficient to place an order. For safety's sake and to prevent errors when writing out orders, we have to that you also include the short name for the article and any dimension specifications. Your orders will be processed in accordance with our valid delivery terms.
